www.masteringaandp.com Mastering is the most effective and widely used online homework, tutorial, and assessment system for the sciences. It delivers self-paced tutorials that focus on your course objectives, provide individualized coaching, and respond to each student's progress. Mastering helps instructors maximize class time with easy-to-assign, customizable, and automatically graded assessments that motivate students to learn outside of

class and arrive prepared for lecture or lab. Instructors can now set up their MasteringA&P class in 5 minutes or less! Recent “ease of use” improvements to MasteringA&P include time-saving pre-built “best of” homework assignments, and a drag-and-drop calendar tool for quickly setting assignment due dates. 14 New, assignable Focus Figure Coaching activities expand upon the popular Focus Figures in the text by guiding students through complex processes step by step with hints and specific wrong answer feedback. 250 new, assignable Art-labeling activities require students to interact with key figures from the text by dragging and dropping labels into place. 16 New Dissection Videos and 29 New Bone Videos can now be assigned as Coaching Activities with hints and specific wrong answer feedback to help students preview or review for lab exercises involving dissection and bone identification. Dozens of assignable “Reading Questions” have been revised for the Seventh Edition, and all of them are different from the self study questions that are available to students in the related “Study Area.” Reading Questions include: Reading quizzes (10 per chapter), Art Questions (10 per chapter), Chapter Test Questions (30 per chapter), and Clinical Questions (in select chapters). Revised Test Bank questions include 300 new and revised questions to improve assessment of material in the textbook. NEW! Get Ready for A&P, Third Edition gets students up to speed on basic study skills, math skills, anatomical terminology, basic chemistry, cell biology, and more! Each chapter includes a pre-test, guided explanation, interactive quizzes and exercises, and an end-of-chapter cumulative test. The content is now available in both the Study Area and as assignable items in the Item Library of

MasteringA&P, and features brand new Video Tutors of tough topics, Pre-Test with instant Feedback, chapter guides, Post-tests, and study plans. Study Area contains case studies, self-study quizzing, practice tests, and activities for students to get extra practice, plus PAL 3.0, A&P Flix with self-study quizzes, Dissection and Bone Videos, Histology Atlas, Get Ready for A&P, Third Edition, glossary, flashcards, and eText. In addition to the above features, MasteringA&P New Design is now available and offers: Seamless integration with Blackboard Learn. Using a Blackboard Building Block, this integration delivers streamlined access to your customizable content and highly personalized study paths, responsive learning tools, and real-time evaluation and diagnostics within the context of Blackboard Learn. **CliffsNotes Anatomy & Physiology Quick Review, 2nd Edition** F.A. Davis

Nurses! Test Yourself in Anatomy and Physiology, 2nd Edition, has been fully revised and updated, with new and expanded features, to remain the essential self-test resource for nurses

studying basic anatomy and physiology and preparing for exams. This book includes over 500 questions, each with fully explained answers. These include:

- 50 A&P illustrations and puzzle grids
- Over 200 glossary terms
- Multiple choice questions
- True or false questions
- Labelling exercises
- Match the terms
- Fill in the blank questions

Each main body system has its own chapter, so you can get in depth practice for your exams. Body systems covered include:

- Integumentary system
- Musculoskeletal system
- Nervous system
- Endocrine system
- Cardiovascular system
- Respiratory system
- Digestive system
- Urinary system
- Immune and lymphatic system
- Male & female reproductive system

Self-testing is an effective activity in improving active learning. This book will help nursing students with their learning and recall in a subject they often report to find difficult. Covering all the main topics relevant to nursing and including varied exercises, this book will prove to be an effective aid alongside standard textbooks for any student studying anatomy and physiology. Dr Jim Jolly Lecturer School of Healthcare University of Leeds. This book is an excellent resource for students and their teachers as it complements all core anatomy and physiology text books and curricula no matter how the content is sequenced. The book covers all of the main systems in the body along with the fundamentals underpinning students' understanding of core concepts in physiology. The use of a self-assessment approach stimulates students to actively engage with the material while they self-correct and learn. The book is a gift to all nursing students revising for examinations that assess the anatomy and physiology component of their programme. I highly recommend this book. Dr. Margarita Corry, Registered Nurse Teacher and

Academic, School of Nursing & Midwifery, Trinity College Dublin. Katherine Rogers is a Senior Lecturer in the School of Nursing and Midwifery at Queen's University Belfast, UK. Bill Scott is a Senior Lecturer and Researcher in Biomedicine at Letterkenny Institute of Technology, Ireland.

This book situates learning in a clinical context to help students adopt thinking patterns that practicing healthcare professionals use. Learning in context gives students of respiratory therapy and related health professions a particularly relevant foundation for clinical practice. Explanations of physiological mechanisms underlying the benefits of common therapeutic, diagnostic, and monitoring procedures are unique to this text. This kind of knowledge is essential to the clinician in developing a rational plan of care. This book is for respiratory therapists and other health professionals involved in cardiac and respiratory care. Clinical Focus scenarios situate the subject matter in a patient care setting and are integrated throughout each chapter. Though provoking Concept Questions interspersed throughout the text invite students to reflect on their learning. Learning objectives and an annotated list of key terms appear at the beginning of each chapter, with key terms defined at their first mention in the text. Bulleted "Points to Remember" list at the end of each

chapter helps readers review key "take home" points. The interdependence of the pulmonary, cardiovascular, and renal systems in oxygenation and acid-base regulation are explored in depth. The interpretation of physiological data is emphasized, including hemodynamic values, blood gases, respiratory gases, blood electrolytes, electrocardiograms, pulmonary function tests, and breathing mechanisms. The physiological basis for therapeutic, diagnostic, and monitoring procedures is made explicit. A new chapter on Physiological Basis for Oxygenation and Lung Protective Strategies explains the ways in which normal physiology is affected by disease processes, and how specific respiratory techniques can be of benefit. A new chapter on Fetal and Newborn Cardiopulmonary Physiology explores these areas of fetal development and the normal transition to adult circulation and oxygenation, as well as the effects of prematurity on the lungs. A new chapter on Effects of Aging on the Cardiopulmonary System focuses on the effects of aging on the cardiopulmonary system and on response to exercise. New, separate chapters on Filtration, Urine Formation, and Fluid Regulation and Electrolyte and Acid-Base Regulation break down this difficult subject matter in manageable presentations. Offers increased coverage of cardiac enzymes and abnormalities in myocardial infarction and physiological rationale for current pharmacological interventions -not found in any other physiology textbook. Expanded coverage of asthma topics provides more information regarding abnormal airway physiology and autonomic nervous system anatomy and physiology in relation to asthma.

Anatomy & Physiology, Third Edition answers the demand for a

leaner version of Elaine Marieb and Katja Hoehn's Human Anatomy & Physiology with less in-depth coverage of pregnancy, heredity, and the developmental aspects of various body systems, while keeping basic themes such as homeostatic imbalances strategically in place. This revised edition includes major updates to the content and figures based on current research findings. The text's all new muscle art features more realistic, natural looking colors and textures, and its new Check Your Understanding questions follow major sections within each chapter and serve to reinforce and test students' understanding of the major concepts of the section. Elaine Marieb's instinct for providing colorful, dynamic explication of body-system anatomy & physiology creates a focused presentation of basic principles.
