Resilience for Today Jones & Bartlett Learning

Hypertension remains a leading cause of disability and death worldwide. Self-monitoring of blood pressure by patients at home is currently recommended as a valuable tool for the diagnosis and management of hypertension.

Unfortunately, in clinical practice, home blood pressure monitoring is often inadequately implemented, mostly due to the use of inaccurate devices and inappropriate methodologies. Thus, the potential of the method to improve the management of hypertension and cardiovascular disease prevention has not yet been exhausted. This volume presents the available evidence on home blood pressure monitoring, discusses its strengths and limitations, and presents strategies for its optimal implementation in clinical practice. Written by distinguished international experts, it offers a complete source of information and guide for practitioners and researchers dealing with the management of hypertension.

The increased bombardment of information on the world's dangers, from imminent disasters to terror and wars reported in the media, make us particularly vulnerable to stress and feelings of helplessness. This volume is unique in describing how to promote resilience in different groups, under different circumstances, and dealing with different adversities. Resilience is the human capacity to deal with stress, adversities, and threats—and somehow emerge stronger. Today, the increased bombardment of information on the world's dangers, from imminent disasters to terror and wars reported in the media, make us particularly vulnerable to stress and feelings of helplessness. This volume is unique in

describing how to promote resilience in different groups, under different circumstances, and dealing with different adversities. The contributors—psychologists, medical doctors, teachers and physical therapists among them—show how we can learn to draw on supports, build inner strength, and acquire interpersonal and problem-solving skills to deal with adversity. This volume will be useful for parents, service providers, researchers, policymakers, curriculum writers, and program developers. Research findings are applied to actions and policies so that the knowledge can be used in everyday life. Topics addressed include a basic understanding of resilience, resilience in families, the role of schools in resilience, and resilience for those needing health

care. The text includes a discussion of the concern that too many children are protected from adversity, are unprepared to face future stressors, and become overly dependent upon others.

Lippincott's Manual of Psychiatric Nursing Care Plans New York : Harper & Row

The most comprehensive psychiatric nursing care planning text available assists students and practitioners in providing effective care in a variety of settings. Clear presentation of information, consistent use of the nursing process, correlation of nursing and medical diagnoses, and prioritization of interventions make this text an

invaluable resource. Grounded in the latest classification of the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR) and the most current list of NANDA-approved nursing diagnoses, this text covers a wide range of disorders, their psychopathology, and appropriate nursing interventions with rationales. Care plans use real clinical situations and include therapeutic and nontherapeutic dialogue examples to familiarize nurses with likely scenarios and equip them with the tools they need to feel confident in any clinical setting. The first chapter, The Nursing Process, effectively describes the central principles of psychiatric nursing practice in detailing the ANA's six-step nursing process along with additional information on therapeutic nurse-client

communication skills, client history and assessment tools, NIC and NOC, and more. The six-step nursing process format is maintained throughout to emphasize a practice-oriented, problem-solving approach to psychiatric care. Major psychiatric disorders are reviewed consistently and completely with sections including Etiology, Epidemiology, Assessment and Diagnostic Criteria, Interventions, and Prognosis and Discharge Criteria. With this basis of knowledge, relevant care plans are offered in the second section of each chapter. Care plans based on DSM-IV-TR medical and NANDA nursing diagnoses are logically and consistently organized with Assessment Data, Outcome Criteria, Planning and Implementation, and Evaluation

sections. Assessment Data sections include detailed related factors (etiology) and defining characteristics or risk factors as appropriate for the specific diagnosis. Outcome Criteria sections give the reader clear indications of the desired end state. Planning and Implementation sections list specific, relevant, and practical nursing interventions with rationales in a clear, comprehensible two-column format. UNIQUE! Therapeutic and non-therapeutic dialogue examples are presented throughout to promote more effective client communication. Evaluation sections state the role of outcome evaluation as a critical and ongoing step in the nursing process. Client and Family Teaching boxes include Nurse Needs to Know and Teach

Client and Family sections covering all aspects of post-treatment instructions for clients and caregivers. DSM-IV-TR boxes list all related DSM-IV-TR diagnoses for quick reference. Helpful appendices contain information and strategies that are timely and useful in the care of clients with mental and emotional disorders including such topics as psychiatric and psychosocial therapies, grief and loss, spirituality, and many more.
