and relevant.

Acta societatis zoologicae bohemoslovenicae Andesite Press

Brief text and illustrations introduce over three hundred animals, from aardvark to zebu.

Bulletin de la Société impériale zoologique d'acclimatation Elsevier

Retrouvez plus de 350 animaux à plumes, à poils ou à écailles, bien rangés selon des associations inattendues : les noirs et blancs, les animaux qui vivent près de l'homme, ceux qui ont des cornes, les géants et les minuscules... Suivez l'inclassable petit caméléon au fil des pages, qui vous guidera pour découvrir des animaux connus ou rares qui font toute la diversité de la zoologie ! À la fin de l'ouvrage, un index nous livre les secrets de ces petites et grosses bêtes. Un magnifique bestiaire "intelligent" dans un ouvrage au format géant, pour guider les premiers apprentissages !

The National Union Catalog, Pre-1956 Imprints Seuil Jeunesse

Les 200 animaux de Mini Zoo logique vivent : Dans l'eau douce, Dans les arbres, Dans la mer, Sous la terre, Sur le sable, au fond de l'eau, Dans la nuit. Au fil de ces pages, suivez l'inclassable caméléon qui vous guidera pour découvrir des bêtes, petites ou grandes, connues ou rares, qui font toute la diversité de la zoologie !

Bulletin de la Société impériale zoologique d'acclimatation Seuil Jeunesse

Primate Conservation provides a comprehensive discussion of the conservation of many species of nonhuman primates. The problems of conservation are discussed by distinguished scientists who are experts in their knowledge of the animals they write about and who have firsthand knowledge of the problems of conserving them. Animals ranging from Galago to the Gorilla have been selected to serve as examples of the types of problems that conservationists face. The book begins by discussing the ecology of two species of galagine in South Africa. It covers factors such as their distribution, habitat, population densities, activity patterns, feeding, group structure, and reproduction. This is followed by separate chapters on the conservation of the following: aye-aye; the lion tamarins of Brazil; the Peruvian yellow-tailed woolly monkey; the toque macaque of Sri Lanka; rare lion-tailed monkey of South India; rhesus monkeys in Northern India; the gelada baboons; the hanuman langur and douc langur; red ouakaris; black colobus monkeys; lesser apes; and eastern gorillas.

Travaux de la Station zoologique de Villefranche-sur-Mer Univ of California Press

This unique and timely publication is the first such Catalog to be produced in over 100 years. The

last full survey of the taxonomy of the world fauna of the Order Scorpiones was by Karl Kraepelin in 1899 - *Scorpiones und Pedipalpi*. Das Tierreich. Herausgegeben von der Deutschen Zoologischen Gesellschaft. Berlin. Since then, the sheer number of known species and subspecies has increased more than fourfold, and the classification of scorpions has been greatly transformed at both the generic and familial levels. This new Catalog brings together under one cover an enormous amount of difficult-to-locate information on scorpion nomenclature, biogeography, distribution and phylogeny, published before and after Kraepelin's time. It is of special interest because of the unique status that scorpions currently enjoy as models for the study of evolutionary biology, ecology, toxicology, and physiology. The Catalog is much more than a checklist - it is an annotated, organized compendium of the status of the entire field of Scorpion Taxonomy at the beginning of the New Millennium, by authoritative and critical researchers working in the field. The authors have coordinated and collaborated extensively to make this a fully integrated work. The utility of the Catalog is enormously enhanced by the inclusion of much greater detail than other animal catalogs,

including type data, tracing of full synonymies of all names, clarification or critical discussion of known nomenclatural problems, comprehensive cross index, and notes on biogeography and phylogeny.
