"This book aims to fill a gap in the process of confrontation between the disciplines, case laws and literature of the central EU member states. In particular it aims to address the difficulty of finding sources for scholars and professionals explaining the rules and guidelines of corporate law in the different European states. The main features of the discipline of Corporate Law in Germany, England, France, Italy, Spain, Poland, Romania and the

Netherlands are illustrated. The objective of the work is not only to describe the main features of the discipline, but especially to highlight the most important critical profiles, and particularly those under the scrutiny of the case law and most studied (as problematic) by the doctrine."-- Bloomsbury Publishing.

Media and Convergence

Management Bre Press

Convergence has gained an enormous amount of attention in media studies within the last several years. It is used to describe the merging of formerly distinct functions, markets and fields of application, which has changed the way companies operate and consumers perceive and process media content. These transformations have not only led business practices to change and required companies to adapt to new conditions, they also continue to have a lasting impact on research in this area. This book's main purpose is to shed some light on crucial phenomena of media and convergence management,

while also addressing more specific issues brought about by innovations related to media, technologies, industries, business models, consumer behavior and content management. This book gathers insights from renowned academic researchers and pursues a highly interdisciplinary approach.
