Designed to be prepared in a variety of rustic settings with minimal utensils, the recipes are organized by soups and salads, light bites, main courses, filling seafood, BBQ, and sweets, and include dishes such as Tuscany bean soup, avocado salad, Skagen sandwich, flaming beef stroganoff, fast wok noodles, spicy lime grilled prawns, baked bananas, pancakes, and hot cinnamon apples. True aficionados will be delighted by the cookbook's special holiday recipe for making a Christmas-themed gingerbread bus. A handy utensils icon on each spread identifies the tools required to make the dishes. In keeping with the cookbook's global contents, some recipes feature international measurements (gram, liter, and rasher), others identify traditional American measurements (tablespoon, teaspoon, and cup), and some cite those universally understood (a can, a pinch, and a slab).

The author believes the period of our lives that has the greatest impact on disease and personality formation is our gestation and birth. Recent studies provide evidence that fetal imprinting, an evolutionary strategy to prepare children to cope with life, establishes a permanent set-point in a child's physiology. Mothers highly anxious during pregnancy may give birth to babies prone to mental illness and disease in later life. Low oxygen at birth, drugs taken during pregnancy, and a lack of parental affection in the first years of life may have similar adverse affects. The author puts a case for a reorientation of our approaches to pregnancy and the use of drugs, and above all, to the

modes of psychotherapy we implement to treat everything from phobias and compulsions to anxiety and depression.--From book jacket.

Fill a Bucket Bucket Fillers

Pride, greed, and power have driven men to do the unthinkable-including selling out their nations and unsuspected citizens to the most corrupt and destructive "invisible" global leaders on Earth. But how did this happen on American soil? How did the downfall begin and who were the predators that the "land of the free and home of the brave" fell victim to? And is all hope lost? This book captures details of the last 200 years of American history that mainstream media does not want you to know. It dissects the "legalized" system of the private central banks that has gone unchecked, and delivers gut-wrenching truths about the real domestic and foreign enemies of the United States. With over 1000 footnotes and quotes from former presidents, prime ministers, and state officials, it will equip you with the facts that the elites have covered up for centuries and empower you to stand up for the truth.

Dr. Loren A. Olson has frequently been asked two questions: How could you not know that you were gay until the age of forty? Wasn't your marriage just a sham to protect yourself at your wife's expense? In *Finally Out*, Dr. Olson answers these questions by telling the inspiring story of his evolving sexuality, into which he intelligently weaves psychological concepts and gay history. This book is a powerful exploration of human sexuality, particularly the sexuality of mature men who, like Dr. Olson, lived a large part of their lives as straight men--sometimes long after becoming aware of their same-sex attractions. Readers will come to understand: - That there is no universal model for coming out - Why many older LGBTQ men came out late, do not come out at all, or come out to varying degrees in different environments - How stigma has created mental health problems for isolated and closeted men who have sex with men, particularly in geographical areas and cultures where there is little or no acceptance of homosexuality - How sexual function changes but perhaps even improves for older men - That aging creates opportunities that one has never had and may never have again, e.g., freedom from the tyranny of ambition - That some people consistently prefer an older sexual partner and this can lead to stable, intergenerational relationships - How same-sex sexual activity was considered prior to the Stonewall uprising in 1969 contrasted with the way it is perceived after Stonewall - How age, culture, geographical location, heterosexual marriage, and children impact a person's decision to come out - Why "conversion therapy" does not work and may be harmful - The difference between homophobia and homonaïveté - The archetypes of self-identified straight men who seek occasional or regular sex with other men - How to overcome the shame and guilt experienced by men who are sexually attracted to other men
