Albert Einstein. His name has become a synonym for genius. His wild case of bedhead and playful sense of humor made him a media superstar—the first, maybe only, scientist-celebrity. He wasn't much for lab work; in fact he had a tendency to blow up experiments. What he liked to do was think, not in words but in "thought experiments". What was the result of all his thinking? Nothing less than the overturning of Newtonian physics. Once again, Kathleen Krull delivers a witty and astute look at one of the true Giants of Science and the turbulent times in which he lived.

Since the late 1970s, however, students have been asked to write more, and teachers have been expected to teach writing more specifically. In spite of this mandate, however, little has been done to prepare teachers for this shift in the curriculum. This primer provides a brief history of the field, as well as an exploration of what we now know about teaching. Teachers entering the field as well as seasoned veterans will find how to foster student writers, and to grow as writers themselves.
