 The primary

purpose of the Manual of Classification of Motor Vehicle Traffic Accidents is to

promote uniformity and comparability of motor vehicle traffic accident statistics now being developed in Federal, state and local jurisdictions. This manual is divided into two sections, one containing definitions and one containing classification instructions.

Hypersonic Aerodynamics and Heat Transfer

CreateSpace Rifts and passive margins are extremely important for the petroleum industry, as

they are areas of high sedimentation and can contain significant oil and gas resources.

This book provides a comprehensive understanding of rifts and passive margins as a whole. It synthesises in one volume the existing information devoted to specific aspects of these vitally important hydrocarbon habitats. This collection of state-of-the-art information on

the topic facilitates the better use of this knowledge to assess the risks of exploring and operating in these settings and the development of systematic and predictive hydrocarbon screening tools. The book will be invaluable for a broad range of readers, from advanced geology students and researchers to exploration geoscientists to exploration managers exploring for and

developing hydrocarbon resources in analogous settings.

MASTER,
MICHAEL
WOLFF'S
JOURNEY
BEGINS WITH
PURE GRIT
AND ENDS IN
PERFECT
VICTORY.

Award winning jazz musician Michael Wolff's journey nearly ended six years ago at Mount Sinai Beth Israel Hospital in lower Manhattan. After being worked on by

doctors and nurses for most of the night, Wolff, with the perfect timing only a world class musician would have, regained consciousness just in time to hear one of the doctors ask his wife if he had a DNR. Before she could even ask what that was, Wolff used his last ounce of energy to gasp, "Resuscitate me!" After being treated for the wrong cancer for a year and a half, it was discovered

that Wolff had an ultra-rare, untreatable cancer called histiocytic sarcoma and had three months to live. Fortunately, he was someone accustomed to surviving the odds. Wolff had already survived a painful childhood overshadowed by Tourette's Syndrome, where his brilliance as a jazz pianist and passion for music saw him through. He went on the road at nineteen, not only

performing with some of the great luminaries of Jazz, but also conducting over twenty-five symphony orchestras worldwide. In 1989, Wolff was chosen to be the musical director of Arsenio Hall's groundbreaking late-night talk show, which was extravagantly praised for its diversity of musical guests and brilliant house band. It was through The Arsenio Hall show that Wolff became a household name and

where he met and eventually married Actor/Writer/Director Polly Draper when she was a guest on the show. (Their two sons, Nat and Alex Wolff are now highly successful actors and musicians in their own right, so the talent was passed on to the next generation.) In the meantime, Wolff has released twenty-one albums to critical and popular acclaim, written award-winning scores to

movies and television series and has managed to beat an untreatable cancer. His compelling story begins with his fish out-of-water story in the segregated South, then moves to politically turbulent Berkley, California in the early sixties and then it takes him around the world as he earns his stripes as a world class Jazz musician. On That Note is more than a memoir. It is like a Jazz

score with words, taking the reader on the wild journey of Wolff's singular life. It is a life driven by a passion for music and a passion for being alive. Sometimes hilarious and sometimes harrowing, Wolff's story instantly sweeps us up with it and charms us with a unique voice. Many books claim to be "page turners." This one actually delivers. **Against Automobility**

In the international

bestseller *The Power of Habit*, Pulitzer Prize-winning journalist Charles Duhigg explained why we do what we do. In *Smarter Faster Better*, he applies the same relentless curiosity, rigorous reporting and rich storytelling to explain how we can get better at the things we do. The result is a groundbreaking exploration of the science of productivity. A group of data scientists at

Google embark on a four-year study of how the best teams function, and find that how a group interacts is much more important than who is in the group. A Marine Corps general, faced with low morale among recruits, reimagines boot camp - and discovers that instilling a 'bias toward action' can turn even the most directionless teenagers into self-motivating achievers. The

filmmakers behind Disney's Frozen are on the brink of catastrophe - until they shake up their team in just the right way, spurring a creative breakthrough that leads to one of the highest-grossing movies of all time. What do these people have in common? They know that productivity relies on making certain choices. The way we frame our daily decisions; the

big ambitions we embrace and the easy goals we ignore; the cultures we establish as leaders to drive innovation: these are the things that separate the merely busy from the genuinely productive. At the core of Smarter Faster Better are eight key concepts - from motivation and goal-setting to focus and decision-making - that explain why some people and

companies get so much done. Drawing on the latest findings in neuroscience, psychology and behavioural economics - as well as the experiences of CEOs, educational reformers, four-star generals, airplane pilots and Broadway songwriters - this painstakingly researched book explains that the most productive people, companies and organizations don't merely

act differently. They view the world, and their choices, in profoundly different ways.

The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven

by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant

powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies -

how will they work, and will some technologies be more effective than others? Written to inform The United States Department of Transportation's National Highway Traffic Safety Administration (NHTSA) and Environmental Protection Agency (EPA) Corporate Average Fuel Economy (CAFE) and greenhouse gas (GHG) emission standards, this new report from the National Research Council is a technical evaluation of costs, benefits, and implementation issues of fuel reduction technologies for next-generation light-duty vehicles. Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles estimates the cost, potential efficiency improvements, and barriers to commercial deployment of technologies that might be employed from 2020 to 2030. This report describes these promising technologies and makes recommendations for their inclusion on the list of technologies applicable for the 2017-2025 CAFE standards. In a bold bid to enter the prestigious luxury car market, Toyota launched its Lexus marque in 1989 with the LS400. Impeccable attention to detail, advanced engineering, sourcing of first quality

materials from around the world and meticulous build quality ensured that cars wearing the Lexus badge could compete directly with the established products of Mercedes-Benz, BMW and Jaguar. Motoring journalists around the world were quick to confirm the inherent quality of the Lexus, allowing the new marque to become established amazingly quickly and to

make serious inroads into the sales territories of other prestige brands. This book covers the complete year-by-year development of the Lexus line, including the equivalent models in Japan. Written by an acknowledged Toyota expert with the full co-operation of the company and its many subsidiaries worldwide, this is the definitive history of the marque.

Redwood Publishing, LLC
The most researched, documented, and comprehensive manifesto

on experiential marketing. As customers take control over what, when, why, and how they buy products and services, brands face the complete breakdown and utter failure of passive marketing strategies designed more than a half-century ago. To connect with a new generation of customers, companies must embrace and deploy a new marketing mix, powered

by a more effective discipline: experiences. Experiential marketing, the use of live, face-to-face engagements to connect with audiences, create relationships and drive brand affinity, has become the fastest-growing form of marketing in the world as the very companies that built their brands on the old Madison Avenue approach—including Coca-Cola, Nike, Microsoft, American

Express and others—open the next chapter of marketing. . . as experiential brands. Using hundreds of case studies, exclusive research, and interviews with more than 150 global brands spanning a decade, global experiential marketing experts Kerry Smith and Dan Hanover present the most in-depth book ever written on how companies are using experiences as the anchor of reinvented marketing mixes. You'll learn: The history and fundamental principles of experiential marketing How top brands have reset marketing mixes as experience-driven portfolios The anatomy of a brand experience The psychology of engagement and experience design The 10 habits of highly experiential brands How to measure the impact of experiential marketing marketing How to combine digital and social media in an experiential strategy The experiential marketing vocabulary How to begin converting to experiential marketing Marketers still torn between outdated marketing models and the need to reinvent how they market in today's customer-controlled economy will find the clarity they need to refine their marketing strategies, get

a roadmap for putting their brands on a winning path, and walk away inspired to transition into experiential brands.
