My First Money Book is an awesome read for all ages! it is filled with catchy rhymes and fun pictures, but the message it presents is truly valuable. This book serves as a parent's and children's guide to saving, spending, sharing and investing money. The road to rearing money smart children begins here!

*Summary of Kumiko Love's My Money My Way* John Wiley & Sons

Two professors combine their fascinating and cutting-edge research in behavioral science to explain how money can buy

happiness—if you follow five core principles of smart spending. Most people recognize that they need professional advice on how to earn, save, and invest their money. When it comes to spending that money, most people just follow their intuitions. But scientific research shows that those intuitions are often wrong. Happy Money offers a tour of research on the science of spending, explaining how you can get more happiness for your money. Authors Elizabeth Dunn and Michael Norton have outlined five principles—from choosing experiences over stuff to spending money on others—to guide not only individuals looking for financial security, but also companies seeking to create happier employees and provide “happier products” to their customers. Dunn and

Norton show how companies from Google to Pepsi to Charmin have put these ideas into action. Along the way, Dunn and Norton explore fascinating research that reveals that luxury cars often provide no more pleasure than economy models, that commercials can actually enhance the enjoyment of watching television, and that residents of many cities frequently miss out on inexpensive pleasures in their hometowns. By the end of this “lively and engaging book” (Dan Gilbert, author of *Stumbling on Happiness*), you’ll be asking yourself one simple question every time you reach for your wallet: Am I getting the biggest happiness bang for my buck?

The world of investing normally sees experts telling us the 'right' way to manage our money. How often do these experts pull back the curtain and tell us how they invest their own money? Never. *How I Invest My Money* changes that. In this unprecedented collection, 25 financial experts share how they navigate markets with their own capital. In this honest rendering of how they invest, save, spend, give, and borrow, this group of portfolio managers, financial advisors, venture capitalists and other experts detail the 'how' and

the 'why' of their investments. They share stories about their childhood, their families, the struggles they face and the aspirations they hold. Sometimes raw, always revealing, these stories detail the indelible relationship between our money and our values. Taken as a whole, these essays powerfully demonstrate that there is no single 'right' way to save, spend, and invest. We see a kaleidoscope of perspectives on stocks, bonds, real assets, funds, charity, and other means of achieving the life one desires. With engaging illustrations throughout by Carl Richards, *How I Invest My Money* inspires readers to think creatively about their financial decisions and how money figures in the broader quest for a contented life. In *Money Matters for Teens*, young writers discuss their financial fears and the strategies they've learned to help them spend their money wisely, save for the future, and pay for college. The gap between the richest and the poorest Americans has been growing for decades, and experts predict it will continue to widen. Young people bear

the brunt of this inequality because it makes it harder to get a job and to pay for the college education you need to move up the ladder. Political changes could help close the gap, but in the meantime, teens can help prepare themselves for financial independence. In this book, teens write about learning to handle money wisely, to manage their own income, to pay for college, and how our larger economic system determines their financial standing. Essays include: Equal Work, Unequal Pay The Rags to Riches Myth Job-Hopping to a Career I Took a Scam Job Job-Hunting Tips A Guide to Drama-Free Banking My Credit Card Gave Me False Security We Don't Save It for a Rainy Day How Am I Supposed to Pay for College? Countdown to Independence and more! Through

these essays, teen readers—as well as their parents, teachers, and caregivers—will pick up new tricks to managing their money but will also be provided a much-needed glimpse into how the world looks to our younger generations.

Mad Money “Great tools for anyone wanting to dabble in the stock market.”—USA Today Phil Town is a very wealthy man, but he wasn’t always. In fact, he was living on a salary of \$4,000 a year when some well-timed advice launched him down a highway of investing self-education that revealed what the true “rules” are and how to make them work in one’s favor. Chief among them, of course, is Rule #1: “Don’t lose money.” In this updated edition to the #1 national bestseller, you’ll learn more of Phil’s fresh, think-outside-the-box rules, including: • Don’t diversify • Only buy a stock when it’s on sale • Think long term—but act short term to maximize your return • And most of all, beat the big investors at their own game by using the tools

designed for them! As Phil demonstrates in these pages, giant mutual funds can't help but regress to the mean—and as we've all learned in recent years, that mean could be very disappointing indeed. Fortunately, Rule #1 takes readers step-by-step through a do-it-yourself process, equipping even the biggest investing-phobes with the tools they need to make quantum leaps toward financial security—regardless of where the market is headed.
