their children, more scientifically-based facts are needed on non-pharmacologic, non-analysis approaches. The Guest Editors of this issue in Psychiatric Clinics have been using, researching, and analyzing alternative approaches since the 1990s and present a scientifically based presentation of select therapies, such as Nutrients, Herbals, Off-label Medication uses, Mind-Body approaches, Meditation, Hypnosis, Electrotherapy, Light treatments and more. In the summer of 1991, Dr. Dudley Delany (a now retired chiropractor, massage therapist, and registered nurse) began experiencing numbness, blurred vision, difficulty swallowing, tremors, muscle spasms, depression, fatigue, failing memory, slurred speech, and bladder dysfunction. It was multiple sclerosis, a chronic neurological disease of the brain and spinal cord that afflicts an estimated 2-1/2 million people worldwide. In the fall

of that year, he began using an alternative treatment suggested by Edgar Cayce, a man many regard as the father of modern holistic medicine. It involved diet, massage, keeping a positive mental attitude, maintaining a high spiritual ideal, and consistent use of a very mild, usually imperceptible form of electrotherapy (vibratory medicine). Over a period of about two years, all of his symptoms gradually disappeared. This book documents Dr. Delany's successful conquest of MS, and it contains many easily followed recommendations potentially helpful in treating this disturbing, sometimes devastating disease. It is MUST reading for anyone with MS!

Excerpt from Mental and Physical Electropathy, or Electricity: Its Physiological Relations and Medical Applications The physiological relations of electricity, with its use in the treatment of diseases, to which I have seen fit to apply the term electropathy, mental and physical, are best understood by consider ing it in

connection with the more ponderable elements with which we are acquainted, in their organism and decomposition, and the influence of such changes in producing and curing disease. For centuries, the most eminent naturalists, philosophers and physicians have been laboring to trace out the various constituents of matter, with their chemical and physiological relations, that the effects of their natural and artificial changes may become palpable. These efforts have become successful in a high degree. The pathology of many diseases has been well established, their specifics are known, and a comparatively perfect system of medical science exists. But none will hazard the assertion, that that science is beyond the reach of improvement. In every land, its real friends, and the friends of humanity, are still eager to seize upon every rational opportunity to perfect the science - the foundation of the healing art. By one possessed of this desire in common with others, and for the purpose of contributing to so noble an object, these lines are indited. If not with equal success, it has been my privilege for years, while those around me have been engaged-with the

grosser elements, to study, and to experiment with a higher and more powerful agent. Though the term may be arbitrary, this agent will be here Spoken of as an element, and such classifications of elements given as will suit my present purpose. Legal issues in medical practice have been gripping medical doctors by surprise in recent years. Some decades ago legal issues in medical practice never created any problem. A greater awareness is being created by adding doctor's services within the ambit of Consumer Protection Act, 1986. Neither during the undergraduate training nor the postgraduate courses doctors have ever prepared themselves to deal with real-world situations of litigation related to allegations of negligence. While facing litigation related to allegation of negligence in law courts for the first time, a doctor realizes the importance of medical records, consent and expert witness and searches for help books. There are many books available for reference but this one is a handbook for practising doctors and their lawyers grappled with legal issues culminating in

litigations covering a vast number of medical specialties and systems. This book proposes to fill the existing vacuum by creating authentic base required to understand the legal issues in medical practice in India. The esteemed contributors have put in their best efforts to share their knowledge, experience and wisdom with the readers by discussing various landmark legal decisions in the field of (alleged) medical negligence. It aims to make the medical practice safe, ethical, reassuring and hassle-free by discussing various legal issues related to medical practice.

In 2002 Gracelyn Guyol's bipolar II mood swings were halted by doctors trained to treat all mental illnesses without drugs. To help consumers become aware of these options, she has authored three books: *Healing Depression & Bipolar Disorder Without Drugs* (2006); *Who's Crazy Here? Steps to Recovery Without Drugs* for nine mental diagnoses (2010); and her 2018 release, *Restoring Your Child's Mental Health*, 10 Innovative, Drug-free

Treatments. Each explains how all-natural, holistic protocols offer genuine healing, in lieu of taking pharmaceutical drugs that mask one's symptoms and cause serious side effects. Chapters in the new book describe 10 holistic treatments that fall into four categories: Quantum Healing. Homeopathy, BioEnergetic Assessment, and Homotoxicology, were developed over the past 200 years. The most widely used alternative medical treatments in the world, due to their effectiveness and low cost, they stimulate the body's own healing systems. Modern Bioresonance devices aid health by eliminating parasites and promoting detoxification. *Rebalancing the Brain*. The Fisher Wallace Cerebral Stimulator, a cranial electrotherapy device, treats depression, anxiety, insomnia, and pain. Brain Balance Achievement Centers use physical exercises, cognitive stimulation, and nutrition to correct imbalances in brain development in children, treating ADHD, Autism, Dyslexia, and Tourette's syndrome. NuCalm's cranial electrotherapy stimulation is designed to lower stress levels and improve sleep quality. Neurofeedback trains patients to

consciously improved brain wave balance using games, thus ending or lowering the symptoms of many mental disorders. Tapping for Relief. Emotional Freedom Technique is a mind-body therapy that rapidly releases emotional trauma, such as PTSD. By teaching patients how and where to tap on their body, they can permanently release anxiety, rage, or other emotional trauma, usually in 3-5 sessions. Natural Nutrient Repairs. Addiction cravings of all types, from opioids to internet use, are caused by low levels of the neurotransmitter dopamine. Recently, an all-natural, proprietary liquid amino acid and herbal blend was introduced by Kenneth Blum, PhD, a leading addiction researcher for 50 years. Two half-ounce doses, one in the morning and one in the evening, maintains dopamine levels and ends addictive cravings - and costs only \$42.99 for a month's supply. Nutrient Power, the final chapter in this book, outlines how specific natural supplements can correct nutritional deficits or excesses (inherited or acquired), halting or reducing the symptoms of schizophrenia and other major mental disorders. According to the World Health Organization, one out of four

people in the world will experience a mental illness in their lifetime. The National Institute of Health reports 80-117 million US residents have mental illnesses, yet only 15.7 million receive treatment annually. The problem is this country has only 156,300 mental health practitioners and the numbers are declining. Eighty-nine million mental patients live in professional shortage areas. Forty percent cannot afford any treatment. To improve their ability to find treatment, Gracelyn founded Mind Energy Innovations, Inc., a 501(C)(3) non-profit, in 2017. Its mission is to 1) raise consumer awareness of effective, drug-free, mental health treatments, and 2) sponsor accredited medical seminars for practitioners on holistic therapies, with a goal of increasing patients' access to treatment.
