Electronic Resource Management makes the case that technical services workflows need to make a corresponding shift toward e-centric models and highlights the increasing variety of e-formats that are forcing new developments in the field. Six chapters cover key topics, including: technical services models, both past and emerging; staffing and workflow in electronic resource management; implementation and transformation of electronic resource management systems; the role of the electronic resource librarian in discovery systems, layers and tools; and academic library consortia and the evolving role of electronic resources and technology. The leading chapters include case studies from around the world, and a concluding chapter focuses on the disruptive nature of e-books and how broad adoption of this format is emerging as the tipping point towards holistic 'resource management', where separate technical services processes for print and electronic resources are finally merged. An emphasis on 'access' within the new technical services model Focuses on the unique attributes of electronic resource management that are distinct from traditional print serials workflows Covers consortia and how membership affects electronic resource management workflows, priorities, and technical processes

The main objective of this book is to provide students, scholars, and practitioners a detailed background on the human resource management (HRM) practices in Mexico. This book provides ten distinguishing chapters focusing on the core functions of HRM in Mexico. The writing and researching for this book took almost a year (June 2010 to May 2011). Scholarly databases of ABI Global Inform, Business Source Complete, Google Scholar among several others were diligently searched for relevant articles for each chapter. A comprehensive bibliography is provided at the end of the book. Each chapter has its learning goals, discussion questions, and team activities to engage students in active learning. Each chapter also provides an implication section for multinational practitioners. The chapter on "best practices" includes qualitative interviews with the

HRM leaders of the "best companies." This book has 15 tables and two appendices that provide important information on the main concepts from the various chapters.. There is paucity in the literature in obtaining consolidated information on Mexican HRM practices. The book includes seventeen excellent researched and documented papers that reflect the diversity of thought, ideas and experiences related to IWRM. They draw from an extensive, inclusive and geographically representative range of theoretical propositions and practical examples. These include the implementation status of the IWRM concept at local, basin, regional and national levels; its appropriateness for the twenty-first century; main implementation gaps from the institutional, legal, policy, governance, management and technical viewpoints; the likelihood that IWRM's entrenchment in laws, regulations and policies has led to smoother implementation and the reasons why that has been the case; reflexions on whether the attention given to IWRM is pushing other alternatives to the policy periphery; and the new conceptual constructions that can be put forward for discussion in the international arena. For the development and water communities it is imperative to debate and reach towards more illustrative conclusions regarding whether the promotion of the IWRM concept and its actual implementation status have been beneficial for development and how the notion could evolve to achieve this end. In-depth objective and constructive discussions, arguments, proposals and ideas are put forward for analysis by all interested parties. The book has the objective of fostering scholarly exchange, encouraging intellectual debate and promoting the advancement of knowledge and understanding of IWRM as a concept, as a goal per se and as a strategy towards development goals. This book was published as a special issue of the International Journal of Water Resources Development.
