*The Discourse on Gender Identity in Contemporary Russia* Wentworth Press Zweig shines a light on a developing Brazil in the 1940s, moving to Rio de Janeiro, Sao Paulo, Minas Gerais, Bahia, and the northeast of the country. There he sees elegance and innocence. He takes you on a journey with an exceptional narrative rhythm: a genuine attempt to comprehend this "exotic" land.

The Elder Brothers Lonely Planet Ottmar Ette's *TransArea* proceeds from the thesis that globalization is not a recent phenomenon, but rather, a process of long duration that may be divided into four main phases of accelerated globalization. These phases connect our present, across the world's widely divergent modern eras, to the period of early modern history. Ette demonstrates how the literatures of the world make possible a tangible perception of that which constitutes Life,

both of our planet and on our planet, which may only be understood through the application of multiple logics. There is no substitute for the knowledge of literature: it is the knowledge of life, from life. This English translation will be of great interest to English-speaking scholars in the fields of Global and Area Studies, Literary Studies, Cultural Studies, History, Political Science, and many more. About the author Ottmar Ette has been Chair of Romance Literature at the University of Potsdam, Germany, since 1995. He is Honorary Member of the Modern Language Association of America (MLA) (elected in 2014), member of the Berlin-Brandenburg Academy of Sciences and Humanities (elected in 2013), and regular member of the Academia Europaea (since 2010).

What are the origins of the idea of human rights and universal human dignity? How can we most fully understand -- and realize -- these rights going into the future? In *The Sacredness of the Person* internationally renowned

sociologist and social theorist Hans Joas tells a story that differs from conventional narratives by tracing the concept of human rights back to the Judeo-Christian tradition or, alternately, to the secular French Enlightenment. While drawing on sociologists such as Emile Durkheim, Max Weber, and Ernst Troeltsch, Joas sets out a new path, proposing an affirmative genealogy in which human rights are the result of a process of "sacralization" of every human being. According to Joas, every single human being has increasingly been viewed as sacred. He discusses the abolition of torture and slavery, once common practice in the pre-18th century west, as two milestones in modern human history. The author concludes by portraying the emergence of the UN Declaration of Human Rights of 1948 as a successful process of value generalization. Joas demonstrates that the history of human rights cannot adequately be described as a history of ideas or as legal history, but as a complex transformation in which diverse cultural traditions had to be articulated, legally codified, and assimilated into practices of everyday life. The sacralization of the person and universal human rights will only be secure in the future, warns Joas, through continued support by institutions and society, vigorous discourse in their defense, and their incarnation in everyday life and practice.

 Ángel Rama was one of twentieth-century Latin America's most distinguished men of letters. *Writing across Cultures* is his comprehensive analysis of the varied sources of Latin American literature. Originally published in 1982, the book links Rama's work on Spanish American modernism with his

arguments about the innovative nature of regionalist literature, and it foregrounds his thinking about the close relationship between literary movements, such as modernism or regionalism, and global trends in social and economic development. In *Writing across Cultures*, Rama extends the Cuban anthropologist Fernando Ortiz's theory of transculturation far beyond Cuba, bringing it to bear on regional cultures across Latin America, where new cultural arrangements have been forming among indigenous, African, and European societies for the better part of five centuries. Rama applies this concept to the work of the Peruvian novelist, poet, and anthropologist José María Arguedas, whose writing drew on both Spanish and Quechua, Peru's two major languages and, by extension, cultures. Rama considered Arguedas's novel *Los ríos profundos* (*Deep Rivers*) to be the most accomplished example of narrative transculturation in Latin America. *Writing across Cultures* is the second of Rama's books to be translated into English.

*Care and the City* is a cross-disciplinary collection of chapters examining urban social spaces, in which caring and uncaring practices intersect and shape people's everyday lives. While asking how care and uncaring are embedded in the urban condition, the book focuses on inequalities in caring relations and the ways they are acknowledged, reproduced, and overcome in various spaces, discourses, and practices. This book provides a pathway for urban scholars to start engaging with approaches to conceptualize care in the city through a critical-reflexive analysis of processes of urbanization. It pursues a systematic integration of empirical,

methodological, theoretical, and ethical approaches to care in urban studies, while overcoming a crisis-centered reading of care and the related ambivalences in care debates, practices, and spaces. These strands are elaborated via a conceptual framework of care and situated within broader theoretical debates on cities, urbanization, and urban development with detailed case studies from Europe, the Americas, and Asia. By establishing links to various fields of knowledge, this book seeks to systematically introduce debates on care to the interconnecting fields of urban studies, planning theory, and related disciplines for the first time.

NEW YORK TIMES BESTSELLER The question is more relevant now than ever before: what makes someone a moral person? Child psychiatrist and Harvard professor Robert Coles has dedicated much of his life to exemplifying, teaching, and writing about the moral life. Here, Coles illuminates the ways in which children become moral or not so moral adults, drawing on case studies, talks with parents, visits to nurseries and classrooms, and interviews with children. No subject could be more important and more timely—for all Americans, but especially for parents. In the tradition of such bestsellers as *Cultural Literacy* and *Emotional Intelligence*, *The Moral Intelligence of Children* identifies a new type of intelligence essential for success and fulfillment in life. It will be used by parents and teachers for years to come as the authoritative guide to children's

moral development.

This book discusses the development of 'dissident' Irish republicanism and considers its impact on politics throughout Ireland since the 1980s.

Based on a series of interviews with over ninety radical republican activists from the wide range of groups and currents which make up 'dissident' republicanism, the book provides an up-to-date assessment of the political significance and potential of the groups who continue to oppose the peace process and the Good Friday Agreement. It shows that the 'dissidents' are much more than traditionalist irreconcilables left behind by Gerry Adams' entry into the mainstream. Instead the book suggests that the dynamics and trajectory of 'dissident' republicanism are shaped more by contemporary forces than historical tradition and that by understanding the "dissidents" we can better understand the emerging forms of political challenge in an age of austerity and increasing political instability internationally.

Conchita Wursts Sieg beim Eurovision Song Contest 2014 war ein zentrales diskursives Moment, welches das derzeitige Spannungsfeld zwischen Postgenderismus und Traditionalismus in Russland offenlegte und aufzeigte, wie sehr Geschlecht und Sexualität, nicht zuletzt für das russische Selbstbild und die Konstruktion einer russischen nationalen Identität, instrumentalisiert und politisiert werden und wie sehr Identitätskonzepte den russischen Alltag mitbestimmen. Die Monografie widmet sich der Diskussion um Geschlecht und Sexualität in Russland nach dem Sieg von Conchita Wurst und untersucht das

Verhältnis von Diskurs und Identität. Im Vordergrund steht die Funktion von Sprache sowohl für die Identitätskonstruktion als auch für die Schaffung und Abgrenzung von Räumen. Dabei lassen sich nicht nur lexikologische und wortbildnerische Besonderheiten beobachten, sondern es liegt insgesamt ein auffälliger Sprachgebrauch mit interessanten Argumentationsstrategien vor. Ausführungen zu Identität und kritische Anmerkungen zur russischen Gender- und Queer-Linguistik komplettieren diesen Band. Conchita Wurst's 2014 victory in the Eurovision Song Contest was a significant discursive moment which revealed the current tensions between postgenderism and traditionalism in contemporary Russia. This case also made clear just how far gender and sexuality are instrumentalised and politicised – not least in creating Russians' self-perception and constructing a Russian national identity – and how massively notions of identity impact on Russian everyday life. The monograph focuses on the discussion of gender and sexuality in Russia following the 2014 event and investigates the relation between discourse and identity. Above all, it is concerned with the function of language in identity construction, and in the creation and demarcation of spaces. In this context, Dr. Scheller-Boltz's study not only analyses lexicological and word-formation peculiarities, but also provides some revealing research findings about specific language use, including certain argumentation strategies. The monograph begins with a detailed introduction to notions of identity and concludes with some critical remarks on Russian gender and queer linguistics. *Fliegende Blätter* Kluwer Law

 An argument that social, political, and economic systems maintain power by discarding certain people, places, and things. Discard studies is an emerging field that looks at waste and wasting broadly construed. Rather than focusing on waste and trash as the primary objects of study, discard studies looks at wider systems of waste and wasting to explore how some materials, practices, regions, and people are valued or devalued, becoming dominant or disposable. In this book, Max Liboiron and Josh Lepawsky argue that social,

political, and economic systems maintain power by discarding certain people, places, and things. They show how the theories and methods of discard studies can be applied in a variety of cases, many of which do not involve waste, trash, or pollution. Liboiron and Lepawsky consider the partiality of knowledge and offer a theory of scale, exploring the myth that most waste is municipal solid waste produced by consumers; discuss peripheries, centers, and power, using content moderation as

an example of how dominant systems find ways to discard; and use theories of difference to show that universalism, stereotypes, and inclusion all have politics of discard and even purification—as exemplified in “inclusive” efforts to broaden the Black Lives Matter movement. Finally, they develop a theory of change by considering “wasting well,” outlining techniques, methods, and propositions for a justice-oriented discard studies that keeps power in view.
