What Do Sharks Eat for Dinner? Pan
"Not just a smart memoir about cross-cultural eating but one of the most engaging books of any kind I've read in years." —Celia Barbour, O, The Oprah Magazine
After fifteen years spent

exploring China and its food, Fuchsia Dunlop finds herself in an English kitchen, deciding whether to eat a caterpillar she has accidentally cooked in some home-grown vegetables. How can something she has eaten readily in China seem grotesque in England? The question lingers over this “autobiographical food-and-travel classic” (Publishers Weekly).

From the tiny cookiecutter to the great white, the world's oceans are home to hundreds of species of marvelous and mysterious sharks. There's the giant whale shark - longer than two school buses but gentle enough to swim with humans; and the swell shark, which can wedge itself into a hideout and then swell so that it cannot be pulled out. There are sharks that lay eggs and sharks that have live babies. Some are small enough to fit into the palm of your hand, and some have teeth bigger than your fist. Join acclaimed author Laurence

Pringle on a fascinating exploration of the wide variety of fish classified as sharks. Together with Meryl Henderson's beautiful and realistic illustrations, young readers will be taken on an unforgettable journey deep under the sea.

Sharks National Geographic Books
At once feared and revered, sharks have captivated people since our earliest human encounters. Children and adults alike stand awed before aquarium shark tanks, fascinated by the giant teeth and unnerving eyes. And no swim in the ocean is undertaken without a slight shiver of anxiety about the very real—and very cinematic—dangers of shark bites. But our interactions with sharks are not entirely one-sided: the threats we pose to sharks through

fisheries, organized hunts, and gill nets on coastlines are more deadly and far-reaching than any bite. In *Sharks and People* acclaimed wildlife photographer Thomas Peschak presents stunning photographs that capture the relationship between people and sharks around the globe. A contributing photographer to National Geographic, Peschak is best known for his unusual photographs of sharks—his iconic image of a great white shark following a researcher in a small yellow kayak is one of the most recognizable shark photographs in the world. The other images gathered here are no less riveting, bringing us as close as possible to sharks in the wild. Alongside the photographs, *Sharks and People* tells the compelling story of the natural history of

sharks. Sharks have roamed the oceans for more than four hundred million years, and in this time they have never stopped adapting to the ever-changing world—their unique cartilage skeletons and array of super-senses mark them as one of the most evolved groups of animals. Scientists have recently discovered that sharks play an important role in balancing the ocean, including maintaining the health of coral reefs. Yet, tens of millions of sharks are killed every year just to fill the demand for shark fin soup alone. Today more than sixty species of sharks, including hammerhead, mako, and oceanic white-tip sharks, are listed as vulnerable or in danger of extinction. The need to understand the significant part sharks play in the oceanic ecosystem has never

been so urgent, and Peschak's photographs bear witness to the thrilling strength and unique attraction of sharks. They are certain to enthrall and inspire. Eaten by a Shark Crown Books for Young Readers

swims all to himself; Norvin, who looks a bit like a shark, pretends to be one. He scares off the other swimmers, leaving him in happy aquatic solitude until he is discovered by an amorous female shark. Grandma Was Eaten by a Shark DigiCat Photographer David Doubilet takes you down to the deep, where a variety of this amazing family awaits you, from the famous Great White to his foot-long cousins. Doubilet spends much of his life trying to get close enough to look them in the eye. And now, through Doubilet's remarkable photographs, you can too! Close to Shore Bellwether Media Combining rich historical detail and a harrowing, pulse-pounding narrative, Close to Shore brilliantly re-creates the summer of 1916, when a rogue Great White shark attacked swimmers along

the New Jersey shore, triggering mass hysteria and launching the most extensive shark hunt in history. In July 1916 a lone Great White left its usual deep-ocean habitat and headed in the direction of the New Jersey shoreline. There, near the towns of Beach Haven and Spring Lake--and, incredibly, a farming community eleven miles inland--the most ferocious and unpredictable of predators began a deadly rampage: the first shark attacks on swimmers in U.S. history. Capuzzo interweaves a vivid portrait of the era and meticulously drawn characters with chilling accounts of the shark's five attacks and the frenzied hunt that ensued. From the unnerving inevitability of the first attack on the esteemed son of a prosperous Philadelphia physician to the spine-

tingling moment when a farm boy swimming in Matawan Creek feels the sandpaper-like skin of the passing shark, *Close to Shore* is an undeniably gripping saga. Heightening the drama are stories of the resulting panic in the citizenry, press and politicians, and of colorful personalities such as Herman Oelrichs, a flamboyant millionaire who made a bet that a shark was no match for a man (and set out to prove it); Museum of Natural History ichthyologist John Treadwell Nichols, faced with the challenge of stopping a mythic sea creature about which little was known; and, most memorable, the rogue Great White itself moving through a world that couldn't conceive of either its destructive power or its moral right to destroy. Scrupulously researched and

superbly written, *Close to Shore* brings to life a breathtaking, pivotal moment in American history. Masterfully written and suffused with fascinating period detail and insights into the science and behavior of sharks, *Close to Shore* recounts a breathtaking, pivotal moment in American history with startling immediacy.
