This is most evident in the Arab world, where the camel has played a central role in the historical development of Arabic society—where an elaborate vocabulary and extensive literature have been devoted to it. In <i>Camel</i>, Robert Irwin</p>	<p>explores why the camel has fascinated so many cultures, including those cultivated in locales where camels are not indigenous. Here, he traces the history of the camel from its origins millions of years ago to the present day, discussing such matters of contemporary concern as the plight of camel herders in Sudan’s war-torn Darfur region, the alarming</p>

increase in the population of feral camels in Australia, and the endangered status of the wild Bactrian in Mongolia and China. Throughout history, the camel has been appreciated worldwide for its practicality, resilience, and legendary abilities of survival. As a result it has been featured in the works of Leonardo da Vinci, Poussin, Tiepolo, Flaubert, Kipling, and Rose Macaulay, among others.

From East to West, Irwin's *Camel* is the first survey of its kind to examine the animal's role in society and history throughout the world. Not just for camel aficionados, this highly illustrated book, containing over 100 informative and unusual images, is sure to entertain and inform anyone interested in this fascinating and exotic animal. *Bactrian Camel* Createspace

14 Fun Facts About Camels: A 15-Minute Book Learning Island  
The U.S. Army's oddest recruits: Camels! In this strange but true historical tale, 34 camels were imported to Texas to work as pack animals for the army in 1856. Many people had never seen such strange animals; they

didn't believe that these smelly beasts could possibly be useful.

Despite many Texans' initial doubts, the camels thrived in the state's desert and transported important military messages and supplies.

This book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals -- especially those that are endangered. His message: to know these animals is to save them. Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and

wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits: from tiny to mammoth, from the Florida grasshopper sparrow to the

greater one-horned rhinoceros. Paired with the prose of veteran wildlife writer Douglas Chadwick, this book presents an argument for saving all the species of our planet.
