When life gives you lemons, kill zombies — turns out lemon juice neutralizes the undead. After a failed attempt at running away, best friends Nathan and Misty return home expecting to face angry parents. Instead, they discover the military has destroyed the bridges out of their rural town and everyone's fled—except a small horde of the living dead. The stress of flesh-eating zombies may be more than their already strained relationship can handle. Even with the help of the town geek and lemonade-powered Super-Soakers, there's not

enough time to squeeze their way out of this sticky mess. Unless the trio eradicates the zombie infestation, while avoiding the deadly zombie snot, the military will blow the town, and them, to pulp. Their only shot is something with a lot more punch. Something like the Super Zombie Juice Mega Bomb. But even if their friendship survives, there's another problem: Someone has to lure the undead into the trap.

Which language should philosophers use: technical or common language? In a book as important for intellectual historians as it is for philosophers, Lodi Nauta addresses a vital question which still has resonance today: is the discipline of philosophy assisted or disadvantaged by employing a special vocabulary? By the Middle Ages philosophy had become a highly technical discipline, with its own lexicon and methods. The Renaissance humanist critique of this specialised language has been dismissed as philosophically superficial, but the author demonstrates that it makes a crucial point: it is through the misuse of language that philosophical problems arise. He charts the influence of this critique on early modern philosophers, including Hobbes and Locke, and shows how it led to the downfall of medieval Aristotelianism and the gradual democratization of language and knowledge. His book will be essential reading for anyone interested in the transition from medieval to modern philosophy.

The Oxford History of Poetry in English is designed to offer a fresh, multi-voiced, and comprehensive analysis of 'poetry': from Anglo-Saxon culture through contemporary British, Irish, American, and Global culture, including English, Scottish, and Welsh poetry, Anglo-American colonial and post-colonial poetry, and poetry in Canada, Australia, New Zealand, the Caribbean, India, Africa, Asia, and other international locales. The series both synthesises existing scholarship and presents cutting-edge research, employing a global team of expert contributors for each of the volumes. *Sixteenth-Century British Poetry* features a history of the birth moment of modern 'English' poetry in greater detail than previous studies. It

examines the literary transitions, institutional contexts, artistic practices, and literary genres within which poets compose their works. Each chapter combines an orientation to its topic and a contribution to the field. Specifically, the volume introduces a narrative about the advent of modern English poetry from Skelton to Spenser, attending to the events that underwrite the poets' achievements: Humanism; Reformation; monarchism and republicanism; colonization; print and manuscript; theatre; science; and companionate marriage. Featured are metre and form, figuration and allusiveness, and literary career, as well as a wide range of poets, from Wyatt, Surrey, and Isabella Whitney to Raleigh, Drayton, and Mary Herbert. Major works discussed include Sidney's *Astrophil and Stella*, Spenser's *Faerie Queene*, Marlowe's *Hero and Leander*, and Shakespeare's *Sonnets*.

This book presents a curricular framework for students grades 6–12 that

school librarians and teachers can use collaboratively to enhance reading skill development, promote literature appreciation, and motivate young people to incorporate reading into their lives, beyond the required schoolwork.

Supporting Reading Grades 6–12: A Guide addresses head-on the disturbing trend of declining leisure reading among students and demonstrates how school librarians can contribute to the development of lifelong reading habits as well as improve students' motivation and test scores. The book provides a comprehensive framework for achieving this: the READS curriculum, which stands for Read as a personal activity; Explore characteristics, history, and awards of creative works; Analyze structure and aesthetic features of creative works; Develop a literary-based product; and Score reading progress. Each of these five components is explained thoroughly, describing how school librarians can encourage students to read as individuals, in groups, and as school communities; support classroom teachers' instruction; and connect students to today's constantly evolving technologies. Used in combination with an inquiry/information-skills model, the READS curriculum enables school librarians to deliver a dynamic, balanced library program that addresses AASL's Standards for the 21st-Century Learner. *The Pigman*, by Paul Zindel Corwin Press "Eight hundred and fifty-three horrifying things had happened to me by the time I was a teenager. This study provides an entirely new look at an era of radical change in the history of West European thought, the period between 1480 and 1540, mainly in France and Germany. The book's main thesis is that the Latin language turn was not only concurrent with other aspects of change, but was a fundamental instrument in reconfiguring horizons of thought, reformulating paradigms of argument, and rearticulating the relationship between fiction and truth.
