INTERNATIONAL BESTSELLER • A bestselling dystopian novel that tackles surveillance, privacy and the frightening intrusions of technology in our lives—a “compulsively readable parable for the 21st century” (Vanity Fair). When Mae Holland is hired to work for the Circle, the world’s most powerful internet company, she feels she’s been given the opportunity of a lifetime. The Circle, run out of a sprawling California campus, links users’ personal emails, social media, banking, and purchasing with their universal operating system, resulting in one online identity and a new age of civility and transparency. As Mae tours the open-plan office spaces, the towering glass dining facilities, the cozy dorms for those who spend nights at work, she is thrilled with the company’s modernity and activity. There are parties that last through the night, there are famous musicians playing on the lawn, there are athletic activities and clubs and brunches, and even an aquarium of rare fish retrieved from the Marianas Trench by the CEO. Mae can’t believe her luck, her great fortune to work

for the most influential company in the world—even as life beyond the campus grows distant, even as a strange encounter with a colleague leaves her shaken, even as her role at the Circle becomes increasingly public. What begins as the captivating story of one woman’s ambition and idealism soon becomes a heart-racing novel of suspense, raising questions about memory, history, privacy, democracy, and the limits of human knowledge.

Dr. Greg Zacharias, former Chief Scientist of the United States Air Force (2015-18), explores next steps in autonomous systems (AS) development, fielding, and training. Rapid advances in AS development and artificial intelligence (AI) research will change how we think about machines, whether they are individual vehicle platforms or networked

enterprises. The payoff will be considerable, affording the US military significant protection for aviators, greater effectiveness in employment, and unlimited opportunities for novel and disruptive concepts of operations. Autonomous Horizons: The Way Forward identifies issues and makes recommendations for the Air Force to take full advantage of this transformational technology.

This unique volume delivers a clear, concise overview of the Toyota Production System and kaizen in the very words of the architect of both of these movements, Taiicho Ohno, published to mark what would have been his 100th birthday. "If you are

going to do TPS you must do it all the way. You also need to change the way you think. You need to change how you look at things." -- Taiichi Ohno "This book brings to us Taiichi Ohno's philosophy of workplace management--the thinking behind the Toyota Production System. I personally get a thrill down my spine to read these thoughts in Ohno's own words." -- Dr. Jeffrey Liker, Director, Japan Technology Management Program, University of Michigan, and Author, The Toyota Way Based on a series of interviews with Taiicho Ohno, this unique volume delivers a clear, concise overview of the Toyota Production System and kaizen in the very words of the architect of both of these movements, published to mark what would have been his 100th birthday.
