Truck classification and List of truck types Medium Medium trucks are larger than light but smaller than heavy trucks. In the US, they are defined as weighing between 13,000 and 33,000 lb (5,900 and 15,000 kg). For the UK and the EU the weight is between 3.5 to 7.5 t (3.4 to 7.4 long tons; 3.9 to 8.3 short tons). Local delivery and public service (dump trucks, garbage trucks and fire-fighting trucks) are normally around this size. Heavy Heavy trucks are the largest on-road trucks, Class 8. These include vocational applications such as heavy dump trucks, concrete pump trucks, and refuse hauling, as well as ubiquitous long-haul 4x2 and 6x4 tractor units. Road damage and wear increase very rapidly with the axle weight. The number of steering axles and the suspension type also influence the amount of the road wear. In many countries with good roads a six-axle truck may have a maximum weight of 44 t (97,000 lb) or more. Off-road Off-road trucks include standard, extra heavy-duty highway-legal trucks, typically outfitted with off-road features such as a front driving axle and special tires for applications such as logging and construction, and purpose-built off-road vehicles unconstrained by weight limits, such as the Liebherr T 282B mining truck

Jason Beyer and his side-kick Carl Crawford are the leaders of an inner-city youth group who embark on a whitewater adventure into the Gila Wilderness. The novice paddlers are tested to the limit when the normally mild Gila River turns into a raging torrent that sweeps the group deep into the Gila Gorge and into the middle of a sinister plot led by a ruthless billionaire industrialist to uncover a national secret of hidden treasure, that if exposed could alter the world's economy. Chests of gold given to early explorers by an ancient people and lost on the Gila River provide the crucial link to the greedy billionaire's discovery of the riches. Only through the heroic actions of Jason and his group can the plot be foiled.
