A comprehensive history of fraud in America, from the early nineteenth century to the subprime mortgage crisis In America, fraud has always been a key feature of business, and the national worship of entrepreneurial freedom complicates the task of distinguishing salesmanship from deceit. In this sweeping narrative, Edward Balleisen traces the history of fraud in America—and the evolving efforts to combat it—from the age of

P. T. Barnum through the eras of Charles Ponzi and Bernie Madoff. This unprecedented account describes the slow, piecemeal construction of modern institutions to protect consumers and investors—from the Gilded Age through the New Deal and the Great Society. It concludes with the more recent era of deregulation, which has brought with it a spate of costly frauds, including corporate accounting scandals and the mortgage-marketing debacle. By tracing how Americans have struggled to foster a vibrant economy without encouraging a corrosive level of cheating, *Fraud* reminds us that American capitalism rests on an uneasy foundation of social trust.

Governing in a Global World captures the panorama of women governing around the world. Even though the modern era marks history's greatest advancements for women, worldwide they hold fewer than 30 percent of decision-making positions and are often missing from negotiating tables where policies are made and conflicts resolved. The opening chapters present trends and context for studying women in public service by focusing on path-setters across the globe, the status of women in the world's executive and legislative bodies, and their participation in public service across several nations. Later chapters examine power,

leadership and representation of women in public service, with several chapters looking at women governing from a regional perspective in the Middle East, Sub Sahara Africa, Latin America, and China. The final chapter presents empirical evidence that shows how policies to increase women's representation in the public arena reduce gender inequality more than any other policy intervention. Taken together, the chapters illustrate the worldwide importance of, and challenges to, promoting gender equality and women governing.

Queer premises provide vital social and cultural infrastructure – a queer infrastructure – connecting different generations and locations, facilitating the movement of resources, across and beyond the city. Queer Premises offers evidence for how London's diverse LGBTQ+ populations have embedded themselves into urban space, systems and resources. It sets out to understand how, across their different material dimensions, bars, cafés, nightclubs, pubs, community centres, and hybrids of these typologies, have been imagined, created and sustained. From the 1980s to the present, Campkin asks how, where, and why these venues have been established, how they operate and the purposes they serve, what challenges they face and why they close down.

This book analytically reviews the impact of the global anti-money laundering and counter-terrorist financing (AML/CFT) framework on the compliance trajectory of a number of jurisdictions to this framework. The work begins by examining the international financial sector reform and its evolution to inculcate the global framework for AML/CFT regulations. It challenges the resulting uniform AML/CFT due to its paradoxical impact on the compliance trajectory of African countries and emerging economies (ACs/EEs). This is done through an examination of the pre-conditions for effective regulation and compliance drivers for ACs/EEs that reveals the behavioural impact of the AML/CFT standards on the bloc of countries. Through the application of agency theory, it explores the relationship between ACs/EEs on the one hand and the international financial institutions that formulate, disseminate and facilitate compliance with the global framework for AML/CFT standards on the other. The remaining chapters review empirically the compliance pressures and resulting compliance trajectory of ACs/EEs with the AML/CFT standards. The final part of the book provides a detailed explanation of the compliance challenges of ACs/EEs and the legitimacy concerns that facilitate this. This book offers a new direction on the impact of global AML/CFT standards on ACs/EEs and contributes to the understanding of the conditions under which the global standards are likely to facilitate proactive compliance within these blocs of countries. As such it will be a valuable resource for academics, researchers and policy-makers working in this area.

In *Hacking Happiness*, futurist and contributing Mashable writer John C. Havens introduces you to your “quantified self”—your digital identity represented by gigabytes of data produced from tracking your activities on your smartphone and computer. Harvested by megacorporations such as Google, Facebook, and Amazon, Havens argues that companies gather this data because of its immense economic value, encouraging a culture of “sharing” as they hoard the information based on our lives for

private monetary gain. But there's an alternative to this digital dystopia. Emerging technologies will help us reclaim this valuable data for ourselves, so we can directly profit from the insights linked to our quantified selves. At the same time, sensors in smartphones and wearable devices will help us track our emotions to improve our well-being based on the science of positive psychology. Havens proposes that these trends will lead to new economic policies that redefine the meaning of “wealth,” allowing governments to create policy focused on purpose rather than productivity. An issues book highlighting the benefits of an examined life in the digital world, this timely work takes the trepidation out of the technological renaissance and illustrates how the fruits of the Information Age can improve our lives for a happier humanity.
