In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Where end-users once queued up to ask the IT department for permission to buy a new computer or a new version of software, they are now bypassing IT altogether and buying it on their own. From laptops and smartphones to iPads and virtually unlimited software apps, end-users have tasted their freedom and love it. IT will simply never be the same.Bri

*Flight Training* University of Chicago Press

A field-tested guide to surviving a nuclear attack, written by a revered civil defense expert. This edition of Cresson H. Kearny's iconic Nuclear War Survival Skills (originally published in 1979), updated by Kearny himself in 1987 and again in 2001, offers expert advice for ensuring your family's safety should the worst come to pass. Chock-full of practical instructions and preventative measures, Nuclear War Survival Skills is based on years of meticulous scientific research conducted by Oak Ridge National Laboratory. Featuring a new introduction by ex-Navy SEAL Don Mann, this book also includes: instructions for six different fallout shelters, myths and facts about the dangers of nuclear weapons, tips for maintaining an adequate food and water supply, a foreword by "the father of the hydrogen bomb," physicist Dr. Edward Teller, and an "About the Author" note by Eugene P. Wigner, physicist and Nobel Laureate. Written at a time when global tensions were at their peak, Nuclear War Survival Skills remains relevant in the dangerous age in which we now live.

**Actuaries' Survival Guide** Penguin

Fourteenth in a series of annual reports comparing business regulation in 190 economies, Doing Business 2017 measures aspects of regulation affecting 10 areas of everyday business activity: • Starting a business • Dealing with construction permits • Getting electricity • Registering property • Getting credit • Protecting minority investors • Paying taxes • Trading across borders • Enforcing contracts • Resolving insolvency These areas are included in the distance to frontier score and ease of doing business ranking. Doing Business also measures features of labor market regulation, which is not included in these two measures. This year's report introduces major improvements by expanding the paying taxes indicators to cover postfiling processes—tax audits, tax refunds and tax appeals—and presents analysis of pilot data on selling to the government which measures public procurement regulations. Also for the first time this year Doing Business collects data on Somalia, bringing the total number of economies covered to 190. Using the data originally developed by Women, Business and the Law, this year for the first time Doing Business adds a

gender component to three indicators—starting a business, registering property, and enforcing contracts—and finds that those economies which limit women's access in these areas have fewer women working in the private sector both as employers and employees. The report updates all indicators as of June 1, 2016, ranks economies on their overall "ease of doing business"?, and analyzes reforms to business regulation "+" identifying which economies are strengthening their business environment the most. Doing Business illustrates how reforms in business regulations are being used to analyze economic outcomes for domestic entrepreneurs and for the wider economy. It is a flagship product produced in partnership by the World Bank Group that garners worldwide attention on regulatory barriers to entrepreneurship. More than 137 economies have used the Doing Business indicators to shape reform agendas and monitor improvements on the ground. In addition, the Doing Business data has generated over 2,182 articles in peer-reviewed academic journals since its inception.

Comprehensive Preparedness Guide (CPG) 101 provides guidelines on developing emergency operations plans (EOP). It promotes a common understanding of the fundamentals of risk-informed planning and decision making to help planners examine a hazard or threat and produce integrated, coordinated, and synchronized plans. The goal of CPG 101 is to make the planning process routine across all phases of emergency management and for all homeland security mission areas. This Guide helps planners at all levels of government in their efforts to develop and maintain viable all-hazards, all-threats EOPs. Accomplished properly, planning provides a methodical way to engage the whole community in thinking through the life cycle of a potential crisis, determining required capabilities, and establishing a framework for roles and responsibilities. It shapes how a community envisions and shares a desired outcome, selects effective ways to achieve it, and communicates expected results. Each jurisdiction's plans must reflect what that community will do to address its specific risks with the unique resources it has or can obtain.

*Nuclear War Survival Skills* World Bank Publications

"In Speculative Communities, Komporozos-Athanasiou examines the ways that financial speculation has moved beyond markets to shape fundamental aspects of our social and political lives. As ordinary people make exceptional decisions--such as the American election of a populist demagogue or the British vote to leave the European Union--they are moving from time-honored and -tested practices of governance, toward the speculative promise of a different kind of future. Even our methods of building community have shifted to the speculative realm as social media platforms enable and amplify alternative visions of the present and future--these are the "speculative communities" that now shape our personal and political realities. For Komporozos-Athanasiou, "to speculate" means increasingly "to connect," to endorse uncertainty preemptively, and often daringly, as a means of social survival. Finance has thus become the model for society writ large. These financial systems have taken a notable turn in our current era, however.

Contemporary capitalism sees the risk-taking, entrepreneurial person being refashioned as a politically disoriented, speculative subject, who embraces the future's radical uncertainty rather than averting it. As Komporozos-Athanasiou shows, virtual marketplaces, new social media, and dating apps function as finance's speculative infrastructures, leading to a new type of imagination across economy and society"--

The Monkey Wrench Gang Orange Grove Texts Plus

"Flight Training: Taking the Short Approach" was written as an aviation primer and provides an introduction to the whole flight training process. As freshman rely on seniors to learn the ropes, readers will find themselves turning time and time again to David Diamond's guidance and recommendations. Starting with a look at what's involved in the initial decision to take flight lessons, this book is a comprehensive orientation to flight training that tackles the subject of aviation training from the perspective of discovery rather than syllabus. Aviation is a circular subject that has no perfect point of entry when taught. There is no aspect of aviation that doesn't require at least some understanding of another aviation topic. "Short Approach" does away with the traditional topic-by-topic approach to aviation instruction, instead allowing the reader to fall into the subject right from the start, helped along by the author's conversational style and friendly humor in sharing his experiences. This book makes the ideal first read for anyone who intends to start flight training; it should be considered "Flight Training 101." Diamond does not assume any aviation knowledge on the part of the reader. His book is the ideal handbook for student pilots, covering such topics as why people fly, the process of learning to fly -- including money matters, health requirements, time commitments, school and instructor options, and the tests involved -- and the privileges and limitations associated with a pilot certificate. From there, the author dispels frequent concerns of learning to fly, such as the realities of engine failures, midair collisions, and weather. The airplane is covered with an orientation to the controls and instrumentation, and showing which maneuvers students will be flying throughout the pilot curriculum. The book concludes by discussing which gizmos can help with training, which can hurt the learning process, and which are necessary if not only for the "cool" factor. Since the author is also an accomplished illustrator, the text is accompanied by some of the best full-color and 3D graphics found in any aviation textbook -- readers will have a solid "mind's eye view" of the flight training process. As a result, they will enter their flight training program completely prepared, knowing exactly what needs to happen to get their license, understanding what to expect and being able to make the right decisions, so no time is wasted at the airport or in the airplane -- "taking the short approach to flight training."

**The Future of Finance** First Second Books

Content and Content Management are core topics in the IT and broadcast industry. However these terms have not been clearly defined for those learning the field. The topic is complex and users from different industries have different backgrounds and a varied understanding of content issues. Multimedia Content Management helps to clarify the subject area, define problematic issues and establish a universal understanding of content and its management. \* Provides clarity in the subject area \* Defines potential problems and establishes a universal understanding \* Builds an architectural framework upon this account and different aspects of the industry and solutions are reviewed \* Comprehensively describes the different users working and accessing content, the applications and workflows Essential reading for students, engineers and technical managers, in the area of data, storage management and multimedia, requiring an overview of this complex topic. The topics discussed will also prove highly insightful for executive managers and media professionals with a technical understanding and broadcast executives in the field.

Meant to aid State & local emergency managers in their efforts to develop & maintain a viable all-hazard emergency operations plan. This guide clarifies the preparedness, response, & short-term

recovery planning elements that warrant inclusion in emergency operations plans. It offers the best judgment & recommendations on how to deal with the entire planning process -- from forming a planning team to writing the plan. Specific topics of discussion include: preliminary considerations, the planning process, emergency operations plan format, basic plan content, functional annex content, hazard-unique planning, & linking Federal & State operations. [The DAM Book](#) Rothstein Publishing

A motley crew of saboteurs wreaks havoc on the corporations destroying America's Western wilderness in this "wildly funny, infinitely wise" classic (The Houston Chronicle). When George Washington Hayduke III returns home from war in the jungles of Southeast Asia, he finds the unspoiled West he once knew has been transformed. The pristine lands and waterways are being strip mined, dammed up, and paved over by greedy government hacks and their corrupt corporate conspirators. And the manic, beer-guzzling, rabidly antisocial ex-Green Beret isn't just getting mad. Hayduke plans to get even. Together with a radical feminist from the Bronx; a wealthy, billboard-torching libertarian MD; and a disgraced Mormon polygamist, Hayduke's ready to stick it to the Man in the most creative ways imaginable. By the time they're done, there won't be a bridge left standing, a dam unblown, or a bulldozer unmolested from Arizona to Utah. Edward Abbey's most popular novel, *The Monkey Wrench Gang* is an outrageous romp with ultra-serious undertones that is as relevant today as it was in the early days of the environmental movement. The author who Larry McMurtry (Lonesome Dove) once dubbed "The Thoreau of the American West" has written a true comedic classic with brains, heart, and soul that more than justifies the call from the Los Angeles Times Book Review that we should all "praise the earth for Edward Abbey!" "Mixes comedy and chaos with enough chase sequences to leave you hungering for more."—The San Francisco Chronicle

Read James Wesley, Rawles's posts on the Penguin Blog In the vein of Sam Sheridan's *The Disaster Diaries*, a comprehensive guide to preparing for the apocalypse! With the recent economic crisis, formerly unimaginable scenarios have become terrifyingly real possibilities- learn how to prepare for the worst Global financial collapse, a terrorist attack, a natural catastrophe-all it takes is one event to disrupt our way of life. We could find ourselves facing myriad serious problems from massive unemployment to a food shortage to an infrastructure failure that cuts off our power or water supply. If something terrible happens, we won't be able to rely on the government or our communities. We'll have to take care of ourselves. In *How to Survive the End of the World as We Know It*, James Rawles, founder of [SurvivalBlog.com](#), clearly explains everything you need to know to protect yourself and your family in the event of a disaster-from radical currency devaluation to a nuclear threat to a hurricane. Rawles shares essential tactics and techniques for surviving completely on your own, including how much food is enough, how to filter rainwater, how to protect your money, which seeds to buy for your garden, why goats are a smart choice for livestock, and how to secure your home. It's the ultimate guide to total preparedness and self-reliance in a time of need.

[Developing and Maintaining Emergency Operations Plans](#) Taylor & Francis

An LAPD homicide detective must choose between justice and vengeance as he teams up with the FBI in this "thrilling" novel filled with mystery and adventure (New York Times Book Review). For maverick LAPD homicide detective Harry Bosch, the body in the drainpipe at Mulholland Dam is more than another anonymous statistic. This one is personal . . . because the murdered man was a fellow Vietnam "tunnel rat" who had fought side by side with him in a hellish underground war. Now Bosch is about to relive the horror of Nam. From a dangerous maze of blind alleys to a daring criminal heist beneath the city, his survival instincts will once again be tested to their limit. Pitted against enemies inside his own department and forced to make the agonizing choice between justice and vengeance, Bosch goes on the hunt for a killer whose true face will shock him.
