Why has health care reform proved a stumbling block for provincial governments across Canada? What efforts have been made to improve a struggling system, and how have they succeeded or failed? In Paradigm Freeze, experts in the field answer these fundamental questions by examining and comparing six essential policy issues - regionalization, needs-based funding, alternative payment plans, privatization, waiting lists, and prescription drug coverage - in five provinces. Noting hundreds of recommendations from dozens of reports commissioned by provincial governments over the last quarter century - the great majority to little or no avail - the book focuses on careful diagnosis, rather than unplanned treatment, of the problem. Paradigm Freeze is based on thirty case studies of policy reform in Alberta, Saskatchewan, Ontario, Quebec, and Newfoundland and Labrador. The contributors assess the nature and extent of healthcare reform in Canada since the beginning of the 1990s. They account for the generally limited extent of reform that has occurred, and identify the factors associated with the relatively few cases of large reform. An insightful new perspective on a problem that has plagued Canadian governments for decades, Paradigm Freeze is an important addition to the field of health policy. Contributors include John Church (University of Alberta), Michael Ducie (Alberta Health and Wellness), Pierre-Gerlier Forest (Pierre Elliott Trudeau Foundation), Stephen Tomblin (Memorial University), Jeff Braun Jackson (Ontario Professional Firefighters Association, Burlington, ON), Marie-Pascale Pomey (Université de Montréal), John N. Lavis (McMaster University), Harvey Lazar (Queen's University), Elisabeth Martin (Université Laval),Tom McIntosh (University of Regina), Dianna Pasic (McMaster University), Neale Smith (University of British Columbia), and Michael G. La négociation des instruments financiers au regard de la directive MIF Food & Agriculture Org.

Variants of nonbank credit intermediation differ greatly. We provide a conceptual framework to help distinguish various characteristics—structural features, economic motivations, and risk implications—associated with different forms of nonbank credit intermediation. Anchored by this framework, we take stock of the evolution of shadow banking and the extent of its transformation into market-based finance since the global financial crisis. In light of the substantial regulatory and supervisory responses of recent years, we highlight key areas of progress while drawing attention to elements where work still needs to be done. Case studies of policy challenges arising in different jurisdictions are also discussed. While many of the amplification forces that were at play during the global financial crisis have diminished, the post-crisis reform agenda is not yet complete, and policy makers must remain attentive to new challenges looming on the horizon.

La directive sur les marchés d’instruments financiers 2004/39/CE (directive MIF, dite ‘MiFID’ en anglais) constitue la pierre angulaire de la réforme des marchés financiers entreprise par le Plan d’action pour les services financiers. Elle a bouleversé et harmonisé le cadre communautaire de négociation des instruments financiers en le rendant plus concurrentiel. La consécration, à coté des marchés réglementés, des MTF et des internalisateurs systématiques, opérés par des prestataires de services d’investissement, témoigne de l’effacement partiel des barrières entre ces prestataires, intermédiaires et marchés. L’ouvrage analyse le nouveau cadre de négociation dans une perspective juridique, tant historique que comparative, en l’opposant aux systèmes nationaux préexistants, ainsi qu’au cadre réglementaire américain. Sont également élaborées des voies d’action pour les plates-formes souhaitant gagner des parts de marché dans ce nouvel environnement de marché. Ce nouveau cadre de négociation plus concurrentiel est en même temps plus fragmenté, engendrant des risques pour la protection des investisseurs et pour le processus de découverte du prix de référence. Les investisseurs de détail sont désormais plus dépendants de leurs prestataires, alors que ceux-ci se voient dotés de fonctions supplémentaires, comparables aux bourses traditionnelles. à la veille de la réforme très vivement discutée de cette directive, l’ouvrage analyse les obligations matérielles – déontologiques et de transparence – contenues dans la directive. Leur étude vise à déterminer si elles suffissent à contrebalancer la fragmentation des ordres et à assurer la protection des investisseurs. Sur certains points, des voies de réforme sont proposées afin d’assurer que les objectifs de la directive sont atteints.
