Variable Generation, Flexible Demand Taylor & Francis

Named one of the most important nonfiction books of the 21st century by Entertainment Weekly, Slate, Chronicle of Higher Education, Literary Hub, Book Riot, and Zora A tenth-anniversary edition of the iconic bestseller—"one of the most influential books of the past 20 years," according to the Chronicle of Higher Education—with a new preface by the author "It is in no small part thanks to Alexander's account that civil rights organizations such as Black Lives Matter have focused so much of their energy on the criminal justice system." —Adam Shatz, London Review of Books Seldom does a book have the impact of Michelle Alexander's *The New Jim Crow*. Since it was first published in 2010, it has been cited in judicial decisions and has been adopted in campus-wide and community-wide reads; it helped inspire the creation of the Marshall Project and the new \$100 million Art for Justice Fund; it has been the winner of numerous prizes, including the prestigious NAACP Image Award; and it has spent nearly 250 weeks on the New York Times bestseller list. Most important of all, it has spawned a whole generation of criminal justice reform activists and organizations motivated by Michelle Alexander's unforgettable argument that "we have not ended racial caste in America; we have merely redesigned it." As the Birmingham News proclaimed, it is "undoubtedly the most important book published in this century about the U.S." Now, ten years after it was first published, The New Press is proud to issue a tenth-anniversary edition with a new preface by Michelle Alexander that discusses the impact the book has had and the state of the criminal justice reform movement today.

Routledge Handbook of Transnational Terrorism Edward Elgar Publishing

This handbook provides contributions by some of the world-leading experts in the field on recent phenomena and trends in transnational terrorism. Based on the methodological approach of a trend-and-key factor analysis of transnational terrorism and processed on the virtual platform "Foresight Strategy Cockpit" (FSC), the volume seeks to examine what potential future variants of transnational terrorism may evolve. Focusing on the latest structural developments in the sphere of politically or religiously motivated violence, the handbook considers the tactical, strategic, and not least the systemic dimension of terrorism. Divided into seven thematic sections, the handbook's contributions cover a wide range of issues, dealing among others with strategic and hybrid terrorism, the systemic dimension of extremist violence, prevalent actors, counter-narratives, the crime terror-nexus, the

role of digitalization and the spiral dynamic between Islamist and right-wing terrorism. The expert contributions provide a condensed overview of current developments, structural linkages and important academic debates centering around transnational salafi-jihadi terrorism, but also right-wing terrorism and counter-terrorism. A key objective of the work is to make the effects of prevention/preemption, (de-) radicalization and (non-) intervention both transparent and assessable. As such, it contributes well-founded strategies, feasible solutions and options for policy-makers and counter-terrorism experts. This volume will be of great interest to students of terrorism and counter-terrorism, political violence and security studies.

The Present and Future of Music Law The New Press

The very idea that the teachings can be mastered will arouse controversy within Buddhist circles. Even so, Ingram insists that enlightenment is an attainable goal, once our fanciful notions of it are stripped away, and we have learned to use meditation as a method for examining reality rather than an opportunity to wallow in self-absorbed mind-noise. Ingram sets out concisely the difference between concentration-based and insight (vipassana) meditation; he provides example practices; and most importantly he presents detailed maps of the states of mind we are likely to encounter, and the stages we must negotiate as we move through clearly-defined cycles of insight. Its easy to feel overawed, at first, by Ingram's assurance and ease in the higher levels of consciousness, but consistently he writes as a down-to-earth and compassionate guide, and to the practitioner willing to commit themselves this is a glittering gift of a book. In this new edition of the bestselling book, the author rearranges, revises and expands upon the original material, as well as adding new sections that bring further clarity to his ideas.

Designing Integrated Industrial Policies Volume II Routledge

Great is no longer good enough. Beyond Great delivers a powerful new playbook of 9 core strategies to thrive in a post-COVID world where all the rules of the game are being re-written. Beyond Great answers to two fundamental questions which face business leaders today in a world shaped by daunting and disruptive technological, economic, and social change. First, what is outstanding performance in this new volatile era? Second, how do we build competitive advantage in a world with new and often uncertain rules? Supported by years of research and hands-on consulting practice, this book presents a comprehensive framework for building a high performing, resilient, adaptive, and socially responsible global company. The book begins by taking an incisive look at these disruptive forces transforming globalization, including economic nationalism; the boom in data flows and digital commerce; the rise of China; heightened public concerns about capitalism and the

environment; and the emergence of borderless communities of digitally connected consumers. Distilled from the study of hundreds of companies and interviews with dozens of business leaders, the authors have distilled nine core strategies – the new winning playbook of the 21st century. Beyond Great argues that business leaders today must lead with a new kind of openness, flexibility and light-footedness, constantly layering in new strategies and operational norms atop existing ones to allow for "always-on" transformation. Leaders must master a whole new set of rules about what it takes to be "global," becoming shapeshifters adept at handling contradiction, multiplicity, and nuance. This book will show them how.

Finding Langston Taylor & Francis

This book brings together issues of social justice and the neglect of a sustainable orientation to the tourism workforce. This has resulted in an impoverished, unsustainable, and transient workforce that does not meet the aims of UN sustainable goals within the sector or indeed the UNTWO Code of ethics towards its employees. The introductory review and 15 chapters in this volume each make a unique and distinct contribution to knowledge. The opening review presents a critique of current definitions of sustainability in an employment, and specifically in a tourism employment context, acknowledging and critiquing extant literature. It uniquely recognises the themes submitted on the topic of sustainable work in the book, as well as those which comprise the final selection of chapters. These exercises culminate in the presentation of a refreshed conceptualisation of sustainable employment. The chapters were mapped onto a proposed conceptual framework, which recognises the multi-dimensional influences of the evolving Sustainable Development Goals (SDGs), recent Sustainable Human Resource Management (SHRM) and tourism literature, and fresh contributions to theory. Additionally, the introductory review offers concluding remarks that the authors hope will influence and guide future research endeavours. The book will be invaluable to educators, students and policymakers interested in information and guidance on managing sustainable tourism. Several chapters in this book were originally published as a special issue of the Journal of Sustainable Tourism.

The Argument of the Book of Job Unfolded Kluwer Law International B.V.

Tourism Through Troubled Times is an illuminating read for all scholars of Tourism Studies, Hospitality Management, and the Sociology of Tourism, as well as practitioners and managers within the hospitality sector, and gives clear insights into the industry's next steps forward.

A Star in the West, Or a Humble Attempt to Discover the Long Lost Ten Tribes of Israel, Preparatory to Their Return to Their Beloved City, Jerusalem (Classic Reprint) LIT Verlag Münster

Essays that address the question: how can people and class agency change this destructive course of history? Capitalism's addiction to fossil fuels is heating our planet at a pace and scale never before experienced. Extreme weather patterns, rising sea levels and accelerating feedback loops are a commonplace feature of our lives. The number of environmental refugees is increasing and several island states and low-lying countries are becoming vulnerable. Corporate-induced climate change has set us on an ecocidal path of species extinction. Governments and their international platforms such as the Paris Climate Agreement deliver too little, too late. Most states, including South Africa, continue on their carbon-intensive energy paths, with devastating results. Political

leaders across the world are failing to provide systemic solutions to the climate crisis. This is the context in which we must ask ourselves: how can people and class agency change this destructive course of history? Volume three in the Democratic Marxism series, *The Climate Crisis* investigates eco-socialist alternatives that are emerging. It presents the thinking of leading climate justice activists, campaigners and social movements advancing systemic alternatives and developing bottom-up, just transitions to sustain life. Through a combination of theoretical and empirical work, the authors collectively examine the challenges and opportunities inherent in the current moment. This volume builds on the class-struggle focus of Volume 2 by placing ecological issues at the centre of democratic Marxism. Most importantly, it explores ways to renew historical socialism with democratic, eco-socialist alternatives to meet current challenges in South Africa and the world.

An Introduction to Statistical Learning Routledge

Entrepreneurship is now unanimously considered a major engine for socio-economic development, mainly because it creates jobs and innovation. Governments around the world pay special attention to removing entrepreneurial barriers in order to support development via different policies, especially entrepreneurial finance. Developing, emerging and transition economies (DETEs) significantly differ from industrialized countries because of their specific conditions: institutions, infrastructure facilities, and bureaucratic procedures within the administrative system. Thus, firms and their entrepreneurs in and from DETEs may behave differently, particularly in terms of their financial strategies. Therefore, contextualizing is critical to better understand the relationship between entrepreneurial finance, innovation, and development in DETEs. This book provides a systematic and profound understanding of how finance, entrepreneurship, innovation, and their interactions contribute to economic development in DETEs, which cover a large number of countries in Asia, Central and Eastern Europe, Latin America, and Africa. The book mainly includes empirical studies and is divided into four parts. Part A includes four chapters which adopt a multinational approach to examine different sources and types of finance for entrepreneurship and small business in different groups of countries classified as DETEs. Part B also includes four chapters and focuses on entrepreneurial finance in specific countries belonging to the DETEs. Part C goes beyond the business scope of entrepreneurial finance and includes three chapters concerned with the relationship between finance, women's entrepreneurship, and poverty. Part D includes three chapters focusing on the comparison within developing countries as well as between developing and developed countries. This essential and comprehensive resource will find an audience amongst academics, students, educators, and practitioners, as well as policymakers and regulators.

The Oxford Handbook of Mobile Communication and Society Taylor & Francis

Oceans and Human Health: Opportunities and Impacts, Second Edition explores the inextricably interconnected and complex relationship between oceans and humans. Through the lens of the expanding oceans and human health meta-discipline, this work examines the many invaluable ecosystem services offered by oceans as well as the global anthropogenic impacts, and explores the associated risks and benefits to human health. Written and edited by an interdisciplinary team of experts, the book features international perspectives on the resources available to address these benefits and risks, including enhanced research, policy, and community engagement. The book concludes by examining the future of ocean stewardship and how global populations can unite to

nurture and promote our life-enhancing relationship with oceans. This is an indispensable resource for students, researchers, communities, and industry specialists in marine sciences, public health, and international policy. Addresses benefits, opportunities, risks, and impacts resulting from the relationship between oceans and humans, informed by more than 100 international authors Identifies and links necessary tools to relevant disciplines for action, and provides illustrative international case studies Covers scientific, socioeconomic, political, and ethical analyses behind the latest ocean and human health research Provides study questions and horizon scans at the end of each chapter to encourage individual thought and action, offering a resource for course instructors, students, and communities

The New Jim Crow Oxford University Press

This timely book provides a comprehensive overview of the activities of the major foreign forces active in contemporary Sub-Saharan Africa. Stimulated by the abundance of reports in the media criticizing China's presence in Sub-Saharan Africa, there is an analysis of China's involvement in the region compared to the largest Western players: the United States, the World Bank and the International Monetary Fund. China has only been economically active in Sub-Saharan Africa since the 1990s, while the United States, the World Bank and the International Monetary Fund have been active since the 1950s. Indeed, the World Bank has been the major lender for development during the whole period. The book explores how these foreign interests have assisted with, or hindered progress towards, addressing the challenges facing the region. These challenges include high rates of poverty and low levels of human development, loss of political and economic sovereignty, periodic sluggish economic development, government indebtedness, illegal financial flows and corruption, the resource curse, environmental destruction and climate change. The approach is interdisciplinary and emphasises the key development issues: social, economic and environmental sustainability. An audit approach is used to explore changes within China and the West since the 1950s and evaluate their impact on Sub-Saharan Africa. China versus the US, World Bank and IMF in Sub-Saharan Africa is an important reference for academics, researchers and students. It is also written in an accessible style that is suitable for the general reader.

Thoughts for Every-day Living from the Spoken and Written Words of Maltbie Davenport Babcock
Рипол Классик

This fourth edition of *Women in Mass Communication* addresses the myriad changes in media and mass communication disciplines in relation to women over the last five decades. This volume traces the history of diversity, equity, and inclusion for women in media, enabling greater understanding of global discourses and inequities, exploring transnational feminism, offering criticism of underlying structures, and calling for meaningful changes to media systems. With particular emphasis on educational and professional approaches to media communication, the book brings together a wide variety of specific topics and connects them through an intersectional feminist lens that values diversity, equity, and inclusion while exposing global systemic misogyny. The volume features 23 authors with a variety of backgrounds and perspectives from Australia, Germany, Ghana, Kenya, Korea, New Zealand, Saudi Arabia, United Arab Emirates, United Kingdom, and the United States. This fourth edition focuses on marginalization practices—race, ethnicity, LGBTQ+, social class, and in multiple societies—providing insight into identity and difference in a global context. An important

text for students and scholars examining gender in relation to mass communication, media studies, and journalism, as well as those exploring wider issues of diversity, equity, and inclusion within these disciplines.

Improving the availability and effectiveness of rural and “Micro” finance for small-scale irrigation in Sub-Saharan Africa PublicAffairs

This handbook provides an authoritative and up-to-date overview of Critical Autism Studies and explores the different kinds of knowledges and their articulations, similarities, and differences across cultural contexts and key tensions within this subdiscipline. Critical Autism Studies is a developing area occupying an exciting space of development within learning and teaching in higher education. It has a strong trajectory within the autistic academic and advocate community in resistance and response to the persistence of autism retaining an identity as a genetic disorder of the brain. Divided into four parts • Conceptualising autism • Autistic identity • Community and culture • Practice and comprising 24 newly commissioned chapters written by academics and activists, it explores areas of education, Critical Race Theory, domestic violence and abuse, sexuality, biopolitics, health, and social care practices. It will be of interest to all scholars and students of disability studies, sociology, anthropology, cultural studies, education, health, social care, and political science.

Entrepreneurial Finance, Innovation and Development Springer Nature

Globalization entails the world becoming a smaller place through political, socio-cultural and economic processes. These processes have salient implications for tourism, and tourism itself is one of the driving forces behind globalization. This book is a collection of conceptual treatises by international scholars about the dynamics and reach of globalization and its relationships with tourism. It anatomizes and deconstructs the global forces, processes and challenges that face the world of tourism. It is international in scope, encyclopedic in its conceptual depth, empirically evocative, and contemporary in its coverage.

Kensuke's Kingdom Taylor & Francis

This book provides a comprehensive treatment of the role of the private sector in accelerating the transition to a low-carbon, climate-resilient, and inclusive world. In the lead up to and since the historic Paris Agreement on climate change, more than 6,000 companies from 120 countries representing more than \$36.5 trillion in revenue have made climate commitments. Examining this trend, *The New Corporate Climate Leadership* provides a clear synthesis of the relationship between the real economy and climate change and offers a state-of-the-art assessment of corporate initiatives that focus on greenhouse gas emissions reductions and the management of climate risk through enhanced resilience. It debates the relative merits of incremental and sequenced ambition versus radical systems change – including a critique of the prevailing capitalist approach to climate change – and provides an actionable guide to skills development for change-makers in the shift toward a low-carbon world. Drawing on perspectives from leading thinkers inside the private sector, across government, and within civil society to truly interrogate the scale, scope, and speed of progress, this book provides a clear vision for what the next generation of corporate climate leadership should look like. Optimistic in tone, this book will be of great interest to students, scholars, and practitioners of climate change and sustainable business.

Beyond Great Bloomsbury Publishing USA

As well as being spatial, planning is necessarily also about the future – and yet time has been relatively neglected in the academic, practice and policy literature on planning. Time, in particular the need for longer-term thinking, is critical to responding effectively to a range of pressing societal challenges from climate change to an ageing population, poor urban health to sustainable economic development. This makes the relative neglect of time not only a matter of theoretical importance but also increasing practical and political significance. *A Future for Planning* is an accessible, wide-ranging book that considers how planning practice and policy have been constrained by short-termism, as well as by a familiar lack of spatial thinking in policy, in response to major social, economic and environmental challenges. It suggests that failures in planning often represent failures to anticipate and shape the future which go well beyond planning systems and practices; rather our failure to plan for the longer-term relates to wider issues in policy-making and governance. This book traces the rise and fall of long-term planning over the past 80 years or so, but also sets out how planning can take responsibility for twenty-first century challenges. It provides examples of successes and failures of longer-term planning from around the world. In short, the book argues that we need to put time back into planning, and develop forms of planning which serve to promote the sustainability and wellbeing of future generations.

Digital Innovation in Financial Services IGI Global

What is it like to be a woman in ministry in Ireland? Why do they do it and what are the joys, challenges, and everyday realities of this way of life? For the first time, female pastors, chaplains, spiritual guides, priests, religious sisters, youth ministers, and many more have been asked to tell their stories. These are brought together in the words of women across the Christian denominations and from the four corners of Ireland; in the voices of anonymous participants and those who have been ministry pioneers and leaders: Dr. Ruth Patterson, Dr. Heather Morris, Sr. Margaret Kiely, Ms. Soline Humbert, and Bishop Pat Storey. The result is an account of lives and ministries that are truly extraordinary and that present both a blessing and a prophetic challenge to the churches and communities in which they serve.

Data Localization Laws and Policy Elsevier

Nationwide, approximately 1,000 Community Action agencies advocate for the poor and provide diverse but critical services such as (but not limited to) emergency food and shelter, energy bill assistance, weatherization, education, job training, transportation, housing, and health services. In the face of dynamic environments and shifting poverty needs, Community Action agencies are constantly seeking innovative ways to effectively address poverty in their communities while building their internal capacity to ensure sustained impact and outcomes. This book focuses on the major leadership roles and responsibilities of the Community Action leaders, the types of challenges they face, and how they address those challenges, covering questions such as: How do Community Action leaders identify the needs of low-income people and use that knowledge to tailor programs to meet those needs? In what ways are low-income people involved in Community Action agencies (e.g. board or advisory council members, volunteers, employees, advocates)? What are the advantages and disadvantages associated with their participation? How do the leaders and their staff assess and demonstrate the effectiveness of their organizations and programs? What

challenges do they encounter in assessing and communicating performance? What approaches are Community Action leaders using to diversify their revenues? What are the advantages and challenges associated with those approaches? How are the leaders developing their staffs and preparing for leadership succession? How do the leaders benefit from an affiliation with state and national associations? Through original and comprehensive research undertaken by the Center for State Policy and Leadership at the University of Illinois Springfield and the Illinois Association of Community Action Agencies (IACAA), this book is designed to inform and enhance leadership in Community Action agencies and other nonprofit or government organizations with similar missions. It is written in a nontechnical manner and includes a chapter on the history and evolution of Community Action agencies for readers who are unfamiliar with Community Action and the War on Poverty. It will be required reading for professionals working at the frontlines of income inequality, as well as university professors and their students in the fields of public administration, nonprofit management, and social work.

Research Anthology on Combating Cyber-Aggression and Online Negativity Routledge

This book explores the complex, multifaceted and contested subject of risk in the film business. How risk is understood and managed has a substantial impact upon which films are financed, produced and seen. Founded on substantial original research accessing the highest level of industry practitioners, this book examines the intertwined activity of independents, large media companies including major studios, the international marketplace, and related audio-visual sectors such as high-end television. The book shows how risk is generally framed, or even intuited, rather than calculated, and that this process occurs across a sliding scale of formality. This work goes beyond broad creative industries characterisations of a "risky sector" and concentrations on Box Office return modelling, to provide a missing middle. This means a coherent analytic coverage of business organisation and project construction to address the complex practicalities that mobilise strategic operations in relation to risk, often in unseen business-to-business contexts. Informed by economic sociology's concepts addressing market assemblage and valuation, alongside applications of science and technology studies to media and communications, the book respects both the powerful roles of social and institutional actors, and affordances of new technologies in dealing with the persistent known unknown – the audience. Examining a persistent business issue in a new way, this book analyses top level industry practice through established mechanisms, and innovations like data analytics. The result is a book that will be essential reading for scholars with an interest in the film business as well as risk management more broadly.

A Sustainable Tourism Workforce Edward Elgar Publishing

Urban Systems Design: Creating Sustainable Smart Cities in the Internet of Things Era shows how to design, model and monitor smart communities using a distinctive IoT-based urban systems approach. Focusing on the essential dimensions that constitute smart communities energy, transport, urban form, and human comfort, this helpful guide explores how IoT-based sharing platforms can achieve greater community health and well-being based on relationship building, trust, and resilience. Uncovering the achievements of the most recent research on the potential of IoT and big data, this book shows how to identify, structure, measure and monitor multi-dimensional urban sustainability standards and progress. This thorough book demonstrates how to select a

project, which technologies are most cost-effective, and their cost-benefit considerations. The book also illustrates the financial, institutional, policy and technological needs for the successful transition to smart cities, and concludes by discussing both the conventional and innovative regulatory instruments needed for a fast and smooth transition to smart, sustainable communities. Provides operational case studies and best practices from cities throughout Europe, North America, Latin America, Asia, Australia, and Africa, providing instructive examples of the social, environmental, and economic aspects of “smartification Reviews assessment and urban sustainability certification systems such as LEED, BREEAM, and CASBEE, examining how each addresses smart technologies criteria Examines existing technologies for efficient energy management, including HEMS, BEMS,

energy harvesting, electric vehicles, smart grids, and more

Urban Systems Design Oxford University Press, USA

In the tradition of Octavia Butler, here is radical self-help, society-help, and planet-help to shape the futures we want. Change is constant. The world, our bodies, and our minds are in a constant state of flux. They are a stream of ever-mutating, emergent patterns. Rather than steel ourselves against such change, Emergent Strategy teaches us to map and assess the swirling structures and to read them as they happen, all the better to shape that which ultimately shapes us, personally and politically. A resolutely materialist spirituality based equally on science and science fiction: a wild feminist and afro-futurist ride! adrienne maree brown, co-editor of Octavia’s Brood: Science Fiction from Social Justice Movements, is a social justice facilitator, healer, and doula living in Detroit.
