national industries (Germany and Austria), and a myriad of styles and production methods. Paradoxically, the political disruptions that have produced these distinct film eras, as well as the natural inclination of artists to rebel and create new styles, allow for the construction of a narrative of German film. While the disjuncture generates distinct points of separation, it also highlights

continuities between the ruptures. Outlining the richness of German film, *The A to Z of German Cinema* covers mainstream, alternative, and experimental film from 1895 to the present through a chronology, introductory essay, appendix of the 100 most significant German films, a bibliography, and hundreds of cross-referenced dictionary entries on directors, actors, films,

cinematographers, composers, producers, and major historical events that greatly affected the direction and development of German cinema. The book's broad canvas will lead students and scholars of cinema to appreciate the complex nature of German film. **Unter Geiern** Karl-May-Verlag Der Band untersucht das Genre erstmals eingehend in seinen komplexen

und vielschichtige interkulturelle Auffächerungen, die sich in nationalspezifischen Western-Variationen finden. Er eröffnet interessante Perspektiven auf diesen film- und kulturgeschichtlich kaum erschlossenen Bereich. Ein Schwerpunkt gilt den verschiedenen nationalen Western-Varianten in Osteuropa. Beiträge von Spezialisten aus Polen, Tschechien und Russland arbeiten bislang unbekannte Übereinstimmungen und Differenzen im Gebrauch des Genres in den damals kommunistischen Ländern zu Tage. Deutlich wird dabei u.a., dass das ideologisch als anrühlich betrachtete, aber beim Publikum sehr beliebte Genre vor allem in Russland und Polen über die Intervention der Regierungen dazu diente, sowohl Kapitalismuskritik als auch Überhöhungen der eigenen Nationalkultur zu inszenieren. Darüber hinaus beinhaltet der Band auch Texte mit neuen Perspektiven auf den deutschen Western sowie auf Western-Variationen im französischen, britischen, australischen, indischen und afrikanischen Kino. Auch die vielfältigen Verbindungen zwischen Western und Eastern werden u.a. anhand internationaler Koproduktionen

n beleuchtet. Der Band betont die Vielschichtigkeit und Komplexität der interkulturellen Transformationen des Western, die sich von Europa über Lateinamerika und Afrika bis nach Australien und Asien nachweisen lassen. Dabei wird herausgearbeitet, wie Western-Elemente in sehr unterschiedlicher Weise zur Geltung kommen, um nationalspezifi-

The Complete Index to Literary Sources in Film Liverpool University Press
This book analyses the waves of protests, from spontaneous uprisings to well-organized forms of collective

action, which have shaken European cities over the last decade. It shows how analysing these protests in connection with the structural context of neoliberal urbanism and its crises is more productive than standard explanations. Processes of neoliberalisation have caused deeply segregated urban landscapes defined by deepening social inequality, rising unemployment

t, racism, securitization of urban spaces and welfare state withdrawal, particularly from poor peripheral areas, where tensions between marginalized youth and police often manifest in public spaces. Challenging a conventional distinction made in research on protest, the book integrates a structural analysis of processes of large scale urban transformation with analyses

of the relationship between 'riots' and social movement action in nine countries: France, Greece, England, Germany, Spain, Poland, Denmark, Sweden and Turkey. *German Film & Literature* University of Iowa Press

By the time the Berlin Wall collapsed, the cinema of the German Democratic Republic—to the extent it was considered at all—was widely regarded as a footnote to European film history, with little of enduring value. Since then, interest in East German cinema has exploded, inspiring innumerable festivals, books, and exhibits on the GDR's rich and varied filmic output.

In *Re-Imagining DEFA*, leading international experts take stock of this vibrant landscape and plot an ambitious course for future research, one that considers other cinematic traditions, brings genre and popular works into the fold, and encompasses DEFA's complex post-unification "afterlife." *Re-Imagining DEFA* Roba Digital Sheets The historic and mythic elements of

the American Old West—covered wagon trains, herds of buffalo, teepee villages, Indigenous warriors on horseback, cowboys on open ranges, and white settlers "taming" a wilderness with their plows and log cabins—have exerted a global fascination for more than 200 years and became the foundation for fan communities who have endured for generations.

This book examines some of those communities, particularly German fans inspired by the authors of Westerns such as Karl May, and American enthusiasts of Laura Ingalls Wilder's Little House on the Prairie series. But the Old West (like all visions of the past) proved to be shifting cultural terrain. In both Germany and the U. S., Western narratives of white settlement were once seen as "apolitical"

and were widely accepted by white people. But during the Nazi period in Germany and in East Germany after 1945, the American West was reevaluated and politically repurposed. Then, during the late twentieth century, understanding of the West changed in the U. S. as well, while the violence of white settler colonialism and the displacement of Indigenous peoples became a

flashpoint in the culture wars between right and left. Reagin shows that the past that fans seek to recreate is shaped by the changing present, as each new generation adapts and relives their own West. *Unter Geiern* BoD - Books on Demand First Published in 1986. This collection of essays by an international team of scholars is the first sustained investigation in any language of the historical interactions

between German film and literature. It is a book about adaptations and transformations, about why filmmakers adapt certain material at certain times. The major impetus at work is the desire to expand the field of adaptation study to include sociological, theoretical and historical dimensions, and to bring a livelier regard for intertextuality to the studies of German

film and literature. It is concerned with the ways in which filmmakers in Germany- from Pabst and von Sternberg to Fassbinder, Herzog and Sanders- Brahms- have engaged and been engaged by, literary history.

A historical analysis of the transatlantic relations of the American Indian radical sovereignty movement of the late Cold War. From

Wounded Knee to Checkpoint Charlie examines the history of the transatlantic alliance between American Indian sovereignty activists and Central European solidarity groups, and their entry into the United Nations in the 1970s and 1980s. In the late Cold War, Native American activists engaged in transnational diplomacy for nation building by putting

outside pressure on the US government for a more progressive Indian policy that reached for the full decolonization of Native American communities into independence. By using extensive multinational archival research complemented by interviews, György Ferenc Tóth investigates how older transatlantic images of American Indians influenced the alliance between Native activists and Central European groups, how this coalition developed and functioned, and how the US government and the regimes of the Eastern Bloc responded to this transatlantic alliance. This book not only places the American Indian radical sovereignty movement in an international context, but also recasts it as a transnational struggle, thus connecting domestic US social and political history to the history of Cold War transatlantic relations and global movements. Unter Geiern Springer

The Western has always been inextricably linked to the USA, and studies have continually sought to connect its historical development to changes in American society and Hollywood innovations. Focusing new

critical attention on films produced in Germany, Italy and Britain, this timely book offers a radical rereading of the evolutionary history of the Western and brings a vital international dimension to its study. Lee Broughton argues not only that European films possess a special significance in terms of the genre's global development, but also that many offered groundbreaking and

progressive representation of traditional Wild West 'Others': Native Americans, African Americans and so-called 'strong women'. European Westerns investigate how the histories of Germany, Italy and Britain - and the idiosyncrasies of their respective national film industries - influenced representation of the self and 'Other', shedding light on the broader

cultural, historical and political contexts that shaped European engagement with the genre. *Lessings Nathan der Weise* - artnow sro This volume consists of a series of essays, written by leading scholars within the field, demonstrating the types of inquiry that can be pursued into the transnational realities underpinning German-

language culture and history as these travel right around the globe. Contributions discuss the inherent cross-pollination of different languages, times, places and notions of identity within German-language cultures and the ways in which their construction and circulation cannot be contained by national or linguistic borders. In doing so, it is not the aim of the volume to provide a

compendium of existing transnational approaches to German Studies or to offer its readers a series of survey chapters on different fields of study to date. Instead, it offers novel research-led chapters that pose a question, a problem or an issue through which contemporary and historical transcultural and transnational processes can be seen at work. Accordingly, each essay

isolates a specific area of study and opens it up for exploration, providing readers, especially student readers, not just with examples of transnational phenomena in German language cultures but also with models of how research in these areas can be configured and pursued. This study will be invaluable to university and college faculty working in the disciplines in German studies as well as in translation, cultural studies, and second-language education. Its combination of theoretical and practical

explorations will allow readers to view cultural texts anew and invite educators to revisit long-forgotten or banished practices, such as translation in (auto)biographical writing and in the German language classroom.

A characteristic feature of the various	conversion concepts discussed is the use of tethered flying devices to substantially reduce the material consumption per installed unit and to access wind energy at higher altitudes, where the wind is more consistent. The introductory chapter describes the emergence and economic dimension of airborne wind energy. Focusing on "Fundamental s, Modeling & Simulation",
--	---	---

Part I includes six contributions that describe quasi-steady as well as dynamic models and simulations of airborne wind energy systems or individual components. Shifting the spotlight to “Control, Optimization & Flight State Measurement”, Part II combines one chapter on measurement techniques with five chapters on control of kite and ground stations, and two chapters on optimization. Part III on “Concept Design & Analysis” includes three chapters that present and analyze novel harvesting concepts as well as two chapters on system component design. Part IV, which centers on “Implemented Concepts”, presents five chapters on established system concepts and one chapter about a subsystem for automatic launching and landing of kites. In closing, Part V focuses with four chapters on “Technology Deployment” related to market and financing strategies, as well as on regulation and the environment. The book builds on the success of the first volume “Airborne Wind Energy” (Springer, 2013), and offers a self-contained reference guide for researchers, scientists, professionals and students. The respective chapters were

contributed by a broad variety of authors: academics, practicing engineers and inventors, all of whom are experts in their respective fields.

This comprehensive guide is an ideal reference work for film specialists and enthusiasts. First published in 1984 but continuously updated ever

since, CineGraph is the most authoritative and comprehensive encyclopedia on German-speaking cinema in the German language. This condensed and substantially revised English-language edition makes this important resource available to students and researchers for the first time outside its German context. It offers a representative historical

overview through biographical entries on the main protagonists, from the beginnings to the present day. Included are directors and actors, writers and cameramen, composers and production designers, film theorists and critics, producers and distributors, inventors and manufacturers. An appendix includes short introductory essays on specific periods and movements, such as Early

Film, Weimar, Nazi Cinema, DEFA, New German Cinema, and German film since unification, as well as on cinematic developments in Austria and Switzerland. Sections that crossreference names around specific professional groups and themes will prove equally invaluable to researchers.
