Though recently improved, Chinese legislation on environmental permits is still weak and urgent measures are needed to help the country in moving towards an effective permitting system. This book examines this legislation gap

and presents a contribution to solving China's pollution problems. By analysing the deficiencies of current Chinese provisions on permitting in light of EU legislation, and its Italian application, the book determines which permitting legislative structure and approach China should embrace in practice in order to build more comprehensive legislation on emission permitting. It is argued that a set of ad hoc legislative measures should be implemented so as to strengthen China's environmental protection and efficiently tackle pollution. The book will be a valuable resource for researchers, academics and policy-makers working in the areas of international environmental law and comparative law.

On 18 July 1981, a Canadair CL-44D Swingtail cargo aircraft of the Argentine company Transporte Aéreo Rioplatense mysteriously disappeared over the Soviet Republic of Armenia while on a flight from Iran via Turkey in the direction of Cyprus. Four days later, on 22 July 1981, the Vremya TV broadcast in Moscow forwarded a report from the Soviet TASS news agency which stated that an aircraft of unidentified origin had entered Soviet territory in the vicinity of the Armenian city of Yerevan. According to the same release, the aircraft had ignored all calls from air traffic control and ended up crashing and burning after colliding with another Soviet aircraft. With this cryptic information began one of the most impressive and least known stories of Argentine civil aviation: the

shooting down of the freighter registered as LV-JTN by the Soviet Air Defense Force (V-PVO). The episode, heavily covered up by Moscow, was part of a much larger geopolitical scenario: the clandestine transport of US-made weapons and spare parts that was taking place between Tel Aviv and Tehran by virtue of a secret agreement between the Iranian and Israeli governments. All this at a time when the former was subjected to an arms embargo in revenge for the hostage-taking that occurred in 1979 at the US Embassy in Tehran. The Islamic Republic of Iran, formed as a result of the Islamic Revolution that had broken out that same year, was an avowed enemy of Israel, whom it considered a mere Zionist regime that imposed itself in the

occupation of Palestine. The Iranian religious leader Ruhollah Khomeini did not recognize the State of Israel, which he referred to simply as "Little Satan". However, the Iranians desperately needed supplies of US weapons as a few months earlier, on 22 September 1980, they had been invaded by Iraq. The Israelis saw the possibility of carrying out a sideline business and thus embarked on a clandestine supply operation. The intelligence services of the Soviet Union soon became aware of the secret arms trafficking and decided to divert one of the involved aircraft into their airspace then force it to land in their territory with the aim of exposing the operation and all its protagonists. By interfering with radio communications and manipulating navigational aids, the

KGB managed to divert the Argentine CL-44D from its route, with it ending up inside Soviet airspace. However, the Sukhoi Su-15TM interceptors of the V-PVO failed in their mission, and thus their ground control ordered the destruction of the target. The Soviet conspiracy of silence began after discovering that its Air Defense Force had destroyed an Argentine-flagged civil plane, with an Argentine crew, which was flying empty. Juliet Tango November explores this incident in detail and is richly illustrated with color images and previously unseen photographs.

Cassese's International Law is a new edition of an established classic. Authors Gaeta, Villalón, and Zappalà have built on the legacy of international law luminary Antonio Cassese to offer a thought-provoking and lucid account for today's undergraduates and postgraduates. The authors have refreshed Cassese's original approach, ensuring the book continues to compare the traditional legal position with the developing and evolving law. Advancing areas such as the law of the sea, territorial matters, and international environmental law have been expanded to give proper place to their evolving development, while brand new chapters on international trade and foreign investment have been written to reflect

the advancements of these areas. In maintaining the broad structure and approach but providing new material, the authors bring fresh context to Cassese's thinking and provide students with an up-to-date, compelling account of the landscape of international legal thinking.

Gender inequality remains an issue of high relevance, and controversy, in society. Previous research shows that language contributes to gender inequality in various ways: Gender-related information is transmitted through formal and semantic features of language, such as the grammatical category of gender, through gender-related connotations of role names (e.g.,

manager, secretary), and through customs of denoting social groups with derogatory vs. neutral names. Both as a formal system and as a means of communication, language passively reflects culture-specific social conditions. In active use it can also be used to express and, potentially, perpetuate those conditions. The questions addressed in the contributions to this Frontiers Special Topic include: • how languages shape the cognitive representations of gender • how features of languages correspond with gender equality in different societies • how language contributes to social behaviour towards the sexes • how gender equality can be promoted through strategies for gender-fair language use These questions are

explored both developmentally (across the life span from childhood to old age) and in adults. The contributions present work conducted across a wide range of languages, including some studies that make cross-linguistic comparisons.

Among the contributors are both cognitive and social psychologists and linguists, all with an excellent research standing. The studies employ a wide range of empirical methods: from surveys to electro-physiology. The papers in the Special Topic present a wide range of complimentary studies, which will make a substantial contribution to understanding in this important area.

Oil, an integral part of the contemporary global economy, is considered a driving force behind the 2003 invasion of Iraq. Hydrocarbon reserves in Iraq have a significant role to play in global supply, with oil revenue accounting for more than 90% of Iraqi government income. This book provides a comprehensive insight into the key foundations of Iraq's oil industry and assists in the development of a core area of domestic law to promote economic recovery following years of instability. It addresses the development of oil legislation and the formation of contracts since the US and allied occupation of Iraq in 2003. Legislation is assessed against the framework of the constitution along with the different types of oil agreements and their terms.

The book looks at three main aspects of oil legislation, beginning with the validity and interpretation of the constitution as any subsequent legislation governing oil policy will be based upon this. The work then discusses whether the draft oil and gas law of 2007 and any subsequent oil legislation, including the law implemented by the Kurdish Regional Government in 2007, is valid. Finally, the book analyses the legitimacy of oil agreements entered into by the central and regional governments and whether these contain terms beneficial to the state and contracting party. Providing an in-depth analysis of the origins and development of the legal framework of the oil industry in Iraq, the book acts as both a reference source and a springboard for future research across a

range of legal, economic and policy perspectives. It will appeal to practitioners and academics working in energy law and international investment law, as well as policy-makers, legal advisors and those working in governments and energy companies.

Fiscal risks are abating somewhat but remain elevated. In advanced economies, recent policy moves have broadly stabilized public debt ratios, but medium-term prospects are still uncertain, and debt remains at historic highs. Fiscal vulnerabilities are rising in both emerging market economies and low-income countries, although in most cases from relatively moderate levels. Across country groups, fiscal policy

should aim at rebuilding policy space while supporting the recovery and long-term growth prospects.

The European Court of Human Rights is one of the main players in interpreting international human rights law where issues of general international law arise. While developing its own jurisprudence for the protection of human rights in the European context, it remains embedded in the developments of general international law. However, because the Court does not always follow general international law closely and develops its own doctrines, which are, in turn, influential for national courts as well as other international courts and tribunals, a feedback loop of influence occurs. This book explores the interaction, including the problems arising in the context of human rights, between the European

Convention on Human Rights and general international law. It contributes to ongoing debates on the fragmentation and convergence of international law from the perspective of international judges as well as academics. Some of the chapters suggest reconciling methods and convergence while others stress the danger of fragmentation. The focus is on specific topics which have posed special problems, namely sources, interpretation, jurisdiction, state responsibility and immunity.

**Rethinking Coordination of Services to Refugees in Urban Areas**

Cambridge University Press

This book explores the relationship between space, subjectivity and property in order to invert conventional socio-legal understandings of property.

Sarah Keenan demonstrates that new political possibilities for property may be unveiled by thinking about property in terms of space and belonging, rather than exclusion. Drawing on feminist and critical race theory, this book shifts focus away from the propertied subject and on to the broader spaces in and through which the propertied subject is located. Using case studies, such as analyses of compulsory leases under Australia's Northern Territory Intervention and lesbian asylum cases from a range of jurisdictions, Keenan argues that these spaces consist of networks of relations that revolve around belonging: not just belonging between subject and object, as property is traditionally understood, but also the less explored relation of belonging between the part and the

whole. This book therefore offers a conceptually useful way of analysing a wide range of socio-legal issues. It will be of relevance to those working in the area of property and legal geography, but also to those with more general interests in socio-legal studies, social and political theory, postcolonial studies, critical race studies and gender and sexuality studies.

"Urban Flood Risk Reduction" is a comprehensive book that delves into the critical issue of urban floods and presents effective management options for reducing flood risks in disaster-prone areas. With a focus on international programs for urban infrastructure development, this book offers a wealth

of case studies from around the world, showcasing successful approaches to urban flood risk reduction. The book begins by highlighting the devastating impact of urban floods on both human lives and property, as well as their hindrance to economic and social progress. It emphasizes the urgent need for proactive measures to mitigate flood risks and ensure sustainable urban development. Drawing on a wide range of case studies, the book examines various aspects of urban flood risk reduction programs. Each case study is meticulously analyzed, considering factors such as the program's objectives, financing mechanisms, areas of assistance, organizational and institutional structure, operational framework, innovative regulatory

approaches, and program components. Through these in-depth case studies, readers gain valuable insights into successful strategies and best practices for managing urban flood risks. The book emphasizes the importance of comprehensive approaches that integrate multiple elements, including infrastructure development, community engagement, and policy frameworks. "Urban Flood Risk Reduction" serves as a valuable resource for urban planners, policymakers, researchers, and practitioners seeking to address the challenges posed by urban floods. It offers practical guidance, evidence-based insights, and lessons learned from real-world experiences, enabling readers to develop effective flood risk reduction strategies tailored to their specific

contexts. Overall, this book presents a compelling argument for prioritizing urban flood risk reduction and offers a roadmap for creating resilient cities that can withstand and recover from flood events, fostering sustainable and thriving communities.

*Small Arms Survey 2015* Routledge  
With several empirical evidences, this book advocates on the importance of human capital of persons with disabilities and demands the paradigm shift from charity into investment approach. Society in general believes that people with disabilities cannot benefit from education, cannot participate in the labour market and cannot be contributing members to families and countries. To invalidate such assumptions, this book describes

how education in particular helps make persons with disabilities achieve economic independence and social inclusion. For the first time, detailed analyses of returns to the investment in education and nexus between disability, education, employability and occupational options are discussed. Moreover, other chapters describe disability and poverty followed by the discussion of barriers behind why persons with disabilities are unable to obtain education despite the significantly higher returns. These foundational themes recur throughout the book.

Strategy is vital to effective and efficient public service delivery as well as

successful governance and leadership. This new text provides a concise yet systematic overview of the achievements, downfalls and complexities of public strategy in today's globalized and often market-driven world. It describes the place of strategy in civic societies whose citizens are more interconnected and vocal than ever. It shows that successful strategic planning goes well beyond problem-solving to developing adaptable plans that can evolve as requirements and circumstances change. And it explains why muddling through simply won't work. Emphasizing the importance of applying a variety of techniques to the process of strategy-creation, *Rethinking Public Strategy* reassesses the key factors that can deliver significant

improvements in public services and build public value. It looks at why public strategy is distinctive, as well as the principles it has in common with the corporate domain. This text includes numerous case studies from around the globe – from South Africa to Singapore, the USA to Germany, and from China to the Czech Republic – that ground the exposition in real experience. Based on state-of-the-art research by two expert practitioners in the field, it offers an essential guide to the art of strategy in the contemporary public sector, and encourages readers to evaluate critically the various approaches to strategy.

**Handbook of Space Law** Cambridge University Press

The law of human rights permeates every area of law. This title focuses on

the impact of human rights law at every stage of the criminal process. It addresses the principal human rights issues that apply during an investigation and prior to a suspect knowing that they are a suspect, powers of arrest and search, and treatment at the police station. It considers every stage of the criminal process, including appeal before the domestic courts and the European Court of Human Rights. Part 1 covers the fundamental principles of the European Convention on Human Rights and the Human Rights Act 1998 and their application in domestic law, particularly in relation to criminal appeals, as well as taking a case to the European Court of Human Rights. Parts 2 to 4 address the three broad phases of a criminal case – investigation, pre-trial and trial –

providing an analysis of human rights law as it applies in each phase. This book offers a comprehensive analysis of the often complex interactions between criminal law and human rights; with a wide range of experienced contributors drawn from the legal profession and academia, under the general editorship of Ben Douglas-Jones KC, Daniel Bunting, Paul Mason and Benjamin Newton.

This volume offers insights into the ways in which plain language has influenced the language of the law in the United Kingdom, critically reflecting on its historical development and future directions. The book opens with an overview of the theoretical frameworks

underpinning plain language and a brief history of plain language initiatives as a foundation from which to outline ongoing debates on the opportunities and challenges of using plain language in the legal domain. The volume details strands where plain language has had considerable impact thus far on legal English in the UK, notably in legislative drafting, but it also explores areas in which plain language has made fewer inroads, such as the language of court judgments and that of online terms and conditions. The book looks ahead to unpack highly topical areas within the plain language debate, including the question of design and visualisation and the ramifications of digitalisation, contributing to ongoing conversations on the importance of plain language both in

the UK and beyond. This book will be of particular interest to students and scholars interested in the intersection of language and the law as well as related disciplinary areas such as applied linguistics and English for Specific Purposes.

**Doing English in Asia** United Nations  
The international law on the use of force is one of the oldest branches of international law. It is an area twinned with the emergence of international law as a concept in itself, and which sees law and politics collide. The number of armed conflicts is equal only to the number of methodological approaches used to describe them. Many violent encounters are well known. The Kosovo Crisis in 1999 and the US-led invasion of Iraq in 2003 spring easily to the minds of

most scholars and academics, and gain extensive coverage in this text. Other conflicts, including the Belgian operation in Stanleyville, and the Ethiopian Intervention in Somalia, are often overlooked to our peril. Ruys and Corten's expert-written text compares over sixty different instances of the use

of cross border force since the adoption of the UN Charter in 1945, from all out warfare to hostile encounters between individual units, targeted killings, and hostage rescue operations, to ask a complex question. How much authority does the power of precedent really have in the law of the use of force?
