Finally, for the legions of Marx Brothers fans, here is the hilarious, long-lost Marx Brothers radio scripts (25 in all) from their 1933 "Five Star Theatre" series. Contains period photos of Groucho and Chico along with memorabilia of the times. 25 halftones.

### **My Bad Tequila** Springer

Mystery, mayhem, madness, margaritas, and Mexico. "My Bad Tequila" is one man's epic journey across two continents and four countries with 50 years of adventure.  
[Global Climate Change Impacts in the United States](#) 010 Publishers

This book presents the most relevant basaltic plateau exposures in the provinces of Neuquén (northern Patagonia) and Santa Cruz (southern Patagonia), and analyzes their geomorphological and morphometric characteristics. The existence of wetland ecosystems near the volcanic plateaus is quantified, thus providing indexes that describe the quantitative relationships between these landscape features. These indexes also make it possible to estimate the development of these wetlands in non-surveyed areas, opening the door for studying remote, isolated areas by means of remote sensing images. In turn, the book proposes a numerical classification system for this type of landscape that summarizes the main geomorphological and hydrological characteristics.  
*Measuring and Improving Social Impacts* Emblem Editions

A law professor and cultural critic offers an eye-opening exploration of the laws of fashion throughout history, from the middle ages to the present day, examining the canons, mores and customs of clothing rules that we often take for granted  
*Product Design and Life Cycle Assessment* Geological Society of London

"The assessment builds on the work of the Livestock, Environment and Development (LEAD) Initiative"--Pref.

*Exactitudes* John Wiley & Sons

Featuring an ideal balance of managerial issues and quantitative techniques, this introduction to operations management keeps pace with current innovations and issues in the field. It presents the concepts clearly and logically, showing readers how OM relates to real business. The new edition also integrates the experiences of a real company throughout each chapter to clearly illustrate the concepts. Readers will find brief discussions on how the company manages areas such as inventory and forecasting to provide a real-world perspective.

*Transparent Governance in an Age of Abundance* IDB

A master of the travel narrative gives us three intertwined novellas of Westerners transformed by their sojourns in India. This startling and satisfying book captures the tumult, ambition, hardship, and serenity that mark today's India. Paul Theroux's characters risk venturing far beyond the subcontinent's well-worn paths to discover woe or truth or peace. A middle-aged couple on vacation veers heedlessly from idyll to chaos. A buttoned-up Boston lawyer finds succour in Mumbai's reeking slums. And a young woman befriends an elephant in Bangalore. In these pages, we also meet Indian characters as singular as they are indicative of the country's subtle ironies: an executive who yearns to become a holy beggar, an earnest young striver whose personality is rewired by acquiring an American accent, a miracle-working guru, and more. As ever, Theroux's portraits of people and places explode stereotypes to exhilarating effect. The *Elephanta Suite* urges us toward a fresh, compelling, and often inspiring notion of what India is, and what it can do to those who try to lose — or find — themselves there.

[Forest management and the impact on water resources](#) Prentice Hall

This book is open access under a CC BY 4.0 license. This book defines the new field of "Bioeconomy" as the sustainable and innovative use of biomass and biological

knowledge to provide food, feed, industrial products, bioenergy and ecological services. The chapters highlight the importance of bioeconomy-related concepts in public, scientific, and political discourse. Using an interdisciplinary approach, the authors outline the dimensions of the bioeconomy as a means of achieving sustainability. The authors are ideally situated to elaborate on the diverse aspects of the bioeconomy. They have acquired in-depth experience of interdisciplinary research through the university's focus on "Bioeconomy", its contribution to the Bioeconomy Research Program of the federal state of Baden-Württemberg, and its participation in the German Bioeconomy Council. With the number of bioeconomy-related projects at European universities rising, this book will provide graduate students and researchers with background information on the bioeconomy. It will familiarize scientific readers with bioeconomy-related terms and give scientific background for economists, agronomists and natural scientists alike.

**Poplars and Willows** Pantheon Books  
In this unique volume, an international cast of leading scholars from several disciplines offers a comprehensive assessment of the current status of space-based weaponry. Regional and technical experts offer their analysis of the major powers' special interests in space and also examine the broader issues of ICBM proliferation, testing, monitoring, and verification as well as possible opportunities for cooperation between states with a stake in space power.  
*Ethology and Behavioral Ecology of Odontocetes* Open Road + Grove/Atlantic  
A comprehensive Statistical Appendix provides regional and country-by-country data in such areas as GDP, manufacturing, sector productivity, prices, trade, income distribution and living standards."--BOOK JACKET.

**Dam Removal** Food & Agriculture Org.  
One of the most controversial issues of the water sector in recent years has been the impacts of large dams. Proponents have claimed that such structures are essential to meet the increasing water demands of

the world and that their overall societal benefits far outweigh the costs. In contrast, the opponents claim that social and environmental costs of large dams far exceed their benefits, and that the era of construction of large dams is over. A major reason as to why there is no consensus on the overall benefits of large dams is because objective, authoritative and comprehensive evaluations of their impacts, especially ten or more years after their construction, are conspicuous by their absence. This book debates impartially, comprehensively and objectively, the positive and negative impacts of large dams based on facts, figures and authoritative analyses. These in-depth case studies are expected to promote a healthy and balanced debate on the needs, impacts and relevance of large dams, with case studies from Africa, Asia, Australia, Europe and Latin America.

**A Star in the West** Cambridge University Press

Robert M. Grant combines a highly accessible writing style with a concentration on the fundamentals of value creation and an emphasis on practicality in this leading strategy text. In this new edition, he includes an even greater focus on strategy implementation that reflects the needs of firms to reconcile scale economies with entrepreneurial flexibility, innovation with cost efficiency, and globalization with local responsiveness. This edition also incorporates some of the key strategic issues of today including: post-financial crisis adjustment, the continuing rise of China, India and Brazil, and the increased emphasis on ethics and sustainability. Coverage is also provided on strategy in not-for-profit organizations. Contemporary Strategy Analysis, 8th Edition, is suitable for both MBA and advanced undergraduate students. It has been adopted by leading business schools all across the world.

*Livestock's Long Shadow* Springer

Report focuses on the removal of small dams, defined as storing 1-100 acre-feet of water.

**The Better World Shopping Guide: 6th Edition** Simon and Schuster

An upbeat cultural evaluation of the sources of illogical decisions explores the

reasons why irrational thought often overcomes level-headed practices, offering insight into the structural patterns that cause people to make the same mistakes repeatedly. 150,000 first printing.

**Bioeconomy** Springer

Trees have been around for more than 370 million years, and today there are about 80 thousand species of them, occupying 3.5 billion hectares worldwide, including 250 million ha of commercial plantations. While forests can provide tremendous environmental, social, and economic benefits to nations, they also affect the hydrologic cycle in different ways. As the demand for water grows and local precipitation patterns change due to global warming, plantation forestry has encountered an increasing number of water-related conflicts worldwide. This document provides a country-by-country summary of the current state of knowledge on the relationship between forest management and water resources. Based on available research publications, the Editor-in-Chief of this document contacted local scientists from countries where the impact of forest management on water resources is an issue, inviting them to submit a chapter.

**Space Power Interests** My Bad Tequila, LLC

In this classic novel by the bestselling author of *The Lover*, erotic intrigue masks a chillingly deceptive form of madness. Elisabeth Alione is convalescing in a hotel in rural France when she meets two men and another woman. The sophisticated dalliance among the four serves to obscure an underlying violence, which, when the curtain of civilization is drawn aside, reveals in her fellow guests a very contemporary, perhaps even new, form of insanity. Like many of Marguerite Duras's novels, *Destroy, She Said* owes much to cinema, displaying a skillful interplay of dialogue and description. There are recurring moods and motifs from the Duras repertoire: eroticism, lassitude, stifled desire, a beautiful woman, a mysterious forest, a desolate provincial hotel. Included in this volume is an in-depth interview with Duras by Jacques Rivette and Jean Narboni.

**A Star in the West, Or, A Humble Attempt to Discover the Long Lost**

**Ten Tribes of Israel, Preparatory to Their Return to Their Beloved City, Jerusalem** Springer

A DRAMATIC FICTIONAL PORTRAIT OF THE US-MEXICO BORDER, MIGRATION, AND ITS IMPACT ON PEOPLE'S LIVES

Through this network of nine personal stories, Carlos Fuentes sets out to explain Mexico and America to each other – and to the rest of the world. He presents a dramatic fictional portrait of the relationship between the United States and Mexico, as played out in a Mexican dynasty led by a powerful Mexican oligarch with complex ties north of the border. It is the story of Mexican families who send their sons north to provide for whole villages with dollars and of Mexican tycoons who exploit their own people. Young Jose Francisco grows up in Texas, determined to write about the border world – the immigrants and illegals, Mexican poverty and Yankee prosperity – stories to break the stand-off silence with a victory shout, to shatter at last the crystal frontier.

*About Face 3* CABI

Mathematics forms bridges between knowledge, tradition, and contemporary life. The continuous development and growth of its many branches, both classical and modern, permeates and fertilizes all aspects of applied science and technology, and so has a vital impact on our modern society. The book will focus on these aspects and will benefit from the contribution of several world-famous scientists from mathematics and related sciences, such as: Ralph Abraham, Andrew Crumey, Peter Markowich, Claudio Procesi, Clive Ruggles, Ismail Serageldin, Amin Shokrollahi, Tobias Wallisser.

*Quality Management* Routledge

*A Cat, A Seagull, An Impossible Task...* Caught up in an oil spill, a dying seagull scrambles ashore to lay her final egg and lands on a balcony, where she meets Zorba, a big black cat from the port of Hamburg. The cat promises the seagull to look after the egg, not to eat the chick once it's hatched and - most difficult of all - to teach the baby gull to fly. Will Zorba and his feline friends honour the promise and give Lucky, the adopted little seagull, the strength to discover her true nature?
