For the longest time, parents and children both, knew and believed that Medicine, Engineering, Management and Law were the only true 'careers' which could provide job security and steady paycheques. However, youngsters today couldn't have been more open to trying out offbeat careers. They are bold, patient, resilient and aware of the fact that a career that is in line with their interests has a higher chance of being satisfying. An equal, or probably more, parents are sceptical about these unconventional careers and would rather have their children go in for 'tried and tested' jobs. With 'Steps to Career', the author has attempted to dilute the dilemma of such children and their parents, providing them a wealth of information on the available conventional and unconventional career options, to help the children decide the right career for them, and the process.

Life is a characteristic that distinguishes objects that have signaling and self-sustaining processes, that is living organisms from those that do not, either because such functions have ceased (death), or else because they lack such functions and are classified as inanimate. Living organisms undergo metabolism, maintain homeostasis, possess a capacity to grow, respond to stimuli, reproduce and, through natural selection, adapt to their environment in successive generations. The human beings have an ability to move, to see, to talk, to hear, to respond, to stimuli, to think and to make judgments. These abilities are all part of these processes called life and are carried out by working together of all cells, tissues and body fluids.1

By the assassination of Rajiv Gandhi, the grandson of Jawaharlal Nehru, the government by the direct descendant of the Nehru Dynasty under the Indian National Congress (INC) came to an end. His widow, an uneducated Italian Christian, continued the Dynasty Rule under a Congress-led hotchpotch coalition called UPA, which was voted out of power in early 2014. During the decade-long UPA government, the Indian economy was in a shambles, mired in massive corruption indulged in by all its Ministers - each one vying with one another in looting the National Exchequer. In retrospect, looking back over the Dynasty Rule of nearly seven decades since independence under the INC Party, India could gain the status of only 10th place in the world economic progress rating, although the neighboring China under the Chinese Communist Party (CCP) could become 2nd most powerful nation in the world despite the fact that INC was established four decades prior to the establishment of CCP. Then the year 2014 heralded. In a spectacular festival of democracy, the world's largest political party, Bharatiya Janata Party (BJP), won the election with absolute majority, and its Prime Ministerial candidate, Narendra Modi, became the 14th P.M. of India on 26th May 2014. Since then the country witnessed remarkable growth and progress, aided by his corruption-free government, attaining the status of fifth largest economy in the world. It is during the inexorable passage of time since the "Modi-Era" began in 2014 that the essays included in this book were all penned by the Author, touching upon various aspects of the turn of events and of the friends and foes of Modi. By paraphrasing the sayings of Swami Vivekananda: "friends and foes are all instruments in the hands of PM Modi to help India work out its own karma" and lead

the nation to greater heights in the years to come.
