Buildings and Landmarks of Medieval Europe

University of Toronto Press

Spanning a millennium of musical history, this monumental volume brings together nearly forty leading authorities to survey the music of Western Europe in the Middle Ages. All of the major aspects of medieval music are considered, making use of the latest

research and thinking to discuss everything from the earliest genres of chant, through the music of the liturgy, to the riches of the vernacular song of the trouvères and troubadours. Alongside this account of the core repertory of monophony, *The Cambridge History of Medieval Music* tells the story of the birth of polyphonic music, and studies the genres of organum, conductus, motet and polyphonic song. Key composers of the period are introduced, such as Leoninus,

Perotinus, Adam de la Halle, Philippe de Vitry and Guillaume de Machaut, and other chapters examine topics ranging from musical theory and performance to institutions, culture and collections.

Surveys the history of art in the western tradition,

discussing the art of the ancient world, the Middle Ages, the Renaissance through the Rococo, and the modern world, and includes illustrations, time lines, and a glossary. World History Oxford University Press, USA Setting aside the pastiche of bullfighters and flamenco dancers that has dominated the U.S. image of Spain for more than a century, this innovative volume uncovers the roots of Spanish studies to explain why the diversity, vitality, and complexity of Spanish history and

culture have been reduced in U.S. accounts to the equivalent of a tourist brochure. Spurred by the complex colonial relations between the United States and Spain, the new field of Spanish studies offered a way for the young country to reflect a positive image of itself as a democracy, in contrast with perceived Spanish intolerance and closure. *Spain in America* investigates the political and historical forces behind this duality, surveying the work of the major nineteenth-century

U.S. Hispanists in the fields of history, art history, literature, and music. A distinguished panel of contributors offers fresh examinations of the role of U.S. writers, especially Washington Irving and Henry Wadsworth Longfellow, in crafting a wildly romantic vision of Spain. They examine the views of such scholars as William H. Prescott and George Ticknor, who contrasted the "failure" of Spanish history with U.S. exceptionalism. Other essays explore how U.S.

interests in Latin America consistently colored its vision of Spain and how musicology in the United States, dominated by German émigrés, relegated Spanish music to little more than a footnote. Also included are profiles of the philanthropist Archer Mitchell Huntington and the pioneering art historians Georgiana Goddard King and Arthur Kingsley Porter, who spearheaded U.S. interest in the architecture and sculpture of medieval Spain. Providing a much-

needed look at the development and history of Hispanism, Spain in America opens the way toward confronting and modifying reductive views of Spain that are frozen in another time.

Exploring the History and Philosophy of Christian Education

Taylor & Francis

This book examines a pivotal period in ancient human history: the fall of the Roman Empire and the birth of a new European civilization in the early Middle Ages. *The Early Medieval World: From the Fall of Rome to the Time of Charlemagne*

addresses the social and material culture of this critical period in the evolution of Western society, covering the social, political, cultural, and religious history of the Mediterranean world and northern Europe. The two-volume set explains how invading and migrating barbarian tribes—spurred by raiding Huns from the steppes of Central Asia—contributed to the fall of the Western Roman Empire, and documents how the blending of Greco-Roman, Germanic, and Christian

cultures birthed a new civilization in Western Europe, creating the Christian Church and the modern nation-state. A-Z entries discuss political transformation, changing religious practices in daily life, sculpture and the arts, material culture, and social structure, and provide biographies of important men and women in the transitional period of late antiquity. The work will be extremely helpful to students learning about the factors that contributed to the decline

of the Roman Empire—an important and common topic in world history curricula.

The Middle Ages were a time of great innovation, artistic vigor, and cultural richness. Appearance mattered a great deal during this vibrant era and hair was a key marker of the dynamism and sophistication of the period. Hair became ever more central to religious iconography, from Mary Magdalen to the Virgin Mary, while vernacular

poets embellished their verses with descriptions of hairstyles both humble and elaborate, and merchants imported the finest hair products from great distances. Drawing on a wealth of visual, textual and object sources, the volume examines how hairstyles and their representations developed-often to a degree of dazzling complexity-between the years AD 800 and AD 1450. From wimpled matrons and tonsured monks to adorned noblewomen, hair is

revealed as a potent cultural symbol of gender, age, sexuality, health, class, and race. Illustrated with approximately 80 images, *A Cultural History of Hair in the Middle Ages* brings together leading scholars to present an overview of the period with essays on politics, science, religion, fashion, beauty, the visual arts, and popular culture. *The Medieval Experience* Cornell University Press

In this study of the rare

twelfth-century treatise *On Diverse Arts*, Heidi C. Gearhart explores the unique system of values that guided artists of the High Middle Ages as they created their works. Written in northern Germany by a monk known only by the pseudonym Theophilus, *On Diverse Arts* is the only known complete tract on art to survive from the period. It contains three books, each with a richly religious prologue, describing the arts of painting, glass, and

metalwork. Gearhart places this one-of-a-kind treatise in context alongside works by other monastic and literary thinkers of the time and presents a new reading of the text itself. Examining the earliest manuscripts, she reveals a carefully ordered, sophisticated work that aligns the making of art with the virtues of a spiritual life. On *Diverse Arts*, Gearhart shows, articulated a distinctly medieval theory of art that accounted for the entire process of production—from thought

and preparation to the acquisition of material, the execution of work, the creation of form, and the practice of seeing. An important new perspective on one of the most significant texts in art history and the first study of its kind available in English, *Theophilus and the Theory and Practice of Medieval Art* provides fresh insight into the principles and values of medieval art making. Scholars of art history, medieval studies, and Christianity will find Gearhart's book especially

edifying and valuable. Prentice Hall History of Our World Englewood Cliffs, N.J. : Prentice-Hall Examine the creative, profound dialogue between medieval women and biblical traditions The latest volume in the Bible and Women series examines the relationship between women and the Bible's reception during the early Middle Ages (500–1100 CE) in both the Greek East and the Latin West. Essays focus on interactions between women and the Bible through biblical precepts

on women and for women, biblical women as the subjects of action or objects of discussion, and writings by women that refer to the Bible as a moral authority. The women discussed in the volume range from the well-known—including the nuns Kassia in Byzantium and Hrosvita in the West; the aristocrat Dhuoda, author of a moral guide for her son; Gisela, the sister of Charlemagne and abbess of Chelles; and her niece Rotrude—to those who remain anonymous. Contributions also explore

how the Old and New Testaments exercised influence on emerging Islam. Features: Analysis of images of the Virgin Mary as a means of tracing the spread of her cult and feast days from East to West Exploration of the significance of classical culture for medieval women who composed poems for a Christian audience Evaluation of art as a means of establishing devotional relationships not necessarily mediated by the voices of preachers or the reading of texts .

The Germanization of Early Medieval Christianity Cambridge University Press
For one/two-semester undergraduate courses in Medieval History. This comprehensive, well-balanced historical survey

of Medieval Europe--from Roman imperial provinces to the Renaissance--covers all aspects of the history (political, literary, religious, intellectual, etc.) with a focus on social and political themes. It presents a complete picture of the complex process by which an ecumenical civilization that once ringed the basin of the Mediterranean Sea, evolved into three other distinctive civilizations--Latin Europe, Greek Eastern Europe and Asia Minor, and Islam. This text differs from others on the

subject in that it attempts to abolish traditional clichés regarding the Middle Ages and promotes critical thinking about our own time and society.

How does the entrance song of the Mass function within the Roman Rite?

What can it express theologically? What

should Roman Catholics sing at the beginning of

Mass? In this

groundbreaking study,

Jason McFarland answers

these and other important questions by exploring the

history and theology of

the entrance song of

Mass. After a careful

history of the entrance song, he investigates its place in church documents. He proposes several models of the entrance song for liturgical celebration today. Finally, he offers a skillful theological analysis of the entrance song genre, focusing on the song for the Holy Thursday Evening Mass—arguably the most important entrance song of the entire liturgical year. Announcing the Feast provides the most comprehensive treatment of the Roman Rite

entrance song to date. It is unique in that it bridges the disciplines of liturgical studies, musicology, and theological method.
