diagram for their lessons and projects, the students

*How to Draw A Fish Step By Step - For Kids & Beginners*

Feb 4, 2021 · Step 3: From the first eye draw the lower part of the fish. Step 4: Draw the mouth of your fish. Step 5: Draw fins at the end and at the top. Step 6: Draw lines of the fins. Step 7: Add scales randomly on the body. Step 8: Draw small circles in the background for water bubbles. Start with shapes. Begin with the simple step you would for any animal drawing: break down the fish's body into basic shapes. If you're drawing a tuna in profile, the overall body shape is a spindle or a teardrop laid on its side. One end should be wide for the face of the fish, and the opposite end should come to a point for the tail.

*13 Body Parts of a Fish and Their Uses (Common Fish Anatomy)*

Fish are aquatic, ectothermic vertebrates. Many structures in fish are adaptations for their aquatic lifestyle. For example, fish have a stream-lined body that reduces water resistance while swimming. Fish have gills for "breathing" oxygen in water and fins for propelling and steering their body through water.
