### DECKER JAMIYA

Board of Trade Journal of Tariff and Trade Notices and Miscellaneous Commercial Information BRILL

Winner of an Outstanding Academic Title Award from CHOICE Magazine Encyclopedia of Environmental Management gives a comprehensive overview of environmental problems, their sources, their assessment, and their solutions. Through in-depth entries and a topical table of contents, readers will quickly find answers to questions about specific pollution and management issues. Edited by the esteemed Sven Erik Jørgensen and an advisory board of renowned specialists, this four-volume set shares insights from more than 500 contributors—all experts in their fields. The encyclopedia provides basic knowledge for an integrated and ecologically sound management system. Nearly 400 alphabetical entries cover everything from air, soil, and water pollution to agriculture, energy, global pollution, toxic substances, and general pollution problems. Using a topical table of contents, readers can also search for entries according to the type of problem and the methodology. This allows readers to see the overall picture at a glance and find answers to the core questions: What is the pollution problem, and what are its sources? What is the "big picture," or what background knowledge do we need? How can we diagnose the problem, both qualitatively and quantitatively, using monitoring and ecological models, indicators, and services? How can we solve the problem with environmental technology, ecotechnology, cleaner technology, and environmental legislation? How do we address the problem as part of an integrated management strategy? This accessible encyclopedia examines the entire spectrum of tools available for environmental management. An indispensable resource, it guides environmental managers to find the best possible solutions to the myriad pollution problems they face. Also Available Online This Taylor & Francis encyclopedia is also available through online subscription, offering a variety of extra benefits for researchers, students, and librarians, including: Citation tracking and alerts Active reference linking Saved searches and marked lists HTML and PDF format options Contact us to inquire about subscription options and print/online combination packages. **What Kind of Democracy?** International Monetary Fund

Gathers seventy traditional recipes from Romania, Bulgaria, and the Balkan peninsula.

**The Official Index to The Times** Rowman & Littlefield

The robust cuisines of Germany, Austria, Hungary and the Czech Republic have all proved enduringly popular and have extended beyond Europe with migrations to North America, Canada and beyond. Pork, beef, tomatoes and spices, particularly paprika, are the basis of many of the region's classic dishes, among them Pork Stew with Sauerkraut and Hungarian Goulash. Beef Stroganov is, of course, renowned, but perhaps it is the cakes and pastries that are the most famous culinary feature - such as Stollen, Lebkuchen and Plum Dumplings. With each recipe tested and adapted to suit every cook and any type of kitchen, this evocative and inspirational cookbook will delight all those who wish to explore or discover the delicious traditional cooking of Germany.

The New International Year Book Infobase Publishing

OECD Regions at a Glance presents a series of regional indicators for OECD countries comparing regional performance in such areas as economic growth, productivity, industry specialisation, education, health, safety, commuting times, etc.

The Dutch Diaspora OECD Publishing

The Dutch Diaspora is a comprehensive and personal study of the former colonial empire of the Netherlands. The Netherlands is considered one of the most successful societies and at one point was the world's largest empire stretching from Japan to the United States. The author, Howard Wiarda, who grew up in western Michigan and is himself of Dutch descent, combines thorough scholarship with first-hand experience of travels to the far-flung former colonies. The study analyzes how colonies reacted to the ideological beliefs implanted by the Dutch settlers and how those colonies evolved in terms of cultural, religious, and political beliefs. For example, the Dutch in the seventeenth century brought Calvinism to South Africa and entrepreneurialism to New Amsterdam and Curaçao and in the nineteenth century supported slave plantation systems in Indonesia and Suriname, but as time passed the evolution of the colonies was telling. The United States outgrew Great Britain in wealth and power, but while Calvinism declined in the Netherlands it remained vibrant and progressive in the American Midwest. In many ways, the former colonies adapted to modernization better than the mother country. The Dutch Diaspora is an insightful and accessible study of colonialism useful to upper-level undergraduates and all students and researchers of Dutch history.

Austria-Hungary & the Successor States Routledge

Presents a short history of Austria, Hungary, Czechoslovakia, and Yugoslavia from the Renaissance to the present followed by an A to Z dictionary of important people, a chronology, maps, and more.

*Board of Trade Journal and Commercial Gazette* Taylor & Francis

Conference proceedings - Multidisciplinary Academic Conference on Economics, Management and Marketing in Prague 2014 (MAC-EMM 2014)

*OECD Regions at a Glance 2005* OECD Publishing

The broad expansion of non-electoral political participation is considered one of the major changes in the nature of democratic citizenship in the 21st century. Most scholars - but also governments, transnational and subnational political institutions, and various foundations - have adopted the notion that contemporary democratic societies need a more politically active citizenry. Yet, contemporary democracies widely differ in the extent to which their citizens get involved in politics beyond voting. Why is political activism other than voting flourishing in the United States, but is less common in Britain and almost non-existent in post-communist countries like Bulgaria? The book shows that the answer does not lie in citizen's predispositions, social capital or institutions of consensual democracy. Instead, the key to understanding cross-country differences in political activism beyond voting rests in democratic structures that combine inclusiveness and contestation. What Kind of Democracy? is the first book to provide a theoretically driven empirical analysis of how different types of democratic arrangements affect individual participation in non-electoral politics.

*Economic and Financial Crime* Oxford University Press

This is a major new contribution to the historiography of the First World War. It examines the lively battle of ideas which helped to destroy Austria-Hungary. It also assesses, for the first time, the weapon of 'front propaganda' as used by and against the Empire on the Italian and Eastern Fronts. Based on material in eight languages, the work challenges accepted views about Britain's primacy in the field of propaganda, while casting fresh light on the creation of Yugoslavia and the viability of the Habsburg Empire in its last years.

Encyclopedia of Environmental Management, Four Volume Set Lexington Books

Following a strong showing in early 2011, the economies across Europe now face the prospect of a pronounced slowdown, as global growth has softened, risk aversion has risen, and strains in Europe's sovereign debt and financial markets have deepened, according to this issue of the Regional Economic Outlook for Europe. Downside risks are significant, and a further deepening of the euro area crisis would affect not only advanced Europe, but also emerging Europe, given its tight economic and financial ties. The policy stance in advanced Europe will need to be adapted to reflect the weakening and tense outlook, financial systems strengthened further, and a consistent, cohesive and cooperative approach to monetary union adopted by all euro area stakeholders. The cross-country experience in the past decade in Europe shows the difference that good policies can make in boosting growth, with some European countries having grown rapidly while others have stagnated. Escaping low-growth traps, through broad-based reforms that address macroeconomic imbalances and country-specific structural rigidities, is possible.

*Handbook of child psychology* Springer Nature

Health at a Glance provides a comprehensive set of indicators on population health and health system performance across OECD members and key emerging economies. This edition has a special focus on the health impact of COVID-19 in OECD countries, including deaths and illness caused by the virus, adverse effects on access and quality of care, and the growing burden of mental ill-health.

Crisis and Renewal Hermes House

Artisans played a central role in the European town as it developed from the Middle Ages onwards. Their workshops were at the heart of productive activity, their guilds were often central to the political and legal order of towns, and their culture helped shape civic ritual and the urban order. These essays, which have all been specially written for this collection, explore the relationships between artisans and their towns across Europe between the beginning of the early-modern period and the end of the 19th century. They pay special attention to the processes of economic, juridical and political change that have made the 18th and early 19th centuries a period of such significance. Written by leading historians of European artisans, the essays question the myths about artisans that have long pervaded research in the field. The leading myth was that shared by the artisans themselves - the myth of decline and the belief in each generation that artisans in the past had inhabited a better age. These essays open up for debate the nature of artisanship, the way economic change affected craft production, the political role of artisans, the cultural identification of the artisans with work and masculinity, and the way changing urban society and changing urban structure posed threats to which the artisans had to respond.

**The Armies of Austria-Hungary and Germany, 1740-1914** CRC Press

This book deals with the widespread economic and financial crime issues of corruption, the shadow economy and money laundering. It investigates both the theoretical and practical aspects of these crimes, identifying their effects on economic, social and political life. This book presents these causes and effects with a state of the art review and with recent empirical research. It compares the international and transnational aspects of these economic and financial crimes through discussion and critical analysis. This volume will be of interest to researchers and policy makers working to study and prevent economic and financial crime, white collar crime, and organized crime.

The Economist MAC Prague consulting

Presents a unique set of detailed and internationally comparable tax data in a common format for all OECD countries from 1965 onwards.

*Mitteleuropa* Springer Science & Business Media

This book is part of a 4 volume set that reflects current understanding of child psychology. Focusing on the concerns of a new century and now in its 6th edition the series is the definitive child psychologist's guide and reference work.

Weekly Weather and Crop Bulletin OECD Publishing

Despite potentially tremendous benefits, small and medium-sized enterprises (SMEs) lag in the digital transformation. Emerging technologies, as diverse as they are, offer a range of applications for them to improve performance and overcome the size-related limitations they face in doing business. However, SMEs must be better prepared, and stakes are high. SMEs make the most of the industrial fabric in many countries and regions, they create jobs (most jobs sometimes) and are the cement of inclusive and sustainable societies.

*Czechoslovakia Before Munich* CUP Archive

'Markedness' is a central notion in linguistic theory. This book is the first to provide a comprehensive survey of markedness relations across various grammatical categories, in a sample of closely-related speech varieties. It is based on a sample of over 100 dialects of Romani, collected and processed via the Romani Morpho-Syntax (RMS) Database - a comparative grammatical outline in electronic form, constructed by the authors between 2000-2004. Romani dialects provide an exciting sample of language change phenomena: they are oral languages, which have been separated and dispersed from some six centuries, and are strongly shaped by the influence of diverse contact languages. The book takes a typological approach to markedness, viewing it as a hierarchy among values that is conditioned by conceptual and cognitive universals. But it introduces a functional-pragmatic notion of markedness, as a grammaticalised strategy employed in order to prioritise information. In what is referred to as 'dynamic', such prioritisation is influenced by an interplay of factors: the values within a category and the conceptual notions that they

represent, the grammatical structure onto which the category values are mapped, and the kind of strategy that is applied in order to prioritise certain value. Consequently, the book contains a thorough survey of some 20 categories (e.g Person, Number, Gender, and so on) and their formal representation in various grammatical structures across the sample. The various accepted criteria for markedness (e.g. Complexity, Differentiation, Erosion, and so on) are examined systematically in relation to the values of each and every category, for each relevant structure. The outcome is a novel picture of how different markedness criteria may cluster for certain categories, giving a concrete reality to the hitherto rather vague notion of markedness. Borrowing and its relation to markedness is also examined, offering new insights into the motivations behind contact-induced change.

*Innovation and Entrepreneurship in Forestry in Central Europe* Walter de Gruyter

This text explores the ways in which the European Union frames and conducts its international relations. Each chapter deals with the three key themes of the volume - the EU as a sub-system of international relations, the EU and the processes of international relations, and the EU as a power.

*Austria-Hungary: History of Austria. History of Hungary. Foreign policy of Austria-Hungary. Bohemia and Moravia. Slovakia. Austrian Silesia. Bukovina. Transylvania and the Banat. Hungarian Ruthenia* Springer

Over 70 traditional recipes from these rich historic cuisines, all shown in easy to follow step-by step pictures.

*Document on German Foreign Policy, 1918-1945* BRILL

Why have Central European countries, praised as democratization success stories, taken an illiberal turn in the past decade? This volume explores the values and attitudes responsible in the aftermath of the financial and migration crisis.
