PHOTOGRAPHY & PHOTOGRAPHS. The name Titanic has become synonymous with catastrophe, the story of this luxurious liner legendary. Wrecked after colliding with an iceberg on her maiden voyage, the loss of around 1,500 lives among her passengers and crew has gone down in history as one of the most emotive and tragic disasters in history. In this evocative collection of photographs the authors of Titanic The ShipMagnificent tell her full story, from the shipyards of Harland Wolff and its early vessels, with the backdrop of the great race to build the biggest and best passenger liner, to the frenzy of excitement surrounding her launch. Looking at her officers and crew, as well as her stops at Cherbourg and Queenstown - including some special, rare photographs - the book follows the story to its inevitable conclusion, considering the lifeboats, the presence of the Carpathia and the aftermath of the disaster.

With the rapid changes in the social, political, economic and technological landscape around the world, today's learners face a more globally competitive job market after leaving school. The 21st century, which is characterized by the emergence of knowledge-based societies, expects learners to be comfortable in dealing with ambiguities and complexities in the real world and to be able to use knowledge as a tool at their workplace. This book will help readers develop an in-depth understanding of authentic problem solving and learning, and how it can be used to make a difference in their school or learning communities for the development of 21st century competencies. Comprising 20 chapters written by Singapore-based and international authors, the book is organized into three themes: authentic problems, authentic practices, and authentic participation. It details innovative school practices (e.g. productive failure) concerning the design of problems, learning activities, learning environments, and ICT tools for authentic problem solving and learning. Along with theoretical explanations of authentic learning processes and outcomes, the book also elucidates how students learn by generating and exploring solutions to complex problems and which cognitive functions are needed at different stages of

problem-based learning. Presenting coherent descriptions of instructional design principles, successful cases and challenges encountered in K-12 schools and learning communities, the book provides useful information, new insights, and practical guidance for school directors, parents, teachers and researchers seeking to develop authentic learning environments for 21st century learners.

Magic Moon Amazon Crossing

From bestselling poet Daniel Ladinsky, a rich collection that brings the great Sufi poet Hafiz to Western readers To Persians, the poems of Hafiz are not "classical literature" from a remote past but cherished wisdom from a dear and intimate friend that continues to be quoted in daily life. With uncanny insight, Hafiz captures the many forms and stages of love. His poetry outlines the stages of the mystic's "path of love"—a journey in which love dissolves personal boundaries and limitations to join larger processes of growth and transformation. With this stunning collection, Ladinsky has succeeded brilliantly in capturing the essence of one of Islam's greatest poetic and spiritual voices. "If you haven't yet had the delight of dining with Daniel Ladinsky's sweet, playful renderings of the musings of the great saints, I Heard God Laughing is a perfect appetizer. . . . This newly released edition of his first playful foray into Hafiz's divinely inspired poetry is essential reading. . . . Ladinsky is a master who will be remembered for finally bringing Hafiz alive in the West."

Authentic Problem Solving and Learning in the 21st Century Routledge

Written from a vantage point both high and deliberately narrow, the early novels of the late British master Anthony Powell nevertheless deal in the universal themes that would become a substantial part of his oeuvre: pride, greed, and the strange drivers of human behavior. More explorations of relationships and vanity than plot-driven narratives, Powell's early works reveal the stirrings of the unequalled style, ear for dialogue, and eye for irony that would reach their caustic peak in his epic, *A Dance to the Music of Time*. In *Afternoon Men*, the earliest and perhaps most acid of Powell's novels, we meet the museum clerk William Atwater, a young man stymied in both his professional and

romantic endeavors. Immersed in Atwater's coterie of acquaintances—a similarly unsatisfied cast of rootless, cocktail-swilling London sophisticates—we learn of the conflict between his humdrum work life and louche social scene, of his unrequited love, and, during a trip to the country, of the absurd contrivances of proper manners. A satire that verges on nihilism and a story touched with sexism and equal doses self-loathing and self-medication, *Afternoon Men* has a grim edge to it. But its dialogue sparks and its scenes grip, and for aficionados of Powell, this first installment in his literary canon will be a welcome window onto the mind of a great artist learning his craft.

A Billion Years

Amberley Publishing Limited

This is the tragic story of the Titanic, the biggest and most luxurious ocean liner the world had ever seen, which sank on her maiden voyage in April 1912. Beautiful, double-page illustrations with amazing cross-sections and cutaway details explain the construction and mechanical details of this gigantic ship and reveal life onboard for passengers and crew. Each new illustration reveals different aspects of life in the early 20th century, and the text highlights hidden details for you to spot. As you follow the pictorial story of this world-famous liner, you will discover how she was built and equipped, what kind of passengers and crew she carried, and what facilities she offered onboard. You will also find out how she struck an iceberg and met with disaster, why she sank so quickly, how many people were saved, and how many lives were lost. You can compare the differences between the Titanic's passengers—from the first-class millionaires to the third-class emigrants—and find out how they dressed, where they ate and slept, and what they did to amuse themselves during the voyage. You can also take a closer look at some of the passengers and crew, and follow their different fates from the exciting start of the voyage to its tragic end.

Great Scientists Carol Publishing Corporation

This book is a groundbreaking history of balance, exploring how a new model of equilibrium emerged during the medieval period.

A Gamut of Games Simon and Schuster
