This fascinating book provides a global exchange of information about counseling activities and services; counselor training; and existing professional practices, beliefs, and values. Native counselors and leading experts from 40 countries discuss the opportunities for growth in their countries and the challenges they face. After an introductory section that discusses global diversity themes and issues, chapters focus on key countries in Africa, Asia, Europe, the Middle East, North America, Oceania, and South and Central America. Each chapter covers the history and current state of counseling in the country, theories and techniques that have been shown to work best in meeting the needs of the population, diversity issues specific to the region, counselor education and training, and possibilities for the future of counseling in the country. A comprehensive list of international resources and counseling organizations is also included.

In this original and major new work, David Blustein places working at the same level of attention for social and behavioral scientists and psychotherapists as other major life concerns, such as intimate relationships, physical and mental health, and socio-economic inequities. He also provides readers with an expanded conceptual framework within which to think about working in human development and human experience. As a result, this creative new synthesis enriches the discourse on working across the broad spectrum of psychology's concerns and agendas, and especially for those readers in career development, counseling, and policy-related fields. This textbook is ideal for use in graduate courses on counseling and work or vocational counseling.

Der Verfasser untersucht die - im Verhältnis zu Aktualität und Praxisrelevanz - wenig erforschte Frage, ob die Euroeinführung für alte und neue Mitgliedstaaten mit dem EU-Beitritt verpflichtend wird. Er analysiert hierzu zunächst, ob die Euroeinführung im Prinzip - zunächst unter bewusster Ausblendung des problematischen

Wechselkurskonvergenzkriteriums - einen verpflichtenden Charakter hat. Nach Bejahung dieser Frage wendet er sich dem Wechselkurskonvergenzkriterium zu und stellt fest, dass die

formelle WKM II-Teilnahme ein notwendiges, aber nicht hinreichendes Kriterium zur Erfüllung dieses

Konvergenzkriteriums ist. Da die WKM II-Teilnahme aber ihrerseits freiwillig ausgestaltet ist, macht dies im Ergebnis auch die Euroeinführung insgesamt freiwillig. Ein Mitgliedstaat kann die Euroeinführung daher wie Schweden einfach umgehen, indem er dem WKM II nicht beitrifft. Der Autor zeigt immer wieder auf, wie verschiedene Gruppen von EU-Mitgliedstaaten hinsichtlich der Euro-Einführung in der Vergangenheit behandelt wurden.

This richly illustrated book explores over seven hundred years of European warfare, from the time of Charlemagne to the end of the middle ages (c.1500). The period covered has a distinctive character in military history. It was an age when organization for war was integral to social structure, when the secular aristocrat was by necessity also a warrior, and whose culture was profoundly influenced by martial ideas. Twelve scholars, experts in their own fields, have contributed to this finely illustrated book. It is divided into two parts. Part I seeks to explore the experience of war viewed chronologically with separate chapters on, for instance, the Viking age, on the wars and expansion of the eleventh and twelfth centuries, on the Crusades and on the great Hundred Years War between England and France. The chapters in Part II trace thematically the principal developments in the art of warfare; in fortification and siege craft; in the role of armoured cavalymen; in the employment of mercenary forces; the advent of gunpowder artillery; and of new skills in navigation and shipbuilding. In both parts of the book, the overall aim has been to offer the general reader an impression, not just of the where and the when of great confrontations, but above all of the social experience of warfare in the middle ages, and of the impact of its

demands on human resources and human endurance.

In recent years there has been an upsurge of interest in the history of the discipline of archaeology. Local, national, and international histories of archaeology that deal with institutions, concepts, categories, and the social and political contexts of archaeological practice have begun to influence the development of archaeological theory. This volume contributes to these developments by reprinting 19 significant papers. Spanning much of the last 200 years and global in coverage and outlook, the papers provide a thorough grounding in the historiography of archaeology, and will enhance understanding of the origins and growth of its theory and practice. A general introduction which is itself a contribution to historiography orients readers by outlining core themes and issues in the field.

One of the first attempts to present a comprehensive study of legal translation, this book is an interdisciplinary study in law and translation theory. It is not bound to any specific languages or legal systems, although emphasis is placed on translation between common law and civil law jurisdictions. The main focus is on the translation of texts which are authoritative sources of the law; examples are cited primarily from statutes, codes and constitutions (Canada, Switzerland and Belgium), as well as instruments of the European Union and international treaties and conventions. Dealing with theoretical as well as practical aspects of the subject matter, the author analyses legal translation as an act of communication in the mechanism of the law, thus making it necessary to redefine the goal of legal translation. This book is intended for both lawyers and linguists, translation theorists, legal translators and drafters, legal lexicographers, as well as teachers and students of translation.

The Herero-German war led to the destruction of Herero society in all of its pre-war facets. Yet Herero society re-emerged, re-organizing itself around the structures and beliefs of the German colonial army and Rhenish missionary activity. Taking advantage of the South African invasion of Namibia in World War I the Herero established themselves in areas of their own choosing. The effective re-occupation of land by the Herero forced the new colonial state, anxious to maintain peace and cut costs, to come to terms with the existence of Herero society. The study ends in 1923 when the death and funeral of Samuel Maherero - first paramount of the Herero and then resistance leader - the catalyst that brought the disparate groups of Herero together to establish a single unitary Herero identity. The Milošević Trial - An Autopsy provides a cross-disciplinary examination of one of the most controversial war crimes trials of the modern era and its contested legacy for the growing fields of international criminal law and post-conflict justice. The international trial of Slobodan Milošević, who presided over the violent collapse of Yugoslavia - was already among the longest war crimes trials when Milošević died in 2006. Yet precisely because it ended without judgment, its significance and legacy are specially contested. The contributors to this volume, including trial participants, area specialists, and international law scholars bring a variety of perspectives as they examine the meaning of the trial's termination and its implications for post-conflict justice. The book's approach is intensively cross-disciplinary, weighing the implications for law, politics, and society that modern war crimes trials create. The time for such an examination is fitting, with the imminent closing of the Yugoslav war crimes tribunal and rising debates over its legacy, as well as the 20th anniversary of the outbreak of the Yugoslav conflict. The Milošević Trial - An Autopsy brings thought-provoking insights into the impact of war crimes trials on post-conflict justice.

Psychology of Career Adaptability, Employability and Resilience Springer Science & Business Media

This book originated in a series of cross-disciplinary conversations in the years 1984-1990 between the editor, who is a physician-researcher involved in clinical and laboratory research, and a dioxin toxicologist. During the years in which the conversations took place, an extraordinary amount of new scientific literature was published related to dioxins, defined for purposes of this text as the chlorinated dibenzo-p-dioxins, dibenzofurans, polychlorinated biphenyls (PCB's) and other compounds that are structurally and toxicologically similar to 2,3,7,8-tetrachlorodibenzo-p-dioxin (2,3,7,8-TCDD), the most extensively studied and most toxic of this group of chemicals. Dioxins also began to interest not only chemists and toxicologists, but also specialists from diverse disciplines such as wildlife and environmental science, immunology, neuroscience, public health, epidemiology, medicine, government, law, sociology, and journalism. Specialists from such varied disciplines, while familiar with their own literature, frequently did not have time to follow the dioxin literature outside their specialty area. In addition, each specialty had unique knowledge, methods, and perspectives. Cross disciplinary conversation was necessary, but all too frequently, specialists from the various disciplines did not speak the same language, resulting in misunderstanding.

This volume presents a series of interlinked reflections on the possibilities and problems of emergent forms of regional cooperation in South East Europe (SEE). Taking diverse themes, such as the economy, crime, borders, culture, and civil society, the contributors explore some of the facets of "open regionalism," consisting of multi-actor, multi-level, and multi-scalar processes producing a complex geometry of interlocking networks. The book situates "new regionalism" in SEE in the historical context of the legacies of Yugoslavia and the wars of the Yugoslav succession. Contemporary processes of Europeanization in relation to SEE are also examined as complex, contingent, and radically unfinished. The book moves beyond the constraints of objectivist notions of regionalism as consisting of sets of relations between sovereign nation states, to address complex constructions of meaning and place. This novel begins with a funeral for a young mother: A good-

looking girl, anyway, who with that coif of hers got to look rather like a nun as the years passed, and whom few of us were content to see lying between oak planks in her least worn dress, the black one she got into on Sundays, even when she couldn't go to Mass at Saint-Sulpice, and that smelled clean, with no odor (no smoke, sweat, animals, cabbage or milk) other than the soap they said came from Marseilles and which in the spring left big bluish trails in the stream. They resembled the Milky Way, which she had showed her son in the summer sky when he was very small. Ambitious and grandiose, Richard Millet's stunning novel announces his introduction to an English-speaking audience. Set in the villages and valleys of France's mountainous provinces, *The Glory of the Pythres* follows the fortunes-or rather, the colossal misfortunes-of the Pythres (pronounced as pitres, the French word for clowns or buffoons). Of peasant stock, "suspicious, taciturn, mulish, stubborn," the Pythres live a grim existence, locked up with their dead through long winters and passing on their problems like heirlooms to their children. They, like their neighbors, are Others, their culture passing away, their language barely comprehensible to other Frenchmen, their lives defined by tribal hatreds with motives that have long since vanished into history. The translation is no less ambitious than the novel itself. It captures this forgotten world in Millet's musical prose; it contrasts the strange patois of the villagers against "proper" French. Filled with finely observed characters and a breathtaking power of description, *The Glory of the Pythres* is a unique, powerful work of art.

In the spring of 1945, Fuhrer and Reich Chancellor Adolf Hitler, President Edvard Benes, and Marshal Josip Broz Tito stood as examples of the complete rupture between the Germans and Austrians on the one hand, and the Czechs, Slovaks, Slovenes, Croats, Serbs, and Bosniaks on the other. The total break that occurred in World War II with war crimes, crimes against humanity, and even genocides (particularly against the Jews and "Gypsies") had a long pre-history, beginning with violent nationalist clashes in the Habsburg Monarchy during the revolutions of 1848/49. Therefore, this monograph - based on a broad range of international primary and secondary sources - explores the development of the political, legal, economic, social, and cultural "communities of conflict" within Austria-Hungary, especially in the Bohemian and South Slavic countries, the making of the Paris Peace Treaties in 1919/20 by violating President Wilson's principle of self-determination, particularly in drawing new borders and creating new economic units, and the

perpetuated ethnic-national conflicts between Czechs and Germans, Slovaks and Magyars, Slovenes and Germans, Croats and Serbs as well as Serbs and Germans in the successor states, deepening the differences between the nations of East-Central Europe. Although many kings, presidents, chancellors, ministers, governors, diplomats, business tycoons, generals, Nazi-Gauleiter, higher SS and police leaders, and Communist functionaries have appeared as historical actors in the 170 years of East-Central and Southeastern European history, Hitler, Benes, and Tito remain especially present in historical memory at the beginning of the twenty-first century.

The Construction of the Identity in 21st Century Australian Academic Press

This book examines how the career counselling profession should respond to the changes in the world of work that have resulted from the increasing need to communicate faster and disseminate information more efficiently. It emphasizes the twin aims of enhancing a persons' career adaptability and helping them to become more employable, rather than linearly trying to find a job and remaining in one organisation for their entire career-lives. The book shows that, to achieve these aims, people need to acquire career resilience, especially since the world of work no longer provides workers with work-holding environments for the duration of their career-lives. It takes into account historical analyses which show that whenever major technological change has occurred and widespread job losses have ensued, people have managed to use the new technology to create new employment opportunities. Readers from career psychology and management research, vocational and professional career coaching, and students of career psychology will find this book delivers sound, updated theory demonstrating how perceived threats in the 21st century can conceivably be turned into opportunities.

This festschrift in honour of Professor Jean Guichard celebrates the important theoretical and applied contributions of his writings on guidance and counselling. Regarding the structure of the volume, the book consists of three parts. The first part is related to the theoretical contributions of Jean Guichard and introduces the richness of his thought, highlighting the antecedents, assonance, conceptual collaborations, and outcomes of his theories. The second part is devoted to the many extensions of his work. The third part concerns application and provides examples of the use of 'Self-Construction' and 'Life Construction' theories in practice.
