**Families** Lincoln Children's Books

What is a family? Once, it was said to be a father, mother, boy, girl, cat and dog living in a house with a garden. But as times have changed, families have changed too, and now there are almost as many kinds of families as colours of the rainbow - from a mum and dad or single parent to two mums or two dads, from a mixed-race family to children with different mums and dads, to families with a disabled member. Mary Hoffman takes a look through children's eyes at the wide varieties of family life: from homes, food, ways of celebrating, schools and holidays to getting around, jobs and housework, from extended families, languages and hobbies to pets and family trees - and she concludes that, for most people, their own family is the best one of all! With Ros Asquith's delightful pictures, this book takes a fresh, optimistic look at families of today.

*Writing the Big Book* QED Publishing

Concepts embody our knowledge of the kinds of things there are in the world. Tying our past experiences to our present interactions with the environment, they enable us to recognize and understand new objects and events. Concepts are also relevant to understanding domains such as social situations, personality types, and even artistic styles. Yet like other phenomenologically simple cognitive processes such as walking or understanding speech, concept formation and use are maddeningly complex. Research since the 1970s and the decline of the "classical view" of concepts

have greatly illuminated the psychology of concepts. But persistent theoretical disputes have sometimes obscured this progress. The Big Book of Concepts goes beyond those disputes to reveal the advances that have been made, focusing on the major empirical discoveries. By reviewing and evaluating research on diverse topics such as category learning, word meaning, conceptual development in infants and children, and the basic level of categorization, the book develops a much broader range of criteria than is usual for evaluating theories of concepts.

*The Great Big Book of Amazing Me* Hyperion Books for Children

Which wars killed the most people? Was the twentieth century the most violent in history? Are religions, tyrants or ideologies responsible for the greatest bloodshed? In this remarkable and original book, 'atrocitologist' Matthew White assesses man's inhumanity to man over several thousand years. From the Punic Wars between Rome and Carthage to the cataclysmic events of World War II, Atrocitology spans centuries and civilisations as it measures the hundred most violent episodes in history. Relying on statistical analysis rather than grand theories, White offers three big lessons: chaos is more deadly than tyranny, the world is much more disorganised than we realise, and more civilians than soldiers are killed in wars—in fact, the army is usually the safest place to be during wartime. Our understanding of history's worst atrocities is patchy and skewed. This book sets the record straight, charting those events with the largest man-made death tolls without fear or favour.

**The Great Big Book of Bedtime Stories and Rhyme** Welcome Books

The definitive history of writing and producing the "Big Book" of Alcoholics Anonymous, told through extensive access to the group's archives. Alcoholics Anonymous is arguably the most significant self-help book published in the twentieth century. Released in 1939, the "Big Book," as it's commonly

known, has sold an estimated 37 million copies, been translated into seventy languages, and spawned numerous recovery communities around the world while remaining a vibrant plan for recovery from addiction in all its forms for millions of people. While there are many books about A.A. history, most rely on anecdotal stories told well after the fact by Bill Wilson and other early members—accounts that have proved to be woefully inaccurate at times. Writing the Big Book brings exhaustive research, academic discipline, and informed insight to the subject not seen since Ernest Kurtz's *Not-God*, published forty years ago. Focusing primarily on the eighteen months from October 1937, when a book was first proposed, and April 1939 when *Alcoholics Anonymous* was published, Schaberg's history is based on eleven years of research into the wealth of 1930s documents currently preserved in several A.A. archives. Woven together into an exciting narrative, these real-time documents tell an almost week-by-week story of how the book was created, providing more than a few unexpected turns and surprising departures from the hallowed stories that have been so widely circulated about early A.A. history. Fast-paced, engaging, and contrary, *Writing the Big Book* presents a vivid picture of how early A.A. operated and grew and reveals many previously unreported details about the colorful cast of characters who were responsible for making that group so successful.
