LOPEZ ALLIE

Wild About Bears Ruby Tuesday Books

When did cave bears roam the Earth? Why do polar bears have hairy paws? Where do sun bears sleep all day? The answers to all these questions and more!

The Loneliest Polar Bear Chiron Publications

Teddy Bears make every child feel comfortable in new surroundings. Friendly and easy to talk to, they are the perfect addition to the classroom. This delightful book fosters self-concept, language arts, math, and fine/gross motor skills. Includes an in-depth guide to designing and maintaining learning center activities for teachers on a limited budget. All the inspiration you need to create an entire curriculum of bear related activities.

Energy and Individuality in the Art of Anna Huntington, Sculptor and Amy Beach, Composer Crabtree Publishing Company

It's a spring morning in the Arctic. A hungry female polar bear emerges from her den after a winter spent sleeping under the snow. Her two young cubs follow her into their icy new world. The tiny bears have lots to learn. When they get to the ocean, their mother will show them how to swim and hunt for food. Filled with information perfectly suited to the abilities and interests of its primary-grade audience, this colorful, fact-filled book gives readers a chance not only to learn all about polar bears and how their bodies are adapted to the extreme cold, but also to develop their powers of observation and critical thinking. Built-in activities such as investigating and measuring the size of a polar bear's paw will give readers a chance to gain, insights beyond the facts and figures.

Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

Those Big Bears Crown

Never before have so many exciting, hair-raising tales of bear encounters been collected into one book. Read about a man who swam into a lake to try to escape a furious bear only to find to his horror that bears can swim too! Or of the old gold prospector who got mauled and sewed up his own stomach-and lived to tell about it! When a bear attacks, it does so with devastating ferocity.

Although the average attack lasts but thirty seconds, grievous injury can result from powerful paws and jaws. Strangely enough, most attacks are nonfatal. This book is filled with true-life episodes of close-calls, maulings, and deaths by all three North American bears: black, grizzly, and polar. These stories are not fiction. All are, eerily enough, based on complete fact. Even the FOX TV show *When Animals Attack* uses Kaniut's material for their shows. The author of two previous best-selling books on dangerous bears brings you a cliffhanger-you won't want to miss his latest and best yet!

Boys' Life Pineapple Press Inc

When a 19-year old female polar bear named Barle is rescued from the inhumane conditions of a circus in the Caribbean and flown to safety in Detroit, zookeeper Else Poulsen -- renowned throughout the world for her work rehabilitating bears who have been abused -- is on hand to meet her and help her on the road to

recovery and self-discovery. Thus begins Barle's gradual introduction into the world of polar bears. Slowly she forges relationships with the other bears in the zoo and eventually mates with a young male and successfully raises a cub. By living in a caring, enriched environment focused on her welfare, Barle is able to recover from the trauma she had suffered at the circus and develop skills that are important to thriving as a polar bear. As Poulsen documents, however, not all captive bears are so fortunate. Augmented with black-and-white photographs, Barle's Story provides a rich and moving portrait of a remarkable bear and of the author's inspiring work to help her discover her true polar bear ways.

Bear-Ology Createspace Independent Publishing Platform

This title presents a collection of photographs by acclaimed 'polar bear photographer' Steven Kazlowski. Featuring mostly never-before-published images, this simple yet evocative book explores the polar bear's Arctic home and life cycle.

Archer's Bible Yen Press LLC

This companion book to the authors' Sibert award-winning *Honeybee* explores the life and habitat of a majestic endangered species through dramatic text and sumptuous illustration. April in the Arctic . . . Cold winds send snow clouds scuttling across the sky. Temperatures barely nudge above freezing. But every now and again, The cloud cover parts, The sun shines down, And the frozen world stretches awake. As spring approaches in the Arctic, a mother polar bear and her two cubs tentatively emerge from hibernation to explore the changing landscape. When it is time, she takes her cubs on a forty-mile journey, back to their home on the ice. Along the way, she fends off wolves, hunts for food, and swims miles and miles. This companion book to *Honeybee* and *Giant Squid* features the unique talents of Fleming and Rohmann on a perennially popular subject. Eric Rohmann's magnificent oil

paintings feature (as in Honeybee) a spectacular gatefold of the polar landscape. A Junior Library Guild Gold Standard Selection **Polar Bear Neon Squid**

Come paw to paw with a polar bear and eye to eye with a giant squid in this interactive book that invites readers to compare parts of their bodies with life-size artworks of different animals. Children can compare their ears with a hare, their teeth with a shark, their tongue with a chameleon and even their bottom with a pygmy hippo!

Ice Bear Kids Can Press Ltd

Find out just how wacky some families can be in the eighth book of this hilarious series. Fuzz and his family live at the zoo. Fuzz's dad is a blood-thirsty tiger, his mum a mud-cake-making rhinoceros, his sister a tap-dancing giraffe and his brothers a pair of somersaulting monkeys. Fuzz makes great pocket-money pretending to be a polar bear, and at the end of each day his family take off their costumes. Well, most of the time, anyway. Fuzz's pa loves being a polar bear so much he wants to be one! And when he wins two tickets for a cruise to the Arctic, things don't quite turn out as planned! Who is the mysterious girl with pointed ears? What are those strange jingle bells Fuzz keeps hearing? How can two part-time polar bears cope with real ones? Will Fuzz and Pa have to eat raw fish forever? And do reindeer really fly ... Find out what happens at the North Pole with Fuzz and his pa on this amazing Arctic adventure in the Wacky Families series. Ages 7-10

The Life Cycle of a Polar Bear Holiday House

Canadian – from east to west coast; from city to rural – will love the 101 stories in this new collection about embracing those long winter days and making the most of them. Filled with amusing and encouraging stories about weathering the cold, creating warm memories with family and friends, and playing great winter sports.

Beeton's Dictionary of Natural History. A Compendious Cyclopædia of the Animal Kingdom, Etc Green Dragon Books
The award-winning zookeeper and author of Smiling Bears shares her account of rescuing and rehabilitating a bear held in a Caribbean circus. When a nineteen-year-old female polar bear named Barle is rescued from the inhumane conditions of a circus in the Caribbean and flown to safety in Detroit, zookeeper Else Poulsen—renowned throughout the world for her work rehabilitating abused bears—is on hand to meet her and help her on the road to recovery and self-discovery. Thus begins Barle's gradual introduction into the world of polar bears. Slowly she forges relationships with the other bears in the zoo and eventually mates with a young male and successfully raises a cub. By living in a caring, enriched environment focused on her welfare, Barle is able to recover from the trauma she had suffered at the circus and develop skills that are important to thriving as a polar bear. As Poulsen documents, however, not all captive bears are so fortunate. Augmented with black-and-white photographs, Barle's Story provides a rich and moving portrayal of a remarkable bear and of the author's inspiring work to help her discover her true polar bear ways. Praise for Barle's Story "This intelligent, stark, and gently humorous book makes one think that if all animals were listened to in the way that...Poulsen listens to bears, our children would inherit an infinitely kinder and safer world that the one they enjoy now." —Dr. Jill Robinson MBE, founder and CEO, Animals Asia Foundation "At once deeply heart-wrenching, heart-warming, and heartfelt. Read this wonderful book and share it widely." —Dr. Marc Bekoff, author of Why Dogs Hump and Bees Get Depressed

Bärle's Story Arctic Animals: Life Outside t

Sea otters and polar bears are carnivorous marine mammals that still resemble their terrestrial ancestors. Compared with Cetacea (whales and dolphins), Sirenia (dugongs and manatees), and Pinnipedia (seals, sea lions, and walrus), they are less adapted for an aquatic life and the most recently evolved among marine

mammals. Sea otters are amphibious but seldom come ashore, and polar bears primarily occur on sea ice or along the shore. When at sea, both species spend most of their time swimming at the surface or making short, shallow dives when foraging or pursuing prey. Indeed, polar bears rarely pursue seals in water. Nevertheless, polar bears are powerful swimmers and will stalk seals from the water. As with many other large carnivores, they are solitary hunters. Although sea otters are gregarious and form aggregations at sea called rafts, they are primarily asocial. Except during mating, the principal interaction among sea otters occurs between a female and offspring during the six-month dependency period. In large carnivores (e.g., wolves and lions) that feed on ungulates, sociality and cooperation are favored because of the need to capture large prey and defend carcasses. Polar bears, which are the largest terrestrial carnivore, are solitary hunters of seals and are neither gregarious nor social. Males and females briefly associate during courtship and mating. During this time, males aggressively compete for females. At other times, males generally avoid each other except for aggregations of males that form while summering on land, and females with cubs avoid males, which are known for infanticide. As with sea otters, the interaction of polar bears outside of mating occurs between a female and her offspring during the 2-3 year dependency period. This interaction is critically important when altricial cubs are born in the winter den. This book provides new insight into the ethology and behavioral ecology of sea otters and polar bears. Each chapter reviews the discoveries of previous studies and integrates recent research using new techniques and technology. The authors also address historic and current anthropogenic challenges for their survival as climate change alters entire marine ecosystems.

Boys' Life Sterling Publishing Company, Inc.

A comprehensive look at the world's eight bear species. Discover shared traits and behaviors as well as unique characteristics of the polar bear, brown bear, North American black bear, spectacled bear, Asiatic black bear, sloth bear, sun bear, and giant panda. Readers will marvel at the adaptations each has developed to survive in a challenging world. Jeannie Brett's stunning artwork, coupled with her thorough research, brings each bear and its habitat to life. Appended with a glossary and an illustrated world map that shows the location of bear habitats.

Backpacker Greystone Books

Includes a catalog of each artist's work, a discography of Beach's music, photographs of sculptures, and numerous musical examples.

Polar Bear Scarecrow Press

In *Animal Life in Nature, Myth and Dreams*, Elizabeth Caspari connects the world of real, living animals with the symbolic world of animal images in human thought, both conscious and unconscious. She gives the reader an opportunity to make this connection on his or her own personal journey of discovery. This book is a study of animals—their natural history, mythology, folklore, and religious significance around the world as well as their role in our lives, dreams, and everyday language. It examines the symbolic impact animals have on our collective culture, particularly on our own personal and interior lives. From Albatross to Zebra, each animal is pictured in color and factual context is given about its behavior in the natural world. Information is included about habitat, distribution, weight, size, longevity, and classification. By drawing on a process of amplification developed by C.G. Jung, in which an image is related to a previous historical, mythological, religious, or ethnological context, *Animal Life in Nature, Myth and Dreams* discusses the meaning of the animal in a dream, amplifying the reader's understanding of that animal. Intended for anyone interested in the actual behavior and nature of animals and the world we live in, *Animal Life* presents a good deal of ethological and mythological material. By contemplating the significance of our

fellow creatures, and how everything in our universe is connected, *Animal Life* offers a more whole, and more healing, view of the world. Fully illustrated in color.

Bears The Mountaineers Books

Lou Marinovich yearned for a life of adventure and strong emotions -- and got far more than he anticipated. Here are true-life adventure stories you have never heard before, from places you have never been. Inspired to become a paleontologist, he plunged into realms of life where intellectuals rarely go, working hardhat jobs on offshore oil rigs in equatorial Africa and wintertime Alaska to afford grad school, and laboring beside cutthroat coworkers, one of whom he was barely restrained from murdering. As an internationally acclaimed paleontologist, Marinovich researched fossil mollusks in the surreal landscapes of remotest Alaska, Arctic Canada and Siberia. While documenting faunal and climate change in the Arctic over the span of 60 million years, he solved the mystery of Bering Strait's age, discovered an unnamed river, survived a helicopter crash, several bush plane accidents, a near-drowning in an icy river, landslides, punishing storms and predator attacks. He saved his life by shooting a charging grizzly with his only bullet. Marinovich found the wilderness adventures he craved as a young man, but he was also rewarded by surprising and profound spiritual experiences, during one of which he found his soul mate. His unique story is one of youthful yearning, high adventure, moral lapses, scientific discovery and love. *True North, Hunting Fossils Under the Midnight Sun* was awarded a 2017 Bronze Medal in the Adventure

and Recreation category by Foreword Reviews Magazine, an unusual accolade for a first-time author. It was also one of six finalists in the Memoirs category in a national contest sponsored by National Indie Excellence Awards.

Book of Bears Smithmark Publishers

Set over a 24-hour period, meet black bears, grizzlies, and cute polar bear cubs in this kids' nonfiction book by expert Don Hardeman Jr. Journey into forests around the world to follow the lives of these furry creatures as they play, hunt, and fight their way through their day. Biologist and black bear expert Don Hardeman Jr. tells the story of the world's most amazing bears in the style of a nature documentary, including gentle science explanations of topics such as hibernation that are perfect for future biologists. Witness incredible moments including: • Grizzlies plucking salmon out of the air as they attempt to swim upstream • The dramatic battle between a sloth bear and a tiger • A sun bear using its gigantic tongue to get honey from a beehive Beautifully illustrated by Rebecca Mills and packed with animal facts, *Bears (A Day in the Life)* encourages kids to look at the roles these incredible mammals play in ecosystems across the globe, and why it's important we protect them. Also available: *Bugs, Big Cats, Sharks, Horses, Birds, Frogs* *Illustrated Sporting & Dramatic News* Larry Kaniut *Archer's Bible* presents an informative and comprehensive guide to archery equipment, accessories and related gear, showcasing thousands of items ranging from the latest high-tech bows and arrows to tree stands. 64 photos.
