"Game Feel" exposes "feel" as a hidden language in game design that no one has fully articulated yet. The language could be compared to the building blocks of music (time signatures, chord progressions, verse) - no matter the instruments, style or time period - these building blocks come into play. Feel and sensation are similar building blocks where game design is concerned. They create the meta-sensation of involvement with a game. The understanding of how game designers create feel, and affect feel are only partially understood by most in the field and tends to be overlooked as a method or course of study, yet a game's feel is central to a game's success. This book brings the subject of feel to light by consolidating existing theories into a cohesive book. The book covers topics like the role of sound, ancillary indicators, the importance of metaphor, how people perceive things, and a brief history of feel in games. The associated

web site contains a playset with ready-made tools to design feel in games, six key components to creating virtual sensation. There's a play palette too, so the designer can first experience the importance of that component by altering variables and feeling the results. The playset allows the reader to experience each of the sensations described in the book, and then allows them to apply them to their own projects. Creating game feel without having to program, essentially. The final version of the playset will have enough flexibility that the reader will be able to use it as a companion to the exercises in the book, working through each one to create the feel described.

Money as a weapon. Money as revenge. Money as a substitute for sex and love. Money as status ... This intriguing and extraordinarily well-written book is cheering for those of us who aren't rich, and will go happily to our graves without ever pulling down £300,000 per annum' Simon Hoggart, LITERARY REVIEW 'How we chase Mammon defines us. Because, like it or not, we are what we earn,' CHASING MAMMON is the first travel book ever written about the uses of money and the attitudes of the wheelers and dealers in the international marketplace. Douglas Kennedy spent a year loitering with intent in six very disparate financial realms, including the Casablanca bourse (where stocks and bonds are listed on a blackboard), the squeaky-clean Singapore money markets, the Sydney futures market and

the first Hungarian stock exchange to open since 1948. From the 'New Age' City folk in London, unsure whether greed really is good for you, to the tireless toilers of Wall Street, Knnedey's encounters with money-makers around the globe make for an exhilarating and quirkily original journey through the modern cash nexus.
