What does it take to change the world? This book will show you how to harness the power of CASCADES to create a revolutionary movement! If you could make a change—any change you wanted—what would it be? Would it be something in your organization or your industry? Maybe something it's in your community or throughout society as a whole? Creating true change is never easy. Most startups don't survive. Most community groups never get beyond small local actions. Even when a spark catches fire and protesters swarm the streets, it often seems to fizzle out almost as fast as it started. The status quo is, almost by definition, well entrenched and never gives up without a fight. In this groundbreaking book, one of today's top innovation experts delivers a guide for driving transformational change. To truly change the world or even just your little corner of it, you don't need a charismatic leader or a catchy slogan. What you need is a cascade: small groups that are loosely connected but united by a common purpose. As individual entities, these groups may seem inconsequential, but when they synchronize their collective behavior as networks, they become immensely powerful. Through the power of cascades, a company can be made anew, an industry disrupted, or even an entire society reshaped. As Satell takes us through past and present movements, he explains exactly why and how some succeed while others fail.

About This Novel I'm Deisel (Dis-elle) a girl from a humble beginning, Porus, Jamaica. I've always wanted to be a nurse because I believed I cared about people. Truth is, now I'm so afraid of that word - 'care'. My biggest mistake, I guess, was caring for that bwoy, Elan - that big-head bwoy. Only if he had loved me even half as much as I loved him then I would have believed him when he said he needed me to carry his baby after we spend the night under the moonlight down by the river. He told me he would marry me when he came back. Mi still a wait. Still waiting. So, it's best to focus on being a real nurse then, eh? Career first and men behind. Yes, dem behind. Kiss me teeth. But maybe the career thing can wait because when opportunity happens, you see money like pennies falling from the sky. And a trying young lady like me won't drop this catch. But like the old saying, 'silver and gold will vanish.' In the end, there's this saying, 'The Best Way To Hold On To What you Love, is To Let Go.' So

maybe I should finally try letting go. Not a raatid! - This book includes a glossary of Jamaican words.* Individuals pictured are models and used for illustration only. Written by Mark © 2019 AN EDWARDS PRODUCTION

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.
