This book
constitutes
the refereed
proceedings of
the 6th
International
Conference on
Data Science,
ICDS 2019,

held in
Ningbo, China,
during May
2019. The 64
revised full
papers
presented
were carefully
reviewed and
selected from

<p>210 submissions. The research papers cover the areas of Advancement of Data Science and Smart City Applications, Theory of Data Science, Data Science of People and Health, Web of Data, Data Science of Trust and Internet of Things. <u>Innovation Management</u> World Scientific This handbook covers various areas of Higher Education (HE) in which operations research/man</p>	<p>agement science (OR/MS) techniques are used. Key examples include: international comparisons, university rankings, and rating academic efficiency with Data Envelopment Analysis (DEA); formulating academic strategy with balanced scorecard; budgeting and planning with linear and quadratic models; student forecasting; E- learning evaluation;</p>	<p>faculty evaluation with questionnaires and multivariate statistics; marketing for HE; analytic and educational simulation; academic information systems; technology transfer with systems analysis; and examination timetabling. Overviews, case studies and findings on advanced OR/MS applications in various functional areas of HE are included. <u>Air Transport</u></p>

The
development
of the
endogenous
growth model
rekindled
interest in
growth theory.
In contrast to
the neo-
classical
model, long-
run
endogenous
growth
emerged as
an equilibrium
outcome,
reflecting the
behaviour of
optimizing
agents in the
economy. This
book brings
together a
number of
contributions
in growth

theory and
macroeconomic
dynamics,
reflecting
these
developments
and the
ongoing
debate over
the relative
merits of neo-
classical and
endogenous
growth
models. It
focuses on the
emergence of
three
important
aspects: First,
it develops
growth
models that
extend the
underlying
theory in
different
directions.
Second, it
addresses one
of the
concerns of

the literature
on growth and
dynamics: the
statistical
properties of
underlying
data and the
effort to
ensure that
growth
models are
consistent
with empirical
evidence.
Third, it
discusses the
increasingly
international
focus of
macrodynamic
s and growth
theory, an
inevitable
consequence
of the
integration of
the world
economy.

Frank Fetter's 1904 treatise, 'Principles of Economics', pioneered a general theory of economics in the Austrian tradition. By tracing economic laws to individual human action, Fetter demonstrated that the price of each consumer good is determined solely by subjective value and the rate of interest solely by time preference. His work on capital and interest, rudimentary theory of the

trade cycle, and refutation of productivity theories of interest went unsurpassed for decades. 'Principles of Economics' is a seminal work that laid the foundation for modern Austrian economics and remains a must-read for any student of economics today.

Microeconomics IGI Global Managerial Economics, also known as business economics or Applied Microeconomics, helps in dealing with

business decisions and management units effectively. This book discusses the theories and applications of Managerial Economics with the help of its various quantitative techniques like operations research, mathematical programming, game theory for strategic decisions, and other computational methods. Divided into 8 sections and 24 chapters, the book shows how conveniently one can find a

<p>solution to the business problems, such as Risk analysis, Production analysis, Pricing, Budgeting, Sales promotion and so on with Managerial Economics tools. Section I analyses the economic behaviour of the consumers; Section II discusses producers' behaviour and issues related to the production; Sections III, IV and V talk about markets and firms and their types.</p>	<p>The concluding Sections VI, VII and VIII delve on the application part of Economics in human resource management, finance, marketing and strategy. The chapters are well-supported with the cases, figures and important facts. The book is equipped with pedagogical aids in the form of Summary, Glossary, Important Terms, Numerical Problems and Multiple</p>	<p>Choice Questions. Intended for the postgraduate students of Management, the book will be equally beneficial for the practising Managers. <i>A History of Economic Thought, 10th Edition</i> Educreation Publishing This book addresses a wide range of issues relating to the theoretical substantiation of the necessity of Industry 4.0, the development of the methodologica</p>
---	--	--

l tools for its analysis and evaluation, and practical solutions for effectively managing this process. It particularly focuses on solving the problem of optimizing the development of Industry 4.0 in the context of knowledge economy formation. The book presents the authors' approach to studying the process of Industry 4.0 formation in connection with knowledge economy, and approach that allows the

process to be studied in connection with the existing socio-economic and technological conditions. As a result, the conclusions and recommendations could be applied to modern economic systems and do not require any further elaboration. The presented research is based on modern economic theory scientific and methodological tools, including the tools of the theory of

economic cycles, the theory of games, and the institutional economic theory. Raising awareness of the problem of Industry 4.0 formation, the book is of interest to a wide audience, including not only specialists and experts with a detailed knowledge of the topic, but also scholars, lecturers, and undergraduates of various fields of economics. *MANAGERIAL ECONOMICS*

Princeton University Press
Plastic pollution is one of the biggest challenges of the twenty-first century that requires innovative and varied solutions. Focusing on sub-Saharan Africa, this book brings together interdisciplinary, multi-sectoral and multi-stakeholder perspectives exploring challenges and opportunities for utilising digital innovations to

manage and accelerate the transition to a circular plastic economy (CPE). This book is organised into three sections bringing together discussion of environmental conditions, operational dimensions and country case studies of digital transformation towards the circular plastic economy. It explores the environment for digitisation in the circular economy, bringing together perspectives from

practitioners in academia, innovation, policy, civil society and government agencies. The book also highlights specific country case studies in relation to the development and implementation of different innovative ideas to drive the circular plastic economy across the three sub-Saharan African regions. Finally, the book interrogates the policy dimensions

and practitioner perspectives towards a digitally enabled circular plastic economy. Written for a wide range of readers across academia, policy and practice, including researchers, students, small and medium enterprises (SMEs), digital entrepreneurs, non-governmental organisations (NGOs) and multilateral agencies, policymakers and public officials, this book offers

unique insights into complex, multilayered issues relating to the production and management of plastic waste and highlights how digital innovations can drive the transition to the circular plastic economy in Africa. The Open Access version of this book, available at <http://www.taylorfrancis.com>, has been made available under a Creative Commons

Economics of Economy Pricing

BoD – Books on Demand
This volume links the abstract theory of demand with its econometric implementation. Exercises lead the reader from elementary utility maximization to the most sophisticated recent techniques, highlighting the main

steps in the historical evolution of the subject. The first part presents a brief discussion of duality and flexible forms, and in particular of Deaton and Muellbauer's "almost ideal demand system". Part two includes the author's work on true wage indexes, and on intertemporal utility maximization.

Digital Innovations for a Circular Plastic Economy in Africa

This book provides a comprehensive coverage of the origin and development of economic thought from the ancient times to the present day. It documents the contributions of major thinkers from the time of Hebrews to Maurice Dobb, and the perspectives that influenced the economic thought. The book also provides an account of the recent trends in Indian economic thought and

will be of interest and relevance to all students and scholars of the subject. It covers the syllabus of economic thought of major Indian universities. Industrial Economics Taylor & Francis
The history of public enterprises is not new. They have been assigned the role of harbinger of socialism in India in accordance with the Industrial Policy Resolution of 1956. They

are treated as the catalysts of economic development and social upliftment of the people. For pretty a long time, public enterprises have been in dock and dottage on the ground that they have not been able to deliver goods as per our expectations. With a huge amount of investment in the central sector and the states' sector taken together, these enterprises have failed to generate a

dependable surplus. Public sector is an amalgam of Central and State enterprises. In this book we have established that the state's enterprises' commitments are no less than central enterprises to fulfil the objectives and expectations with which, they were allotted the commanding height in our economy. A macro-level study of all types of State-level public undertakings has been done

to judge the efficiency and effectiveness of these enterprises. This book is unique in the sense that it covers the syllabus of M.A., B.A. (Hons.) and B.A. (Pass) courses of all the universities of Bihar and special paper as 'Public Enterprises' in other universities of India. In view of its multi-dimensional approach, the book would be of immense importance to general readers, students,

academicians and researchers. Review ``The book deals with the economics of public enterprises with special reference to Bihar. The book is of special importance, particularly in the present context of redefining the role of public sector''. I Satya Sundaram, Southern Economist Poverty and Famines Vernon Press This is the third volume of publications on recent developments in Innovation Management within the newly established series edited by Kempton University of Applied Science and published by Deutsches Institut für Ideen- und Innovationsmanagement, the German institute for idea and innovation management. The authors are Master students enrolled in the Master programme "Global Business Development". The papers cover a wide range of different approaches to highlight how management theory responds to the contingencies of an increasing complex and volatile business environment. Industrial Economics: An Overview Routledge Handbook of industrial organization/S chmalensee.- V.2. *Industrial Economics & Management, 2/Ed.* Elsevier In A Clear And Systematic Manner, This

Book Presents An Exhaustive Exposition Of The Various Dimensions Of Industrial Economics. The Focus Of The Book Is On Understanding The Behaviour Of Business Firms Under Different Market Conditions. The Concepts And Tools Of Economic Analysis Relevant For Business Decision-Making Have Been Explained In Detail. Both Theoretical Description And Empirical Research Have Been Duly Emphasized. Mathematical Analysis Has Been Used Only Where Necessary For Better Clarity. Salient Features# Thoroughly Updated Text# A New Chapter On Advertising Strategy# Expanded Discussion Of Industrial Policy And Capital Market In India# Econometric Techniques For Measurement Of Industrial Efficiency Enlarged Treatment Of Several Topics Including Organizational And Market Structures, Economies Of Scope And Gravity Index With All These Features; This Is An Ideal Text For Both Undergraduate And Postgraduate Students Of Economics, Engineering, And Commerce And Business Management.

Coir Co-Operative Societies in Kerala New Age International Provides a coverage of intermediate microeconomics within a

European context, aiming to ensure effective understanding of the essential principles. This text is intended for undergraduates in economics, business studies, management and social science. Applied Consumption Analysis Sagwan Press This Book Is Designed To Cater The Need Of Students Of B.Sc. (Pass And Hons.) Students Of Various Indian Universities On The Basis Of Model Curriculum Recently Proposed By Cdc Of Ugc. The Book Comprises 569 Figures, 266 Examples, 233 Problems And 336 Objective Questions, Distributed In 13 Chapters. Each Problem Is Followed By Its Answer. The Inclusion Of A Large Number Of Problems And Review Questions Are Aimed At Evaluating The Degree Of Conceptual Comprehension A Student Has Acquired As A Result Of Studying The Book. The Solved Examples Are Targetted To Illustrate The Theoretical Ideals Described In The Text. Although The Book Is Aimed To Target B.Sc. Students, Yet Chemists, Material Scientists And Electrical Engineers Would Find It Useful Not Only In Pursuing Their Studies, But Also In Professional Applications. The Existence Of Sufficient Number Of

Objective Questions Are Framed To Help The Student Immensely To Encounter Competitive Examinations Like Net, Slet, Ics And State Civil Services. <u>Production and Cost Structure in Nigeria's Public Enterprises</u> Springer	Economic Theory. The Study Of Economics Begins With Microeconomic Analysis Because It Deals With Those Fundamental Laws Which Help In Optimum Allocation Of Economic Resources And, Hence, Price Determination For Goods And Services Including Factors Of Production. This Is The Core Or Central Theme Of The Economic Theory As A Whole.This	Book Is Meant For All Students Interested In Economic Theory Whatever Be Their Areas Of Specialization. Primarily It Is Meant For Undergraduate Students Of Engineering And Economics But The Honours And Post-Graduate Students Of Economics Are Also Likely To Be Benefited Much By The Material Presented In The Book. Based On Premises Observed In Reality The Theorems Or

Laws Or Principles Are Derived To Explain The Nature Of The Real World Of Economic Activities. The Approach Followed In The Book Is Analytical In Nature. Emphasis Has Been Given On Adequate Explanation Of The Theories Using Graphs And Mathematics. The Level Of Mathematics Used Is Not High. Some Knowledge Of Algebra And Calculus Is Adequate To Understand The Material Presented In The Book. A Synthesis Of The Neo-Classical And Modern Approaches Has Been Attempted In The Book To Make It A Complete Textbook Of The Subject. E-Banking Management: Issues, Solutions, and Strategies Psychology Press

Air transport in the Asia Pacific has undergone significant transformation in the last three decades. What was once a region in the shadow of larger and more prosperous continents such as North America and Europe is now at the forefront of expansion in commercial air-service networks, frequency and capacity, and the overall growth in the contribution of air transport to economies on regional and, in many cases, individual country levels. Despite this, it represents an area that is generally under-represented in the

commercial air-transport academic literature. Air Transport in the Asia Pacific seeks to fill this gap. Against this context, the aim of the volume is to offer a contemporary snapshot of current academic research into commercial air transport in the Asia Pacific. While one volume cannot realistically address the complete range of identifiable issues, this book provides timely,

specific and research-based studies authored by leading academics and practitioners. Environmental Impact Assessment Harvard University Press The main focus of this book is on the causation of starvation in general and of famines in particular. The author develops the alternative method of analysis—the 'entitlement approach'—concentrating on ownership and exchange, not

on food supply. The book also provides a general analysis of the characterization and measurement of poverty. Various approaches used in economics, sociology, and political theory are critically examined. The predominance of distributional issues, including distribution between different occupation groups, links up the problem of

conceptualizing poverty with that of analyzing starvation. *Indian Leather Industry* Cambridge University Press Most analysts of corporations and industries adopt the focal perspective of a single prototypical organization. Many analysts also study corporations primarily in terms of their internal organizational structures or as complex systems of financial contracts.

Glenn Carroll and Michael Hannan bring fresh insight to our understanding of corporations and the industries they comprise by looking beyond prototypical structures to focus on the range and diversity of organizations in their social and economic setting. The result is a rich rendering of analysis that portrays whole populations and communities of corporations.

The Demography of Corporations and Industries is the first book to present the demographic approach to organizational studies in its entirety. It examines the theory, models, methods, and data used in corporate demographic research. Carroll and Hannan explore the processes by which corporate populations change over time, including organizational

founding, growth, decline, structural transformation, and mortality. They review and synthesize the major theoretical mechanisms of corporate demography, ranging from aging and size dependence to population segregation and density dependence. The book also explores some selected implications of corporate demography for public policy, including employment

and regulation. In this path-breaking book, Carroll and Hannan demonstrate why demographic research on corporations is important; describe how to conduct demographic research; specify fruitful areas of future research; and suggest how the demographic perspective can enrich the public discussion of issues surrounding the corporation in our constantly evolving

industrial society. All researchers and analysts with an interest in this topic will find *The Demography of Corporations and Industries* an invaluable resource.
