Authenticity is
one of the
most rampant
buzzwords in
ELT (English
Language
Teaching).

Many have
weighed in on
what
authenticity
should mean
and on how it
may be
achieved. The
book at hand
is an

extensive analysis of authenticity as a term and as a concept within the academic field of ELT. The research data comprises virtually all definitions and conceptualizations of authenticity in the international ELT literature. However, only a limited number of texts contributes to what can be called an explicit negotiation of authenticity. A discourse analytical approach is taken to

disentangle the hubbub of commentaries and to eventually extrapolate from it six distinct concepts which are attached to the term 'authenticity'. Michel Foucault's seminal theories are invoked, affording additional insights into discourse dynamics and power structures among individuals and institutions in ELT. **Come On, Rain!** John

This is an attempt to redraw the boundaries of foreign language study. It focuses attention not just on cultural knowledge as a necessary aspect of communicative competence, but as an educational objective in its own right, as an end as well as a means of language learning. The book is the first of its kind to establish Cognitive Linguistics as a research paradigm within the field of world Englishes. The authors survey the main tenets of both areas of linguistic enquiry and suggest that the theoretical and methodological apparatus

developed both within Cognitive Linguistics generally and within its novel sub-discipline Cognitive Sociolinguistics can overcome certain limitations inherent in traditional approaches to cultural variation in language. They present a case study of the linguistic realization of the cultural model of community in African English as an exemplar for the

investigation of cultural models in other varieties of English. Corpus-linguistic methods are combined with conceptual metaphor analysis and blending theory to elucidate a vast network of conceptualizations salient to speakers of African English. The findings, based on computer corpora and a range of additional sources, are discussed against the background of

work in anthropology, religious studies, and political science. The book also reflects on the role of English in intercultural communication and concludes with a comparison of Cognitive Linguistics and pragmatic functionalism, placing the former in the wider framework of a hermeneutic philosophy that stresses dialogic understanding .

 A follow-up to the ACTFL Integrated Performance Assessment Manual published in 2003. This book provides readers with expanded guidelines for how to design IPA tasks to inform the backward design of a unit. Suggestions on how to provide effective feedback and how to improve learner performance are shared. Also included is a re-conceptualize

d rubric for the interpretive mode and the addition of IPA rubrics for Advanced-level language performance.
From Fluency to Comprehension ASCD Teaching and Researching Listening provides a focused, state-of-the-art treatment of the linguistic, psycholinguistic and pragmatic processes that are involved in oral language use, and shows how these processes

influence listening in a range of practical contexts. Through understanding the interaction between these processes, language educators and researchers can develop more robust research methods and more effective classroom language teaching approaches. In this fully revised and updated second edition, the book: examines a full range of teaching methods and

research initiatives related to listening gives definitions of key concepts in neurolinguistics and psycholinguistics provides a clear agenda for implementing listening strategies and designing tests offers an abundance of resources for immediate use for teaching and research Featuring insightful quotes and concept boxes, chapter overviews and summaries to

guide the reader, Teaching and Researching Listening will engage and inform teachers, teacher trainers and researchers investigating communicative language use.

Write Like This Image This volume makes a unique contribution to the literature on materials development for language learning. It focuses on issues related to authenticity in materials development and includes

research-based position statements, applications of theory to practice and developments of theory from observed practice. Each paper concentrates on a different aspect of authenticity and many of them introduce the reader to previously unexplored facets of authenticity. The chapters are sequenced so that the book moves from general discussion about the value of authenticity to

reports of evaluations of authenticity to reports of the exploitation of authenticity in specific learning contexts. Many questions are raised, much revealing data is reported and analysed, and many pedagogic suggestions are made. The contributions here have been written so that they are of potential value to teachers, to materials developers, to post-graduate students and to

researchers. They are written to be academically rigorous, but at the same time to be accessible to newcomers to the field and to experienced experts alike. Reading in the Brain Corwin Press #1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based on new research conducted with leaders, change

makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Don't miss the five-part HBO Max docuseries Brené Brown: Atlas of the Heart! NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing

the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to

do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and

faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from

small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS

style that millions of readers have come to expect and love. Brown writes, "One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No.

Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It's why we're here." Whether you've read *Daring Greatly* and *Rising Strong* or you're new to Brené Brown's work, this book is for anyone who wants to step up and into brave leadership. *Context and Culture in Language Teaching* Scholastic Inc. Practical,

effective, evidence-based reading interventions that change students' lives. *Essentials of Understanding and Assessing Reading Difficulties* is a practical, accessible, in-depth guide to reading assessment and intervention. It provides a detailed discussion of the nature and causes of reading difficulties, which will help develop the knowledge and confidence needed to accurately assess

ess why a student is struggling. Readers will learn a framework for organizing testing results from current assessment batteries such as the WJ-IV, KTEA-3, and CTOPP-2. Case studies illustrate each of the concepts covered. A thorough discussion is provided on the assessment of phonics skills, phonological awareness, word recognition, reading fluency, and reading comprehension.

Formatted for easy reading as well as quick reference, the text includes bullet points, icons, callout boxes, and other design elements to call attention to important information. Although a substantial amount of research has shown that most reading difficulties can be prevented or corrected, standard reading remediation efforts have proven largely ineffective. School psychologists are

routinely called upon to evaluate students with reading difficulties and to make recommendations to address such difficulties. This book provides an overview of the best assessment and intervention techniques, backed by the most current research findings. Bridge the gap between research and practice. Accurately assess the reason(s) why a student struggles in reading. Improve reading skills

using the most highly effective evidence-based techniques. Reading may well be the most important thing students are taught during their school careers. It is a skill they will use every day of their lives; one that will dictate, in part, later life success. Struggling students need help now, and *Essentials of Understanding and Assessing Reading Difficulties* shows how to get these

students on track.

A renowned cognitive neuroscientist's fascinating and highly informative account of how the brain acquires reading. How can a few black marks on a white page evoke an entire universe of sounds and meanings? In this riveting investigation, Stanislas Dehaene provides an accessible

account of the brain circuitry of reading and explores what he calls the "reading paradox": Our cortex is the product of millions of years of evolution in a world without writing, so how did it adapt to recognize words? *Reading in the Brain* describes pioneering research on how we process language, revealing the hidden logic of spelling and the existence of powerful unconscious

mechanisms for decoding words of any size, case, or font. Dehaene's research will fascinate not only readers interested in science and culture, but also educators concerned with debates on how we learn to read, and who wrestle with pathologies such as dyslexia. Like Steven Pinker, Dehaene argues that the mind is not a blank slate: Writing systems across all cultures rely on the same

brain circuits, and reading is only possible insofar as it fits within the limits of a primate brain. Setting cutting-edge science in the context of cultural debate, *Reading in the Brain* is an unparalleled guide to a uniquely human ability.

Dare to Lead

Scholastic Inc. Turn any student into a bookworm with a few easy and practical strategies. Donalyn Miller says she has yet to meet a child she can't

turn into a reader. No matter how far behind Miller's students might be when they reach her 6th grade classroom, they end up reading an average of 40 to 50 books a year. Miller's unconventional approach dispenses with drills and worksheets that make reading a chore. Instead, she helps students navigate the world of literature and gives them time to read books they

pick out themselves. Her love of books and teaching is both infectious and inspiring. In the book, you'll find: Hands-on strategies for managing and improving your own school library. Tactics for helping students walk on their own two feet and continue the reading habit after they've finished with your class. Data from student surveys and end-of-year feedback that proves how

well the Miller Method works. The Book Whisperer includes a dynamite list of recommended "kid lit" that helps parents and teachers find the books that students really like to read. Think Big With Think Alouds, Grades K-5 GRIN Verlag "Beep Beep Sheep in a jeep on a hill that s steep." "Sheep in a Jeep" is well-loved by the preschool and early-reader sets for its slapstick story of five sheep (in a jeep) and silly sound effects especially when the jeep goes splash and thud in the mud. Nancy Shaw's rollicking rhymes are Seuss-snappy, and Margot Apple's appealing pencil illustrations are expressive and hilarious. Shear delight. Don't miss Shaw and Apple's other sheep-heaped titles: "Sheep in a Shop," "Sheep on a Ship," "Sheep Out to Eat," "Sheep Trick or Treat," "Sheep Blast Off," and "Sheep Take a Hike." "From Striving to Thriving Oxford University Press Teaching and Learning in English Medium Instruction provides an overview of the nature of English Medium Instruction (EMI) in both secondary and tertiary education. The book explores the nature of academic literacy in EMI the ways in which EMI is implemented in different contexts

issues related to teaching and learning through the medium of English teaching challenges and coping strategies used by EMI teachers support for EMI through EAP the professional development needs of EMI teachers approaches to the evaluation of EMI programs. The book contains a number of short chapters written in an accessible style with discussion questions and practical

follow-up tasks. Throughout the book, key theory and research serve to introduce the core issues involved in EMI, which are then explored in terms of implications for practice. The book can be used in workshops and courses and for groups that include EMI teachers of content subjects, EAP teachers, TESOL students, and teachers and education officials involved with the

implementation of EMI in different contexts. With the expansion of EMI worldwide in recent years the book seeks to introduce EMI to a new generation of EMI teachers and language teaching professionals.

Tired of hearing about “complex text”?

Bothered by the pushy messages about “challenge”? This book is for you! Unlike the many other materials on text complexity, this one focuses on specific comprehension skills that students need in order to really engage with text. This book will help elementary school teachers equip their students with practical tools and understandings of the structures and

conventions that allow them to excel, including concrete tools, passages, games, lessons, and examples to teach anaphora, connectives, paragraph structure, gathering evidence (fiction and nonfiction), and text challenge. A final chapter specifies how to stretch students in texts while attending to their stamina, executive skills, and interests. Book Features:

Text-based lessons for grades 3–5. Opening vignettes which provide classroom context for each skill. Key objectives and Common Core Standards. Think-aloud language to guide strategy development. Research-based strategies and games. “Real-life scenarios of comprehension breakdowns all teachers will recognize are followed by detailed guidelines for best practice and step-by-step directions
