now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Proceeding of the Second Aceh International Nursing Conference 2019 (2nd AINC 2019), August 21-22, 2019, Banda Aceh, Indonesia Routledge

Written by clinical lecturers, *Professional Transitions in Nursing* provides a practical and accessible guide to the core knowledge and skills required by nurse graduates entering the Australian workforce for the first time. Part I focuses on the structure of the Australian healthcare system and the national competency standards. The authors examine key issues including ethics, law and codes of conduct as well as the leadership, team-building and communication skills necessary in a constantly changing and high-pressure environment. Part II outlines the clinical skills and practices a nurse graduate must master including clinical assessment, risk management and reporting, management plans, diagnostics reasoning, collaboration with other health professionals and working with patients from diverse backgrounds. A special feature is an analysis of issues in Aboriginal and Torres Strait Islander nursing practice. The authors also outline health information systems and technologies and how to utilise these most effectively. Part III looks at career planning and lifelong learning with advice on applying for a nursing position and continual professional development. This is an essential reference for both nursing graduates and overseas qualified nurses seeking to pursue a career in Australia. 'This text will be of tremendous use to new graduate nurses, nurses relocating from overseas and those of us who support these nurses during their transitions. The language is easily accessible and important content about everyday nursing practice is discussed in a practical and logical way. A particular strength is the use of research to support key points of discussion.' Professor Andrea Marshall, Professor of Acute and Complex Care Nursing, Griffith University 'This book is a must-have for undergraduates, newly graduated and overseas qualified registered nurses entering the Australian healthcare workforce for the first time. Written by experienced nurses, the book provides essential up-to-date information that is presented in an easily accessible way. I highly recommend this book.' Associate Professor Jacqueline Bloomfield, Sydney Nursing School, University of Sydney 'For educators supporting student, new graduate and international graduate nurses, this text will be an important resource and is superbly structured to guide curriculum development and delivery.' Dr Danny Hills, Senior Lecturer, School of Nursing and Midwifery, Monash University
The Official NLN Guide to the CNE Exam IGI Global

This book presents a mobile technology capacity building framework that offers academics, students, and practitioners involved in workplace education a deeper understanding of, and practical guidance on, how mobile technology can enhance professional learning. Approaching professional and workplace learning as a hybrid space in which work, learning and technology meet, the book discusses the value of mobile technology in shaping professional education, particularly during student placements. The framework focuses on staying professional and safe, considering issues of time and place, planning learning activities, initiating dialogue, networking, creating learning opportunities on-the-go, and deepening reflection. It is designed to assist students and their educators to use mobile technology knowledgeably and responsibly, and to help bridge the gap between university learning and workplace practice. This book also contributes to a better understanding of the interconnectedness between learning, practice and technology. It

demonstrates how to enhance learning and working with mobile technology by drawing on two perspectives: the 'professional-plus' and the 'deliberate professional'.

Getting the Most From Nursing School: A Guide to Becoming a Nurse Springer Publishing Company
"Through case studies, practical examples and in-depth analysis of successful programs, this book provides a roadmap for creating a more welcoming environment for minority students and faculty, revamping traditional teaching methods to accommodate diverse learning styles, developing and teaching a culturally competent nursing curriculum, and removing cultural and linguistic barriers to success...this landmark book is an invaluable resource and absolutely essential reading." -- Minority Nurse Magazine " Readers will learn more about how to create a dynamic, inclusive and challenging learning environment that remains true to the purpose of graduating highly qualified nurses to meet the need of a diverse multiracial, multicultural, multilingual society." --Gloria Smith, RN, MPH, PhD, FAAN, FRCN Boshier and Pharris's provocative and timely volume addresses the critical need for nursing educational systems to graduate more culturally diverse nurses. This vital resource will help nursing educators critique and redesign their curricular, pedagogical, and structural systems to address this need for cultural inclusion within nursing education. Highlights of this book: Addresses barriers to success for nursing students from culturally diverse backgrounds in the U.S., U.K., Canada, Australia, and New Zealand Features pedagogical strategies to help linguistically diverse students succeed in clinical settings Provides assessment practices that eliminate cultural and linguistic biases Presents initiatives for developing the leadership skills of culturally diverse students Contains detailed case studies of multicultural nurses and students Includes recommendations and questions for dialogue at the end of each chapter With this book, educators and administrators can begin to forge through the obstacles institutionalized in their nursing educational systems, and ultimately, see a more culturally inclusive educational environment.

The Doctor of Nursing Practice: A Guidebook for Role Development and Professional Nursing Practice Jones & Bartlett Learning

Be more creative in any setting. Here are nearly 200 practical, relevant, and easy-to-implement teaching strategies that will help engage your students in any classroom setting. Dr. Judith Herrman offers techniques gathered over many years from her own teaching experiences that are adaptable to personal teaching content, meet the needs of a variety of learning styles, and demonstrate innovation in nursing education.

Mastering Academe Jones & Bartlett Learning

Research shows that the sharing of personal, first-hand stories not only enhances learning and eases the transition to a new role, but also helps novice educators to understand that their challenges are shared by others. With the goal of improving the experience of nurses transitioning from clinician to educator, in hospitals as well as schools of nursing, this unique book presents the stories of nurses who made this transition. It presents the findings of several qualitative studies addressing the question, 'What is the lived experience of clinicians as they assume new roles as clinical nurse educators?' These narratives describe the challenges they faced and transformations in each nurse's identity and relationships during the transition process. The text includes recommendations from the Carnegie Foundation for the Advancement of Teaching and specific problem-solving strategies that

have worked for others. The narratives are from nurse clinicians, nurse educators, and students who provide insights into such common dilemmas faced by novice educators as "How do I keep a patient safe while allowing the student nurse to practice a skill for the first time?" "If a student is slow to catch on to a procedure, how long do I wait before they fail?" "How do I help provide a safe and effective learning environment for new graduate nurses?" The book includes stories of students who describe caring and uncaring experiences with clinical nurse educators. Stories address cultural diversity, bullying, and dilemmas related to critical and ethical thinking. Nurse educators themselves share insights into what they wish they had done differently to guide students and new graduate nurses in their learning. While these storytellers had diverse clinical and educational backgrounds, there were consistent similarities between the experiences they described. One common thread was the need to embrace the role of a novice in order to succeed. The book will serve as a valuable text for graduate students in nurse educator courses as well as students and nurses seeking support, insight, and inspiration in their transition to the clinical nurse educator role. Key Features: Presents experiential narratives from nurses who made the transition from clinician to educator Describes important aspects of a nurse's transition from the role of clinical expert to that of novice educator Includes research-based insights in a highly accessible style and format Integrates National League for Nursing Core Competencies into the text Provides inspiring, helpful, and comforting guidance for nurse clinicians feeling lost or confused in a new role

Education for Practice in a Hybrid Space Springer Publishing Company

The Doctor of Nursing Practice A Guidebook for Role Development and Professional Nursing Practice, Fifth Edition remains the most comprehensive guide for both role and career development for the DNP student and professional

[The Doctor of Nursing Practice](#) iUniverse

This will provide an excellent knowledge and information across academicians, professionals, and government to optimize healthcare quality and safety around the globe.

Certified Nurse Educator Review Book Routledge

The authors of this review manual have captured all of the elements of simulation from establishing the objectives of simulated learning experiences, to constructing scenarios, to debriefing students and the simulation team, to assessing and evaluating the learning that has accrued. They have also described the range of simulation options and the contexts for their most effective use. ;Gloria F. Donnelly, PhD, RN, FAAN, FCPP, Dean and Professor College of Nursing and Health Professions, Drexel University Health professionals embarking on a career teaching simulation are embracing a world of innovation in which both teacher and student can develop their healthcare skills more rapidly and promote better patient outcomes. This is the first practice manual to assist healthcare simulation educators in the United States and internationally in preparing for certification in this rapidly emerging field. The authors, noted experts in simulation and education, have carefully analyzed the CHSE blueprint to ascertain what material is most likely to be covered. They present this information in a user-friendly, pithy outline format. This review manual provides numerous

features that help students to critically analyze test content, including end-of-chapter review questions, test-taking strategies, and a comprehensive practice test with answers and rationales. It features current evidence-based teaching practices and incorporates case studies to connect simulation situations to simulation education with healthcare students and includes information about advanced certification and recertification. KEY FEATURES: Comprises the first review book for the CHSE exam Follows the CHSE test blueprint Fosters optimal learning and retention through use of a pithy outline format Provides Teaching Tips feature for best simulation practice Includes Evidence-Based Simulation Practice boxes that focus on current research Incorporates case studies, 230+ test questions, end-of-chapter practice questions, and test-taking strategies The Certified Healthcare Simulation Educator and CHSE marks are trademarks of the Society for Simulation in Healthcare. This manual is an independent publication and is not endorsed, sponsored, or otherwise approved by the Society.

Family Nurse Practitioner Certification Intensive Review Springer Publishing Company

This practical text guides novice nurse educators step-by-step through the process of becoming a confident nurse educator, and discusses how to transition from the service setting to the academic setting. It is the only text to comprehensively address not just the teaching and curriculum development components of being an educator, but also the many other skills and duties inherent in this role. Based on the author's personal journey from nursing practice to academe, the text offers a hands-on approach to this challenging process and conveys the author's hard-earned wisdom as she faced hurdle after hurdle but eventually gained tremendous gratification as a nurse educator. The book addresses ways to "test the waters" to see if the teaching role is right for you, outlines educational preparation requirements, and demonstrates how to utilize past nursing experiences in this new role. It discusses learning styles, curriculum development, theoretical frameworks, legal issues, professional ethics, cultural diversity, and students with learning disabilities. The role of the faculty member is covered in such topics as tenure and promotion, collegiality, service, leadership, and mentoring. The book also addresses writing for publication, research, and scholarly activities. Included in each chapter are learning objectives and review questions, along with suggested assignments intended to assist the teacher and student in professional role development.

Additionally, the text prepares students for the interview process and includes sample CVs, patient education handouts, course objectives, and additional resources. The book will be of value in both academic and hospital settings. Key Features: Provides highly practical, step-by-step information on all components of being a nurse educator/faculty member Helps nurses transition from service role to educator/faculty role Includes reflections and advice from novice and seasoned nurse educators, nurse leaders, and a well-known nursing theorist Includes learning objectives and review questions in each chapter Provides samples of forms and documents for developing course content and sample CVs

[Certified Nurse Educator \(CNE\) Review Manual](#) Jones & Bartlett Learning

"Assists both new and seasoned nurse educators in creatively applying pedagogical theory in the classroom. The text provides successful teaching strategies and skills, as well as dynamically illustrates interactive simulations and approaches that will help involve students in active, independent learning."--

Interview Questions and Answers How 2 Become Ltd Cracking the Nursing Interview Deg Press

Third Edition Springer Publishing Company

Print version of the book includes free access to the app (web, iOS, and Android), which offers interactive Q&A review plus the entire text of the print book! Please note the app is included with print purchase only. The third edition of this classic study guide for nurse educators taking the CNE exam continues to be the only concise review book to feature a systematic approach to exam preparation. Presented in both book and e-book format, it is updated throughout and includes a more in-depth focus on distance-learning modes along with new content on global initiatives and interdisciplinary and interprofessional education. A majority of the Q&As have been revised to reflect a stronger integrative and application focus, and 100 new questions have been added throughout the book for a total of 350 questions. Chapter references have been updated to provide opportunity for further study. The third edition is also geared for use by nurse educators in Canada who intend to take the CNE exam. The CNE review, designed for use by both novice and expert nurse educators, incorporates all content areas designated by the National League for Nursing (NLN) as essential knowledge in the field. It is formatted to closely reflect the test blueprint. Valuable features include case studies and critical thinking questions, Evidence-Based Teaching Practice boxes, "Teaching Gems" offering advice from practice experts, review questions at the end of each chapter, and a practice CNE exam with answers and rationales. New to the Third Edition: More in-depth focus on distance-learning modes New content on global initiatives Additional information on interdisciplinary and interprofessional education 100 additional review questions reflecting a higher integrative and application focus CNE app with updated Q&As and rationales available as a separate purchase Key Features: Offers systematic approach to exam preparation Closely reflects the NLN test blueprint Highlights areas designated by the NLN as essential knowledge Includes case studies, critical thinking questions, 350 practice questions with rationales, and practice test Provides Evidence-Based Teaching Practice Boxes and "Teaching Gems" from practice experts

Research Anthology on Nursing Education and Overcoming Challenges in the Workplace Springer

The field of nursing currently faces a shortage of both nurses and nursing faculty. Yet, little is known about why clinical nurses opt to become nursing faculty. Qualitative investigations into this phenomenon are particularly rare. This study addressed these gaps in the context of career choice of faculty associate degree nursing (ADN) programs. The qualitative analysis was guided by Astin's (1984) psychosocial model of career choice. The central research question was, "What factors influence the career choice of nurse educators currently teaching in Kentucky associated degree nursing programs?" Faculty from the 20 ADN programs in public community colleges and 4-year institutions in Kentucky were studied. Two instruments were developed: Background Questionnaire for Nurse Educators (BQ) and Nurse Educator Interview Schedule (IS). Using purposeful sampling, one individual from each program comprised a matrix representing educational attainment, years of nursing faculty experience, and college size. Responses from semi-structured interviews were recorded and transcribed. Data for the 19 participants were entered into a Coded Master Analytical Tool (43 interview questions and 10 background survey items). Faculty interviews were synthesized into the Summarized IS Response Matrix and analyzed for concepts, themes, and patterns. Results were organized by the seven research questions and subquestions, mapped to the BQ and IS. Several findings had not been previously noted in the literature. Only the most prominent findings are noted here, including: (a) flexibility and role autonomy are key reasons for moving from clinical nursing to educator role; (b) faculty are sustained by psychic rewards of student relationships and success; (c) feedback from fellow faculty, administrators, and students is valuable; (d) new faculty lacked confidence in lecture preparation, examinations, and curriculum development, were comfortable with clinical evaluation and technology; (e) promotion/tenure and external service were confusing and negatively perceived; (f) love of teaching and lifelong learning were important aspects of their job; and (g) these different benefits compensated for lack of salary parity. The 19 responses resulted in few differences across the subgroups for educational attainment, years of nursing faculty experience, and college size.
