'I should have written you after my first reading of *The Living Currency*; it was already breath-taking and I should have responded. After reading it a few more times, I know it is the best book of our times.' Letter to Pierre Klossowski from Michel Foucault, winter 1970. *Living Currency* is the first English translation of Klossowski's *La monnaie vivante*. It offers an analysis of economic production as a mechanism of psychic production of desires and is a key work from this often overlooked but wonderfully creative French thinker.

When *The Big Show* was first published, paper rationing meant that the text had to be heavily cut. Now, for the first time, this international bestseller has been returned to its complete, and breathtaking, original state. Pierre Clostermann was a Free French fighter ace who flew with the RAF during the Second World War. Over the course of five years he engaged in hundreds of dog-fights, shot down scores of Luftwaffe planes, escorted American bombers on some of the most dangerous raids of the war, and watched many of his friends falling to their deaths in the skies over the Channel. *The Big Show*, his incredible account of the air war over Britain and France, has become one of the most famous memoirs of the Second World War. Now in its original state, it contains everything one could wish for in a war memoir: wonderfully observed descriptions of wartime Britain, frighteningly evocative stories of in-the-cockpit action, an amazing cast of characters, and all the drama and bravery of a man fighting a desperate war thousands of feet above the ground. An undeniable classic.

In order to build a sustainable transport system for people and goods that meets the needs of all users, a truly integrated and seamless approach is needed, and the full potential of transformative technologies has to be exploited. This can only be achieved if user-centeredness, cross-modality and technology transfer become the paradigm of shaping future transport. Mobility4EU is a project funded by the European Commission that focusses on these topics and is working on delivering an action plan towards a user-centric and cross-modal European transport system in 2030. The authors of this contributed volume are dedicated scholars and practitioners connected to Mobility4EU either as partners or external contributors. Their contributions focus on understanding user needs and report on technologies and approaches that support the tailoring of a user-centered cross-modal transport system for passengers and freight on long distances and in the urban context.

As non-literates, the Celts left no written record of their lives, their beliefs, and the stories which were such an important part of their culture. Here Dr. Green uses the works of contemporary commentators from the Classical world, later Christian scribes recording oral traditions, and archaeological evidence to discuss Celtic myths and their religious beliefs and rituals. Acoustic Guitars: The Illustrated Encyclopedia is the most comprehensive guide of its type ever produced, covering decades of great instruments and the people who played them. You will find here the highest quality photos of acoustic guitars produced by every significant maker, from Alvarez to Zemaitis, plus detailed information, and a host of action pictures of important players from pop, rock, jazz, country classical, blues, and folk. An acoustic guitar need not be a simple brown box with a neck attached. *Acoustic Guitars: The Illustrated Encyclopedia* celebrates the unusual, the different and the purely bizarre in addition to the assured roots-based craft of the finest unadorned instruments, underlining the sheer diversity and variety of the acoustic stringed instruments that have been built and sold and played through three centuries. Here are resonator guitars made since the 1920s by Dobro, National, and others, often with highly decorated metal bodies; revered flat-tops from Martin, Taylor, Gibson, and more; peculiarly shaped and oddly featured creations from many of the custom builders; early 20th-century harp guitars with extra strings and extended bodies; creative archtops from D'Angelico, Epiphone, Benedetto, and more; and plastic-equipped constructions from Ovation. The comprehensive and informative text is in a clear A-to-Z format organized by brand name, written and researched by a unique team of the world's leading authorities on the subject. *Acoustic Guitars: The Illustrated Encyclopedia* shows in words and pictures just why and how the acoustic guitar continues to be the most popular musical instrument in the world.
