CASSIDY HICKS

Fjalor i gjuhës së sotme shqipe Corwin Press

This book presents an in-depth analysis of how statutory and third sector organisations have faced the challenge of dealing with former 'terrorists'. Offering a theoretically robust, empirically rich account of work with ex-prisoners and those considered 'at risk' of involvement in extremism in the United Kingdom, Marsden dissects the problems governments are facing in dealing with the effects of 'radicalisation'. Increasingly, governments are struggling with the challenge of dealing with those who have become involved in extremism, and yet, comparatively little is known about how and why people renounce violence. Nor are existing efforts to 'deradicalise' extremists well understood. Arguing that reintegration is a more appropriate framework than 'deradicalisation', Marsden looks in detail at the mechanisms by

which people can be supported to move away from extremism. By drawing out implications for policy, practice and academic debates around disengagement from radical subcultures, this book makes a significant contribution to an issue only likely to grow in importance for scholars of criminological theory, terrorism and justice.

The Magic of Wisdom Springer

How can we use professional development to provide the best teaching and learning opportunities for all students? Teachers who know their content and strategies can open a virtual toolbox and take out what they need to help all students become successful. This revised and updated edition explains how educational leaders can design, deliver, and evaluate collaborative standards-based professional development, and contains: Essential questions about high-quality professional development Information on creating the culture for a learning community Conditions and processes for professional

development Suggestions on designing your own model Tools for evaluating and rethinking professional development and learning Strategies for deepening a leader's impact on a standards-based system

Does Islamic law define Islamic ethics? Or is the law a branch of a broader ethical system? Or is it but one of several independent moral discourses, Islamic and otherwise, competing for Muslims' allegiance? The essays in this book present a range of answers: some take fiqh as the defining framework for ethics, others insert the law into a broader ethical system, and others present it as just one among several parallel Islamic ethical discourses, or show how Islamic ethics might coexist with non-Muslim normative systems. Their answers have far reaching implications for epistemology, for the authority of jurists and lay Muslims, for the practical moral challenges of daily life, and for relationships with non-Muslims. The book presents Muslim ethicists with a strategic contemporary choice: should they pursue a single overarching methodology for judging all ethical questions, or should they relish the rhetorical and political competition of alternative but not necessarily incompatible moral discourses?

Ylli International Institute of Islamic Thought (IIIT)

In 1979, Edward P. Alexander's *Museums in Motion* was hailed as a much-needed addition to the museum literature. In combining the history of museums since the eighteenth century with a detailed examination of the function of museums and museum workers in modern society, it served as an essential resource for

those seeking to enter to the museum profession and for established professionals looking for an expanded understanding of their own discipline. Now, Mary Alexander has produced a newly revised edition of the classic text, bringing it the twenty-first century with coverage of emerging trends, resources, and challenges. New material also includes a discussion of the children's museum as a distinct type of institution and an exploration of the role computers play in both outreach and traditional in-person visits.

Reproduction is, it would appear, a very simple biological event: the result of an act of love. In actual fact, it has always been, and still continues to be, one of the most complex, yet at the same time, most fascinating, problems, with which Science has ever been engaged. Physiopathology of human reproduction has always made use of investigations of a morphological nature, perhaps on account of the need to «see inside» the reproductive apparatus or within the gonads themselves in order to better understand how they function. Observation of spermatozoa practically coincided with the discovery of the microscope, and histological study of the testis and ovary was, for a very long time, the only means available with which to closely follow the evolution of gametes destined to their meeting. Improvement of techniques resulting from the evolution of endocrinology of reproduction has only apparently put aside morphological techniques, whilst at the same time there has been a gradual development of ultrastructural techniques, on the one hand, and, on the other, macroscopic diagnostic systems through images.

The Palace of Dreams New York : McGraw-Hill

Translated from the Jusef Vrioni's French version of the Albanian original, this is the author's own vision of totalitarianism.

Language, Religion and National Identity in Europe and the Middle East Anchor Canada

This book discusses the historical record of the idea that language is associated with national identity, demonstrating that different applications of this idea have consistently produced certain types of results. Nationalist movements aimed at 'unification', based upon languages which vary greatly at the spoken level, e.g. German, Italian, Pan-Turkish and Arabic, have been associated with aggression, fascism and genocide, while those based upon relatively homogeneous spoken languages, e.g. Czech, Norwegian and Ukrainian, have resulted in national liberation and international stability. It is also shown that religion can be more important to national identity than language, but only for religious groups which were understood in premodern times to be national rather than universal or doctrinal, e.g. Jews, Armenians, Maronites, Serbs, Dutch and English; this is demonstrated with discussions of the Holocaust, the Armenian Genocide, the civil war in Lebanon and the breakup of Yugoslavia, the United Netherlands and the United Kingdom.

Macedonia; Its Races and Their Future Cambridge University Press

Seasoned trends forecaster and consultant Annie Auerbach takes a fresh look at women's professional lives today by rethinking the 9 to 5 in this "no-nonsense guide to thinking and behaving more

flexibly in order to have a happier, better, less frenetic life” (Marie Claire)—now widely available for American readers and updated with an author note addressing work in the post-Covid age. The recent coronavirus outbreak has proven what Annie Auerbach has long championed: working 9-5 in an office doesn’t work for most us. It’s time to change the rules. We can be efficient and productive when we’re allowed the freedom of flexibility—to meet deadlines working during the hours and in the places we choose. But before the coronavirus pandemic, only 47 percent of American workers had access to flexible working options. Annie Auerbach advises major corporations, including Nike, Google, Unilever, and Pepsico. She understands work culture and the needs of employees. The world is changing for working women, but until the recent pandemic, companies turned a blind eye. Now, it’s time to make this change routine. Auerbach reiterates the importance of leaving the office cubicle behind and explores the realities many women experience working from home and the changes to their daily lives, including the trickle-down effects, from emotional labor to balancing childcare and education with work, to even biohacking the female body’s unique rhythms. What happens when women embrace the concept of flex? We become more creative, more strategic with our time and energy, and more engaged with our personal lives. As Auerbach makes clear, we reject “our toxic culture of presenteeism, time-pressure, and ultimately burnout. It helps us escape the army of octopus lady jugglers, crazed with the exhaustion of “having it all.” It allows us to live longer lives more sustainably. It gives us self-worth.”

This book, based on Transport and Urban Development COST Action TU1208, presents the most advanced applications of ground penetrating radar (GPR) in a civil engineering context, with documentation of instrumentation, methods and results. It explains clearly how GPR can be employed for the surveying of critical transport infrastructure, such as roads, pavements, bridges and tunnels and for the sensing and mapping of underground utilities and voids. Detailed attention is also devoted to use of GPR in the inspection of geological structures and of construction materials and structures, including reinforced concrete, steel reinforcing bars and pre/post-tensioned stressing ducts. Advanced methods for solution of electromagnetic scattering problems and new data processing techniques are also presented. Readers will come to appreciate that GPR is a safe, advanced, non destructive and noninvasive imaging technique that can be effectively used for the inspection of composite structures and the performance of diagnostics relevant to the entire life cycle of civil engineering works.

An exploration of the relationship between culture and politics in the modern world through essays on such varied topics as the Ayatollah Khomeini, Czech dissidents, and Malinowski.

Outline Of Scientific Writing, An: For Researchers With English As A Foreign Language Rowman Altamira

Contains chapter overview and outline, learning objectives, key concept review, helpful hints, multiple choice questions and problem solving questions

Why Can't We Get It Right? HarperCollins

This book is aimed at researchers who need to write clear and understandable manuscripts in English. Today, English is the official language of international conferences and most important publications in science and technology are written in English. Therefore, learning how to write in English has become part of the researcher's task. The book begins by discussing constructs of the English language such as sentence structure and word use. It then proceeds to discuss the style and convention used in scientific publications. Some of the topics covered include: Planning of a Manuscript; Authorship; References; Tables and Figures; Submission to a Journal; Production Schedules. This book is written at such a level that the reader should not have to resort to a dictionary. It includes many examples and exercises to clarify the rules and guidelines presented.

This book is an outcome of the 4th International Conference «Plagiarism across Europe and Beyond» organized by Canakkale Onsekiz Mart University, Mendel University in Brno, and the European Network for Academic Integrity. The conference is co-funded by the Erasmus+ Strategic Partnerships Programme of the European Union. It aims to be a forum for sharing best practices and experiences by addressing issues of academic integrity from a wide-scope global perspective. With regards to the crucial role of ethics and honesty in academic work, universities are in need of more effective policies against infringements of academic standards. The papers in this book therefore aim to contribute to the standardization of consistent and transparent approaches to issues of academic integrity from

several perspectives.

Probleme aktuale të kulturës së gjuhës shqipe "O'Reilly Media, Inc."

From Ismail Kadare, winner of the inaugural Man Booker International Prize - a novelist in the class of Coetzee, Pamuk, Márquez, and Rushdie - the stunning new translation of one of his major works. In the early fifteenth century, as winter falls away, the people of Albania know that their fate is sealed. They have refused to negotiate with the Ottoman Empire, and war is now inevitable. Soon enough, dust kicked up by Turkish horses is spotted from a citadel. Brightly coloured banners, hastily constructed minarets, and tens of thousands of men fill the plain below. From this moment on, the world is waiting to hear that the fortress has fallen. The Siege tells the enthralling story of the weeks and months that follow - of the exhilaration and despair of the battlefield, the constantly shifting strategies of war, and those whose lives are held in the balance, from the Pasha himself to the artillerymen, astrologer, blind poet, and harem of women who accompany him. "Believe me," the general said. "I've taken part in many sieges but this," he waved towards the castle walls, "is where the most fearful carnage of our times will take place. And you surely know as well as I do that great massacres always give birth to great books. You really do have an opportunity to write a thundering chronicle redolent with pitch and blood, and it will be utterly different from the graceful whines composed at the fireside by squealers who never went to war." Brilliantly vivid, as insightful as it is compelling, The Siege is an unforgettable account of the clash of two great civilisations, and a portrait of war that will resonate across the centuries.
