Industry consolidation, mergers, changes to business models, the emergence of new threats all require managers to understand highly complex situations, assess risk and opportunity and make informed decisions. How can senior managers do this effectively when so often they are wrestling with brand new scenarios? One of the emerging solutions is business wargaming. Daniel F. Oriesek and Jan Oliver Schwarz provide the first comprehensive look at wargaming as a business tool in a book that explores the anatomy and success factors of a typical wargame. The authors explain how and when wargaming can be used to test strategies, plan and prepare for crises, manage change or increase your organization's ability to anticipate and adapt for the future. Creating imaginative and credible scenarios, and testing them against smart opponents who are eager to find holes and counter your strategy, allows you to learn about a plan or a new venture in the security of the conference room rather than learning the hard way when you go live. Business wargames are sophisticated but they are also very demanding in terms of time and resources. Business Wargaming: Securing Corporate Value will enable you to assess the potential value of the technique for your own organization, to understand what you will be committing to and develop an informed business case and brief for working with the organization that will facilitate the game.

The Calling of the Grave Ablaze Publishing

Bertolt Brecht's extraordinary historical novel presents an aspiring scholar's efforts to write an idealized life of Julius Caesar twenty years after his death. But the historian abandons his planned biography, confronted by a baffling range of contradictory views. Was Caesar an opportunist, a permanently bankrupt businessman who became too big for the banks to allow him to fail - as his former banker claims? Did he stumble into power while trying to make money, as suggested by the diary of his former slave? Across these different versions of Caesar's career in the political and economic life of Rome, Brecht wryly contrasts the narratives of imperial progress with the reality of grasping self-interest, in a sly allegory that points to the Weimar Republic and perhaps even to our own times. Brecht reminds his readers of the need for constant vigilance and critical suspicion towards the great figures of the past. In an echo of his dramatic theories, the audience is confronted with its own task of active interpretation rather than passive acceptance -- we have to work out our own views about Mr Julius Caesar. This edition is translated by Charles Osborne and features an

introduction and editorial notes by Anthony Phelan and Tom Kuhn.

Drawing on a wide range of films from the 1920s to the 1990s—from Keaton's *Our Hospitality* to *Casablanca* to *Terminator 2*, Kristin Thompson offers the first in-depth analysis of Hollywood's storytelling techniques and how they are used to make complex, easily comprehensible, entertaining films.

This remarkable book grew out of a conference headed by René Guénon, the sinologist René Grousset, and the neo-Thomist Jacques Maritain on questions raised by Ferdinand Ossendowski's thrilling account in his *Men, Beast and Gods* of an escape through Central Asia, during which he foils enemies and encounters shamans and Mongolian lamas, whose marvels he describes. The book caused a great sensation, especially the closing chapters, where Ossendowski recounts legends allegedly entrusted to him concerning the 'King of the World' and his subterranean kingdom Agarttha. The present book, one of Guénon's most controversial, was written in response to this conference and develops the theme of the King of the World from the point of view of traditional metaphysics. Chapters include: Western Ideas about Agarttha; Shekinah and Metatron; The Three Supreme Functions; Symbolism of the Grail; Melki-Tsedeq; Luz: Abode of Immortality; The Supreme Center concealed during the Kali-Yuga; and The Omphalos and Sacred Stones .

"Classical works have for us become covered with the glassy armor of familiarity," wrote Victor Shklovsky in 1914. Here Kristin Thompson "defamiliarizes" the reader with eleven different films. Developing the technique formulated in her *Eisenstein's Ivan the Terrible* (Princeton, 1981), she clearly demonstrates the flexibility of the neoformalist approach. She argues that critics often use cut-and-dried methods and choose films that easily fit those methods. Neoformalism, on the other hand, encourages the critic to deal with each film differently and to modify his or her analytical assumptions continually. Thompson's analyses are thus refreshingly varied and revealing, ranging from an ordinary Hollywood film, *Terror by Night*, to such masterpieces as *Late Spring* and *Lancelot du Lac*. She proposes a formal historical way of dealing with realism, using *Bicycle Thieves* and *The Rules of the Game* as examples. *Stage Fright* and *Laura* provide cases in which the classical cinema defamiliarizes its own conventions by playing with audience expectations. Other chapters deal with Tati's *Les Vacances de Monsieur Hulot* and *Play Time* and Godard's *Tout va bien* and *Sauve qui peut (la vie)*. Although neoformalist analysis is a rigorous, distinctive approach, it avoids extensive specialized vocabulary and esoteric concepts: the essays here can be read separately by those interested in the individual films. The book's overall purpose, however, goes beyond making these particular films more accessible and intriguing to propose new ways of looking at cinema as a whole.

Storytelling in the New Hollywood Routledge

'A dense, challenging and important book.' Philip French Observer 'At the very least, this blockbuster is probably the best single volume history of Hollywood we're likely to get for a very long time.' Paul Kerr City Limits 'Persuasively argued, the book is also packed with facts, figures and photographs.' Nigel Andrews Financial Times Acclaimed for their breakthrough approach, Bordwell, Staiger and Thompson analyze the basic conditions of American film-making as a historical institution and consider to what extent Hollywood film production constitutes a systematic enterprise, in both its style and its business operations. Despite differences of director, genre or studio, most Hollywood films operate within a set of shared assumptions about how a film should look and sound. Such assumptions are neither natural nor inevitable; but because classical-style films have been the type most widely seen, they have come to be accepted as the 'norm' of film-making and viewing. The authors show how these classical conventions were formulated and standardized, and how they responded to the arrival of sound, colour, widescreen ratios and stereophonic sound. They argue that each new technological development has served a function within an existing narrational system. The authors also examine how the Hollywood cinema standardized the film-making process itself. They describe how, over the course of its history, Hollywood developed distinct modes of production in a constant search for maximum efficiency, predictability and novelty. Set apart by its combination of theoretical analysis and empirical evidence, this book is the standard work on the classical Hollywood cinema style of film-making from the silent era to the 1960s. Now available in paperback, it is a 'must' for film students, lecturers and all those seriously interested in the development of the film industry.

The Emergent Manager examines the process of becoming a manager within organizations and considers how people relate the ways in which they 'manage' their lives to their development as managers in the workplace. At the heart of the book is the idea of the individual engaged in a continual process of 'becoming'. Focusing on the reported experiences of managers, the book is richly illustrated throughout with examples drawn from a variety of workplaces, including the civil service, academia, the retail industry, construction and engineering, banking and the prison service. Tony Watson and Pauline Harris together provide a new understanding of the nature of the management role and the ways in which people make sense of their lives as managers. Accessible and innovative, this book will be of interest to students and academics in management and organization studies as well as practising managers.
