It's 1914. Fay can shoot a rabbit and make a mean nettle stew. She understands morse code and the semaphoric alphabet. She knows where the penguins nest and when the humpbacks migrate. But until she starts writing to a soldier named Charlie, she's never known friendship - and she's never had a friend to lose. This beautifully illustrated story for all ages combines the considerable talents of award-winning author, Dianne Wolfer, and first-time book illustrator, Brian Simmonds.

Losing the Excess Baggage Wentworth Press

A wake-up call for a national crisis in parenting—and a deeply helpful book for those who want to see their own behaviors as parents with the greatest possible clarity. Harvard psychologist Richard Weissbourd argues incisively that parents—not peers, not television—are the primary shapers of their children's moral lives. And yet, it is parents' lack of self-awareness and confused priorities that are dangerously undermining children's development. Through the author's own original field research, including hundreds of rich, revealing conversations with

children, parents, teachers, and coaches, a surprising picture emerges. Parents' intense focus on their children's happiness is turning many children into self-involved, fragile conformists. The suddenly widespread desire of parents to be closer to their children—a heartening trend in many ways—often undercuts kids' morality. Our fixation with being great parents—and our need for our children to reflect that greatness—can actually make them feel ashamed for failing to measure up. Finally, parents' interactions with coaches and teachers—and coaches' and teachers' interactions with children—are critical arenas for nurturing, or eroding, children's moral lives. Weissbourd's ultimately compassionate message—based on compelling new research—is that the intense, crisis-filled, and profoundly joyous process of raising a child can be a powerful force for our own moral development.

Author, pediatrician, and developmental-behavioral expert Dan Shapiro, MD, divides his new parenting guide, Parent Child Journey, into ten different "miles." Each mile represents an interactive session that brings you closer to understanding your child's behavior and learning effective strategies. The first mile includes the "Gander," an assessment tool Shapiro developed to help describe your child's developmental profile-and yours too. Respecting the different learning styles of children and parents, he presents the Gander in a variety of ways: as a standard rating scale with explanatory text, but also as a picture, a song, and a map. Then, Shapiro takes parents through nine other sessions, continuing to present his evidence-based training program as a uniquely creative integration of standard discussion, real-life vignettes, richly illustrated fable, worksheets, and homework assignments. Throughout Parent Child Journey, Shapiro emphasizes, "Just because your child's behavior may be complicated, does not mean it is

incomprehensible." Parent Child Journey combines serious help with whimsical presentation-supporting and teaching parents, even as it engages and entertains. With this comprehensive new guide, Shapiro reassures parents that they are not alone on this journey.

The National School Improvement Tool brings together findings from international research into the practices of highly effective schools and school leaders. The Tool assists schools to review and reflect on their efforts to improve the quality of classroom teaching and learning. It supports school-wide conversations - including with parents and families, school governing bodies, local communities and students themselves - about aspects of current practice, areas for improvement and evidence that progress is being made. The Tool does not describe everything that effective schools do, but focuses on those practices that are most directly related to school-wide improvements, and thus outcomes for students. In this sense, the tool can be thought of as a core element of more comprehensive school improvement programs, frameworks and

initiatives.
