Discover why and how schools must become places where thinkingis valued, visible, and actively promoted As educators, parents, and citizens, we must settle for nothingless than environments that bring out the best in people, takelearning to the next level, allow for great discoveries, and propelboth the individual and the group forward into a lifetime oflearning. This is something all teachers want and all studentsdeserve. In Creating Cultures of Thinking: The 8 Forces We MustMaster to Truly Transform Our Schools, Ron Ritchhart, author ofMaking Thinking Visible, explains how creating a culture ofthinking is more important to learning than any particularcurriculum and he outlines how any school or teacher can accomplishthis by leveraging 8 cultural forces: expectations, language, time,modeling, opportunities, routines, interactions, andenvironment. With the techniques and rich classroom vignettes throughout thisbook, Ritchhart shows that creating a culture of thinking is notabout just adhering to a particular set of practices or a generalexpectation that people should be involved in thinking. A cultureof thinking produces the feelings, energy, and even joy that canpropel learning forward and motivate us to do what at times can behard and challenging mental work.
