The SAGE Handbook of Curriculum and Instruction emerges from a concept of curriculum and instruction as a diverse landscape defined and bounded by schools, school boards and their communities, policy, teacher education, and academic research. Each contributing author was asked

to comprehensively review the research literature in their assigned topic. These topics, however, are defined by practical places on the landscape e.g. schools and governmental policies for schools. Key Features: o Presents a different vision or re-conceptualization of the field o Provides a comprehensive and inclusive set of authors, ideas, and topics o Takes a global rather than North American parochial approach o Recognizes that curriculum and instruction is broader in scope than is suggested by university research and theory o Reflects post-1992 changes in curriculum policy, practice and scholarship o Represents a rethinking of how school subject matter areas are treated. Teacher education is included in the Handbook with the intent of addressing the role and place of teacher education in bridging state and national curriculum policies and curriculum as enacted in classrooms.

The Handbook of Research Management is a unique tool for the newly promoted research leader. Larger-scale projects are becoming more common throughout the social sciences and humanities, housed in centres, institutes and programmes. Talented researchers find themselves faced with new challenges to act as managers and leaders rather than as individual scholars. They are responsible for the careers and professional development of others, and for managing interactions with university administrations and external stakeholders. Although many scientific and technological disciplines have long been organized in this way, few resources have been created to help new leaders understand their roles and responsibilities and to reflect on their practice. This Handbook has been created by the combined experience of a leading social scientist and a chief executive of a major international research development institution and funder. The editors have recruited a truly global team of contributors to write about the challenges they have encountered in the course of their careers, and to provoke readers to think about how they might respond within their own contexts. This book will be a standard work of reference for new research leaders, in any discipline or country, looking for help and inspiration. The editorial commentaries extend its potential use in support of training events or workshops where groups of new leaders can come together and explore the issues that are confronting them.

The SAGE Handbook of Propaganda unpacks the ever-present and exciting topic of propaganda to explain how it invades the human psyche, in what ways it does so, and in what contexts. Unlike previous publications on the subject, this book brings to the forefront current manifestations and processes of propaganda such as Islamist, and Far Right propaganda, from interdisciplinary perspectives. In its four parts, the Handbook offers researchers and academics of propaganda studies, peace and conflict studies, media and communication studies, political science and governance marketing, as well as intelligence and law enforcement communities, a comprehensive overview of the tools and context of the development and evolution of propaganda from the twentieth century to the present: Part One: Concepts, Precepts and Techniques in Propaganda Research Part Two: Methodological Approaches in Propaganda Research Part Three: Tools and Techniques in Counter-Propaganda Research Part Four: Propaganda in Context
