Septem linguarum Calepinus. Hoc est lexicon Latinum, variarum linguarum interpretatione adjecta in usum seminarii Patavini[**Jacobus Facciolatus**] Bolchazy-Carducci Publishers

Edition bilingue : latin-anglais

A General System of Nature ... Translated from Gmelin's Last Edition, ... Amended and Enlarged by the Improvements and Discoveries of Later Naturalists, ... with (life ... of Linné) ... Copperplates, (and a Dictionary Explanatory of the Terms which Occur in the ... Departments of Natural History,) by W. Turton Springer Nature

Elaine Fantham provides here a fresh Latin text of Seneca's *Troades* and an English version, with an extensive introduction and critical commentary--the first separate treatment of the play in English since Kingery's 1908 edition. Arguing that the *Troades* was not intended for stage production, the author also discusses the atmosphere of Rome at the time the play was written, when both political and poetic life were felt to be in decline. Although Seneca's plays reflect his experience of tyranny, corruption, and compromise, they are enriched by his contract with the nobler world of poetry. Demonstrating how Seneca loved and imitated the Augustan poets, Professor Fantham reveals the originality that is part of his imitation. Professor Fantham discusses not only the particular characteristics of Seneca's generation but the interplay of his moral and poetic concerns in relationship to his subject--the Trojan captivity. By analyzing his reactions to accounts of this theme in Homer, Euripides, and Augustan epic, she explains his methods and motives in composition. Comparison of the play with Seneca's other works and with other drama exposes some inconsistency, formulaic writing, and excess of ingenuity. It also reveals the influence of epic in loosening his dramatic form and makes apparent his immense vitality. Elaine Fantham is Professor of Classics at the University of Toronto and author of *Comparative Studies in the Republican Latin Imagery* (Toronto). Originally published in 1983. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

The New Natural History of Madagascar CRC Press

The third and final book in a clear and concise introduction to Latin designed to steadily lead students through a series of illustrative examples, readings, vocabulary lists and translation exercises.

Handbook of Zoology ... Translated from the Second Dutch Edition by W. Clark Bolchazy-Carducci Publishers

This fourth volume of this 4-volume set discusses the key diseases, typical symptoms, and management strategies of several economically important plants. Each chapter presents an introduction along with a detailed account of symptoms, causal organisms, disease cycles, epidemiology, and management of a selection of major plantation crops, medicinal crops, and mushrooms. The book features chapters contributed by eminent professionals in the field, who have incorporated their own

experience and knowledge along with an overview of the recent developments in their fields. They provide information on the diagnostic tools and management techniques needed for such plantation crops as areca nut (or betel nut), cocoa (or chocolate), coconut, coffee, and tea; such medicinal crops as isabgol and senna; along with several kinds of mushrooms. The volume also includes photographs that show symptoms of important diseases, which are helpful in disease diagnosis. The volumes provide an abundance of information for understanding and managing plant diseases, with emphasis on diagnostic techniques. The collection includes: Volume 1: Fruit Crops Volume 2: Vegetable Crops Volume 3: Ornamental Plants and Spice Crops Volume 4: Important Plantation Crops, Medicinal Crops, and Mushrooms **Diseases of Horticultural Crops: Diagnosis and Management** Bolchazy-Carducci Publishers

A marvelously illustrated reference to the natural wonders of one of the most spectacular places on earth Separated from Africa's mainland for tens of millions of years, Madagascar has evolved a breathtaking wealth of biodiversity, becoming home to thousands of species found nowhere else on the planet. The New Natural History of Madagascar provides the most comprehensive, up-to-date synthesis available of this island nation's priceless biological treasures. Now fully revised and expanded, this beautifully illustrated compendium features contributions by more than 600 globally renowned experts who cover the history of scientific exploration in Madagascar, as well as the island's geology and soils, climate, forest ecology, human ecology, marine and coastal ecosystems, plants, invertebrates, fishes, amphibians, reptiles, birds, and mammals. This invaluable two-volume reference also includes detailed discussions of conservation efforts in Madagascar that showcase several successful protected area programs that can serve as models for threatened ecosystems throughout the world. Provides the most comprehensive overview of Madagascar's rich natural history Coedited by 18 different specialists Features hundreds of new contributions by world-class experts Includes hundreds of new illustrations Covers a broad array of topics, from geology and climate to animals, plants, and marine life Sheds light on newly discovered species and draws on the latest science An essential resource for anyone interested in Madagascar or tropical ecosystems in general, from biologists and conservationists to ecotourists and armchair naturalists

Septem linguarum Calepinus. Hoc est lexicon Latinum, variarum linguarum interpretatione adjecta in usum Seminarii Patavini Princeton University Press

"Latin for the New Millennium, Levels 1 and 2 is a complete introductory course to the Latin language, suitable for both high school and college students, consisting of two volumes, each accompanied by a teacher's manual and students' workbooks. The strategy employed for teaching and learning incorporates the best of both the reading approach and the more abstract grammatical method. The choice of vocabulary in each chapter reflects ancient authors commonly studied for the AP Latin examinations. There are exercises designed for oral use, as well as a substantial core of more conventional exercises in each chapter. The readings, pictures, and supplementary inserts on cultural information illuminate Roman life, civilization, Roman history, and mythology, as well as the continuing use of Latin after antiquity and its vigorous literary tradition in such periods as the Middle Ages and Renaissance. Each chapter also includes derivatives, the influence of Latin vocabulary on English, and selected proverbs or common Latin sayings. Latin for the New Millennium Level 3 builds on the strong foundation of Levels 1 and

2 and provides students an in-depth experience of Caesar, Catullus, Cicero, Horace, Ovid, and Vergil as well as of the Renaissance writer Erasmus. This text provides students an introduction to unadapted Latin literature and builds their literary analysis skills."--adapted from publisher website.

Comparative Anatomy. By C. Th. v. Siebold and H. Stannius. Translated ... and edited with notes and additions ... by Waldo I. Burnett. vol. 1. Anatomy of the Invertebrata. By C. Th. v. Siebold Princeton University Press This book investigates relations between humans and animals over several centuries with a focus on the Middle Ages, since important features of our perceptions regarding animals have been rooted in that period. Elucidating various aspects of medieval human-animal relationships requires transdisciplinary discourse, and so this book aims to reconcile the materiality of animals with complex cultural systems illustrating their subtle transitions 'between body and mind'.

The Institutions of Physiology ... Translated from the Latin of the Third and Last Edition, and Supplied with Numerous and Extensive Notes, by John Elliotson ... Second Edition Anthem Press

"Latin for the New Millennium, Levels 1 and 2 is a complete introductory course to the Latin language, suitable for both high school and college students, consisting of two volumes, each accompanied by a teacher's manual and students' workbooks.
