experience ecological change? How has whale culture been both understood and changed by human technology? What can observing whales teach us about the complexity, splendor, and fragility of life on earth? In *Fathoms*, we learn about whales so rare they have never been named, whale songs that sweep across hemispheres in annual waves of popularity, and whales that have

modified the chemical composition of our planet's atmosphere. We travel to Japan to board the ships that hunt whales and delve into the deepest seas to discover how plastic pollution pervades our earth's undersea environment. With the immediacy of Rachel Carson and the lush prose of Annie Dillard, Giggs gives us a "masterly" (*The New Yorker*) exploration of the natural world even as

she addresses what it means to write about nature at a time of environmental crisis. With depth and clarity, she outlines the challenges we face as we attempt to understand the perspectives of other living beings, and our own place on an evolving planet. Evocative and inspiring, *Fathoms* "immediately earns its place in the pantheon of classics of the new golden age of environmental

writing”
(Literary Hub).

individuals in their free-living communities. It presents a revelatory account of how animals function beyond our usual view. Safina shows that for non-humans and humans alike, culture comprises the answers to the question, "How do we live here?" It unites individuals within a group identity. But cultural groups often seek to avoid, or even be hostile toward, other factions. By showing

that this is true across species, Safina illuminates why human cultural tensions remain maddeningly intractable despite the arbitrariness of many of our differences. **Becoming Wild** takes readers behind the curtain of life on Earth, to witness from a new vantage point the most world-saving of perceptions: how we are all connected. **The Walking Whales** National

Geographic Children's Books
 Â All day, Whale swims through the ocean, wearing a poster advertising the big upcoming art exhibition. He visits the eel who wriggles abstract patterns in the sand, the squid who paints with ink, and the hammerhead shark who builds sculptures from salvage. Whale sees his friends' confidence and creativity and wishes he could be an

artist too, but he doesn't know what to make and insists he's too ungainly to create art. Then one day, with the unexpected help of some bioluminescent plankton, he discovers his own distinct point of view and talent. From the award-winning author-illustrator of *What Animals Really Like*, hailed by *School Library Journal* as "sublime silliness,†? comes another inspiring tale about defying

expectation and finding the artist within. Praise for *Whale Shines* STARRED REVIEW "At its core, Robinson's (*What Animals Really Like*) story is a tried and true tale of a wallflower realizing his potential. But her understated, offbeat voice and visuals—a mashup of classicism and graphic novel sensibilities—makes this a standout: up-to-the-minute modern in its irreverence and offhandedness

, yet timeless in its understanding of a character's yearning." —Publishers Weekly, starred review "Sharp contrasts between light and dark are beautiful." —Kirkus Reviews "Children will embrace and understand the sincere, undervalued message of art as substantive and a way to "share one's world.†? This inspiring tale of artistic collaboration between the whale and

bioluminescent plankton will be shared again and again." —School Library Journal "The watercolor and pencil art makes excellent use of the spreads' wide horizontality; while the art projects and, indeed, the underwater world are on the literal side for such an artistic-themed story, there's a murky charm to life in the briny deep... What's particularly appealing here is the casual inclusion of a wide variety of approaches to art, making this an entertaining lead-in to art projects, especially those involving the natural world." —Bulletin of The Center for Children's Books [Orcas of the Salish Sea](#) Sasquatch Books A nonfiction picture book full of great charm and beauty, *The Blue Whale* is both informative and completely captivating!

Whale Shines

National Geographic Children's Books "The Hummingbird

& the Humpback Whale" is the sweet story of Birdie, who wanders outside his garden home for the day, open to exploring, with the thought that sometimes not knowing where you are going is the best part of an adventure! Along the way Birdie meets Henri the Humpback Whale—they splash about, frolic and play, and at the end of the day Henri invites Birdie to come back and play again another

day. Birdie knows Henri's ocean-home is BIG and asks Henri "how will I find you?" Henri then offers Birdie tips, and also teaches the reader, what to look for when looking for humpback whales in the wild. On Birdie's flight home to his beautiful garden, he reflects on his amazing day, thinking that sometimes not knowing where you are going is the best part of an adventure!

Combining a comprehensive survey of whales with a history of their evolution and relationship to man, this book covers all aspects of the species' biology and natural history. Part of the Of the World series, it looks at social structure, feeding,

breeding, migration and environmental influences. The Museum of Whales You Will Never See
Little Gestalten
This provocative book of photography offers bold new insight into the lives of the world's largest mammals, along with their complex societies. In these pages, we learn that whales share an amazing ability to learn and adapt to opportunities, from specialized feeding

strategies to parenting techniques. There is also evidence of deeper, cultural elements of whale identity, from unique dialects to matrilineal societies to organized social customs like singing contests. Featuring the arresting underwater images of Brian Skerry, who has explored and documented oceans for over four decades, this book will document these alluring creatures in

all their glory-- and demonstrate how these majestic creatures can teach us about ourselves and our planet.
