Indians Cavendish Square Publishing, LLC Collage and Architecture is the first book to cover collage as a tool for design in architecture, making it a valuable resource for students and practitioners. Author Jennifer Shields uses the artworks and built projects of leading artists and architects, such as Le Corbusier, Daniel Libeskind, and Teddy Cruz to illustrate the diversity of collage techniques. The six case study projects from Mexico, Argentina, Sweden, Norway, the United States, and Spain give you a global perspective of architecture as collage. Collage is an important instrument for

analysis and design, and Shields's presentation of this versatile medium draws on decades of relevance in art and architecture, to be adapted and transformed in your own work.

NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post • NPR • The Guardian • Kirkus Reviews • The fiction of multiple award-winning author China Miéville is powered by intelligence and imagination. Like George Saunders, Karen Russell, and David Mitchell, he pulls from a variety of genres with equal facility, employing the fantastic not to escape from reality but instead to interrogate it in provocative, unexpected ways. London awakes one morning to find itself besieged by a sky full of floating icebergs.

Destroyed oil rigs, mysteriously reborn, clamber from the sea and onto the land, driven by an obscure purpose. An anatomy student cuts open a cadaver to discover impossibly intricate designs carved into a corpse's bones—designs clearly present from birth, bearing mute testimony to . . . what? Of such concepts and unforgettable images are made the twenty-eight stories in this collection—many published here for the first time. By turns speculative, satirical, and heart-wrenching, fresh in form and language, and featuring a cast of damaged yet hopeful seekers who come face-to-face with the deep weirdness of the world—and at times the deeper weirdness of themselves—*Three Moments of an Explosion* is a fitting showcase for one of literature's most original voices. Praise for *Three Moments of an Explosion* "China Miéville is dazzling. His latest collection of short stories, *Three Moments of an Explosion*, crowds virtuosity into every sentence."—The New York Times "You can't talk about [China] Miéville without using the word 'brilliant.' . . . His wit dazzles, his humour is lively, and the pure vitality of his imagination is astonishing."—Ursula K. Le Guin, The

Guardian "[A] gripping collection . . . Miéville expertly mixes science fiction, fantasy and surrealism. . . . Amid the longer stories are more cerebral, poetic flash pieces that will haunt the reader beyond the pages of this exceptional book."—The Washington Post "The stories shine . . . with a winking brilliance."—The Seattle Times "Mind-bending excursions into the fantastic."—NPR "Bradbury meets Borges, with Lovecraft gibbering tumultuously just out of hearing."—Kirkus Reviews (starred review) "Three Moments of an Explosion is a book filled with fabulous oddities."—Entertainment Weekly "Miéville moves effortlessly among realism, fantasy, and surrealism. . . . His characters, whether ordinary witnesses to extraordinary events or lunatics operating out of inexplicable compulsions, are invariably well drawn and compelling."—Publishers Weekly (starred review)

Crocodiles and Alligators After Dark Cambridge Scholars Publishing

This volume contains the proceedings of the NATO Advanced Study Institute on "Picture Archiving and Communication Systems (PACS) in Medicine" held in Evian,

France, October 14- 26, 1990. The program committee of the institute consisted of H.K. Huang (Director), Osman Ratib, Albert Bakker, and Gerd Witte. This institute brought together approximately 90 participants from 15 countries. These proceedings are the accumulation of eight years of research and development results in PACS by various dedicated groups throughout the world. The purpose of this institute was to review the most recent technology available for PACS and some clinical results. The readers should notice the remarkable advances in this field by comparing the contents in these proceedings with those in a previous institute on "Pictorial Information Systems in Medicine" held August 27 - September 7, 1984 in Braunlage/Harz, Federal Republic of Germany, and published as Vol. 19 in this series. The institute was organized according to four categories: PACS components and system integration, PACS and related research in various countries and manufacturing companies, clinical experience and research support, and participants' scientific communications. In PACS components, we included image acquisition, workstations,

data storage and networking. In system integration, topics on interfaces between Hospital Information System (HIS), Radiology Information System (RIS) and PACS, clinical reports, the ACR/NEMA standard, databases, reliability, and system integration were discussed. This lecture series emphasized the technical detail and "how to" aspects.

Ever wonder what really goes on among our four-legged friends after we leave the room? In *Animal Antics*, the secret is finally out. The animals are having a ball-and-reading this book, you will too. Cats ride scooters, ducks dance the cancan, beagles lounge at the spa, and, yes, dogs do play poker! Behind this shocking expose is veteran photographer (and digital-manipulation wizard) John Lund. Lund uses amazing digital sleight of hand to endow a menagerie of animals with eerily and uncannily human qualities. The text of the book is equally playful with tasty morsels of advice like "Learn to pamper your soul," "Sharpen your survival skills," and "Chill out as needed." Many of the images in *Animal Antics* have been featured in a

best-selling greeting card line of the same name.

Super Human Encyclopedia Penguin
For decades, people have made certain assumptions about photographs, the primary one being that they are truthful in depicting reality. While this is true in many cases, it is not always so. This book traces the rise of photography's perceived veracity. It shows why a combination of pre-knowledge of early developments in imagery, a persistent marketing campaign espousing the accuracy of photographs and a perception by users that what they got from their photographs was an accurate depiction acted to create the belief in the photograph's veracity. The book uses philosophy, physiology, psychology and photography to tell this story and concludes by describing a system of identification that could be used to separate images that are not always what they seem. The turbulence caused to photography with the introduction of digital imaging is described and is the impetus for the beginning of the discussion about where photography sits today amongst other images.

Image sequence processing is becoming a tremendous tool to analyze spatio-temporal data in all areas of natural science. It is the key to study the dynamics of complex scientific phenomena. Methods from computer science and the field of application are merged establishing new interdisciplinary research areas. This monograph emerged from scientific applications and thus is an example for such an interdisciplinary approach. It is addressed both to computer scientists and to researchers from other fields who are applying methods of computer vision. The results presented are mostly from environmental physics (oceanography) but they will be illuminating and helpful for researchers applying similar methods in other areas.

In Edmonds Then and Now, vintage photographs have been recreated from the original photographers' perspectives and supplemented with images and stories that provide context to what people

experienced when they were taken. The old photographs have been refreshed with the latest technologies. The result is a celebration of Edmonds' indomitable spirit, enduring through fire and snow, trials, and tribulations. The book is not only a way to imagine what it was like to live in Edmonds over the last century, but it is also a tool that can be used to experience the town's history while exploring its streets in a new and exciting way.

Fitness and Wellness in Canada

National Geographic Books

This step-by-step guide, written by a best-selling author and former Wall Street titan, provides all the information--and inspiration--you need to feel better, reduce aches and pains, and push back against aging with a personalized fitness program that's right for you. Whatever your fitness goals or preferences, this book is designed to help you pursue the health program that works for you. An inspirational speaker, author, and former Wall Street rainmaker, Jim Owen was 70 when he decided he had to get fit. Years of a chair-bound lifestyle were taking their toll. Realizing that the old bodybuilding approach was no way to tackle the

stiffness, weakness, and aches and pains that come with age, he set off on a journey of discovery and transformation. With help from the experts, he developed a common-sense, step-by-step program that can be tailored to any level of physical ability. Along the way he learned why cardio machines aren't enough, what it takes to be "functionally fit" for daily life, and how to stay motivated. Today, Owen is in better shape than he was at 25, and he is a passionate evangelist for fitness as a way of life. He has proved that you don't have to be powerless in the face of advancing years: if you make a commitment to "just move," you can take charge of the aging process and make your coming years the best they can be. The book is divided into two sections, with the first providing fascinating information and the second showing step-by-step details of how to put the best fitness principles into practice.

Life According to Maude Bloomsbury Publishing USA

Meee-ow! The word "catty" in the dictionary just got a new picture . . . and it's none other than the Queen of Attitude herself, Maude. Maude-for anyone who

may have been preoccupied with hairballs and such-is the fabulously popular kitty with her very own line of greeting cards. We're not talking a mouse-sized 10 or 20 slicks here, but a full line of 60-plus cards displaying this furry diva and her bon mots. *Life According to Maude* captures our feline diva in full "cattitude." Each page shares the world according to Maude and pictures her resplendent in all her well-whiskered glory. Consider towel-wrapped Maude perched in her favorite salon chair saying, "When life gets stressful, nothing soothes the soul like the great indoors." Or Maude sporting her favorite pearl necklace (what self-respecting cat would have just one?), reflecting, "Relationships are a two-way street. My way and the wrong way!" Photographer John Lund captures this catchy cat at her all-time best, and then works with a wacky creative team to craft the unforgettably funny scenes and sayings that go with them. The resulting "catmosphere" makes for one of the freshest and zaniest gift books in years. [Iraq](#) Routledge

Music videos promote popular artists in cultural forms that circulate widely across

social media networks. With the advent of YouTube in 2005 and the proliferation of handheld technologies and social networking sites, the music video has become available to millions worldwide, and continues to serve as a fertile platform for the debate of issues and themes in popular culture. This volume of essays serves as a foundational handbook for the study and interpretation of the popular music video, with the specific aim of examining the industry contexts, cultural concepts, and aesthetic materials that videos rely upon in order to be both intelligible and meaningful. Easily accessible to viewers in everyday life, music videos offer profound cultural interventions and negotiations while traversing a range of media forms. From a variety of unique perspectives, the contributors to this volume undertake discussions that open up new avenues for exploring the creative changes and developments in music video production. With chapters that address music video authorship, distribution, cultural representations, mediations, aesthetics, and discourses, this study signals a major initiative to provide a deeper

understanding of the intersecting and interdisciplinary approaches that are invoked in the analysis of this popular and influential musical form.

Many of acclaimed photographer John Lund's images are instantly recognizable. What's not instantly recognizable are the elements that make up these composite images or the Photoshop techniques behind them--to unravel "those" mysteries, you need this beautiful, full-color volume. In these pages, Lund and co-author Pamela Pfiffner show you not just how to reproduce his results but the creative process that generates them. The emphasis here is on simplicity: how to create extremely complex images using a few, fairly simple Photoshop techniques that even beginners can grasp. After providing an introduction to the creative process and conceptual imagery in general, the authors get to the heart of the volume: "the images." Each of the 15 chapters deconstructs an incredible Photoshop compositing process showing the final image--in full-page, full-color glory--with an accompanying description

of Lund's creative approach to the assignment, and a detailed, step-by-step explanation of particular techniques used in the project. So how'd he make that fire-breathing dragon? Why, with images of a pet iguana, flame, a wall, and the sky, of course!

Depicting Canada's Children is a critical analysis of the visual representation of Canadian children from the seventeenth century to the present. Recognizing the importance of methodological diversity, these essays discuss understandings of children and childhood derived from depictions across a wide range of media and contexts. But rather than simply examine images in formal settings, the authors take into account the components of the images and the role of image-making in everyday life. The contributors provide a close study of the evolution of the figure of the child and shed light on

the defining role children have played in the history of Canada and our assumptions about them. Rather than offer

comprehensive historical coverage, this collection is a catalyst for further study through case studies that endorse innovative scholarship. This book will be of

interest to scholars in art history, Canadian history, visual culture, Canadian studies, and the history of children.
