In response to a request from the National Bank of Georgia (NBG), the Monetary and Capital Markets Department (MCM) of the International Monetary Fund (IMF) conducted a Technical Assistance (TA) mission during September 5–16, 2022 as follow-up to the mission that took place during March 17–April 20, 2022. The first mission provided initial assistance to the authorities in operationalizing the new bank recovery and resolution framework, building on the recommendations from

the 2021 Financial Sector Assessment Program (FSAP). This second mission deepened that assistance by providing further guidance on, among others, (i) the architecture of the resolution framework; including triggers, resolvability assessments, and resolution planning; (ii) the operationalization of key resolution tools (notably, by reviewing playbooks for the sale of business and bridge banks tools); (iii) data requirements for undertaking the valuations necessary to support resolution; (iv) resolution funding options; and (v) interagency coordination and communications. Moreover, the mission discussed potential impediments (and

associated mitigants) to effective resolution and reviewed the NBG's progress with the implementation of the recommendations on early intervention, the Interagency Financial Stability Committee, and other topics that were covered by the first mission.

In my observation of lives around me, I often wonder, What happened there? I imagine what that person might have done to contribute to the success or failure of their own life. Usually, a life attracts my attention because of its exceptionalities for good or for bad. Over time, I have come to see that many people seem to wander

through life, just to wake up one day, usually at about middle age, and realize that their life had happened while they were not looking! This is a clarion call and encouragement to consciousness and deliberateness in living the life one would be proud of in the end. It is also a summary of the lessons I have learned from my own experiences or from books and other resources I have used in my quest for answers on the subject of life. The chapters are arranged based on the different stages and aspects to point out signposts, road junctions, and time lines that the reader can expect to navigate on the journey of life. It is to bring consciousness to the consideration and planning that the different aspects of life need for your own particular journey. The book must not be read in a particular sequence; you can read particular chapters or aspects as required by your particular stage, situation, or need for counsel at different times. Different chapters will be more applicable and enlightening for different readers at different times. It could be growing up and career building time

for some, marriage and parenting for others. It might be about maneuvering middle and old age for yet another. In the end, no one can control all aspects of life all the time, but you can be awake and write your own story by making things happen instead of just waiting and watching them happen, accepting whatever life brings. Make your life happen.

In assessing the structure that evolved to meet this need, John James provides a new and convincing explanation of the forces underlying the integration of separate and local money markets to form a national market. To understand the role of financial markets during the period, the author examines the institutions and operations of the banking system in detail. In contrast to the now-prevailing view among scholars, Professor James finds that the banking system was quite

adaptable in responding to institutional constraints, and he focuses in particular on the role of the correspondent banking system. The second part of his book assesses the performance of the market and the forces promoting change during the period. Drawing on a new and more carefully derived set of interest rates, the author tests competing hypotheses to explain integration and advances a more satisfactory alternative theory. He offers the first modern analysis of American financial institutions of the period between the Civil War and the establishment of the Federal Reserve System. In so doing, he adds to our knowledge of the historic role of finance and capital in economic development. Originally published in 1978. FINANCIAL MARKETS, INSTITUTIONS, AND FINANCIAL SERVICES Princeton University Press Who would not be interested in getting an interest-free loan for 12 months for any type of purchase just for taking a few minutes to complete a credit card balance transfer offer? Or a free round-trip airline ticket twice a year just for making purchases on a rebate card? Or lowering their insurance premiums by hundreds of dollars a year just by raising their credit score? Obviously, just about every consumer is interested in saving money and getting freebies! Hence, the universal appeal of this book cannot be overstated. Today, the average American household has 12.7 credit cards. Banks maximize their profits by "nickel and dimeing" and outsmarting their cardholders: that's why credit cards are their most profitable product. Banks spend billions enticing consumers with rebates, freebies, low-

introductory rate offers, and airline miles. Learn how to take full advantage of these offers, without paying for them through brutally high interest rates, fees, and penalties! Arnold offers specific advice targeted to young consumers who are being aggressively targeted by credit card marketers; retirees facing credit discrimination; Americans recovering from bankruptcy or other debt problems; and even consumers with great credit. You'll learn the techniques he has personally used to escape credit card debt, "creatively finance" his wedding, car, and home purchases, and earn thousands in credit card "perks" every year.
