In nineteenth-century Britain, the
spectacular and highly profitable
theatrical form known as "pantomime"
was part of a shared cultural repertoire
and a significant medium for the
transmission of stories. Rowdy, comedic,
and slightly risqué, pantomime
productions were situated in dynamic
relationship with various forms of print
and material culture. Popular fairy-tale
theater also informed the production and
reception of folklore research in ways
that are often overlooked. In *Staging
Fairyland: Folklore, Children's
Entertainment, and Nineteenth-Century
Pantomime*, Jennifer Schacker reclaims
the place of theatrical performance in
this history, developing a model for the
intermedial and cross-disciplinary study
of narrative cultures. The case studies
that punctuate each chapter move
between the realms of print and
performance, scholarship and popular
culture. Schacker examines pantomime
productions of such well-known tales as
"Cinderella," "Little Red Riding Hood,"
and "Jack and the Beanstalk," as well as

others whose popularity has
waned—such as, "Daniel O'Rourke" and
"The Yellow Dwarf." These productions
resonate with traditions of
impersonation, cross-dressing, literary
imposture, masquerade, and the social
practice of "fancy dress." Schacker also
traces the complex histories of Mother
Goose and Mother Bunch, who were
often cast as the embodiments of both
tale-telling and stage magic and who
move through various genres of
narrative and forms of print culture.

These examinations push at the limits of
prevailing approaches to the fairy tale
across media. They also demonstrate
the degree to which perspectives on the
fairy tale as children's entertainment
often obscure the complex histories and
ideological underpinnings of specific
tales. Mapping the histories of tales
requires a fundamental reconfiguration
of our thinking about early folklore study
and about "fairy tales": their bearing on
questions of genre and ideology but also
their signifying possibilities—past,
present, and future. Readers interested
in folklore, fairy-tale studies, children's
literature, and performance studies will
embrace this informative monograph.

Focusing on his evocative and profound references to children and their stories, Children's Stories and 'Child-Time' in the Works of Joseph Cornell and the

Transatlantic Avant-Garde studies the relationship between the artist's work on childhood and his search for a transfigured concept of time. This study also situates Cornell and his art in the broader context of the transatlantic avant-garde of the 1930s and 40s.

Analisa Leppanen-Guerra explores the children's stories that Cornell perceived as fundamental in order to unpack the dense network of associations in his under-studied multimedia works. Moving away from the usual focus on his box constructions, the author directs her attention to Cornell's film and theater scenarios, 'explorations', 'dossiers', and book-objects. One highlight of this study is a work that may well be the first artist's book of its kind, and has only been exhibited twice: *Untitled (Journal d'Agriculture Pratique)*, presented as Cornell's enigmatic tribute to Lewis Carroll's Alice books.
