How To Prepare Bar
Bending Schedule**

Jan 12, 2019 · In Bar bending schedule, the bars are organized for each structural units (Beams or columns or

slabs or footings etc) and detailed list is prepared which specifies the Bar location (Bar in footings, slabs, beams or columns), Bar Marking (to identify the bar in accordance with the drawing), Bar Size (length of the bar used), Quantity (No of Bars

Bar Bending Schedule [BBS] Estimate of Steel in Building

Bar Bending Schedule is a definitive list of reinforcement bars for any structural element that includes a mark, shape, size, location,

length, and bending details of the reinforcement It is often referred to as BBS Tabular view representation of each reinforcement bar used in any structural element is known as BBS *Bar Bending*

Schedule(BBS) - Civil Lead Bar bending schedule is a table form data in which various diameters of steel, the shape of bending, length of each bent and straight portions, angles of bending, the total length of each bar, and a number of each type of bar This

information is very useful for site engineer who is working on-site and while preparing estimate and bills of work
