This book is an in-dept analysis of the letter/sound correspondence of USA English. It combines two databases, one from the Times of London which counts the frequency of words in the newspaper, and the other from the truespel database of phonetic spelling of USA English. Together they combine to count letter and sound correspondence for frequency analysis. Each of the 26 letters of the alphabet is examined and lists are made of a letters most frequent position in words, top ten words containing the letter, and sounds spelled by the letter. Each of the 40 sounds are analyzed similarly. The analysis represents once and for all how the sounds of USA English are spelled as spoken (spoken word dialog being the same as newspaper text) and how often and in what way the letters of the alphabet portray those sounds.

English is increasingly becoming the world's lingua franca. If we are not native speakers of one of the many varieties of English, then we may be students of English, or use English regularly for academic or business purposes. The English Language series, which is international in focus, aims to synthesize the wealth of existing linguistic research both on and in English. Each volume in the series is designed to present these findings in an accessible, enlightening and entertaining way not only to students of English linguistics but to learners and users of English across the globe. The English Writing System describes how writing is not simply ancillary to other aspects of language but vitally important to almost everything we do, from signing our wills to sending a text message. This book discusses the mechanics of the writing systems of English; the different ways people process words on a page and the mistakes they can make; how children and second language learners acquire these systems; the historical development of the language and the progress of writing technology: in short, the effectiveness of the writing systems of English. Combining an academic perspective from linguistics and psychology with insights into everyday spelling mistakes, The English Writing System will interest students and teachers of linguistics, literature, the English language, psychology and education.

In compiling this bibliography, the main purpose was to assemble references to published material of a sociolinguistic nature concerning the Irish language. The intent was not to cover publications treating language per se, but rather to consider those dealing with language in its social context. Represented here are articles, chapters, books and pamphlets bearing upon social, historical, psychological and educational aspects of Irish - including the decline of the language, the restoration effort, the relationship of language to nationality and religion, and studies of important figures in the language movement.
