Is your child getting lost in the system, becoming bored, losing his or her natural eagerness to learn? If so, it may be time to take charge of your child's education—by doing it yourself. The Well-Trained Mind will instruct you, step by step, on how to give your child an academically rigorous, comprehensive education from preschool through high school—one that will train him or her to read, to think, to understand, to be well-rounded and curious about learning. Veteran home educators Susan Wise Bauer and Jessie Wise outline the classical pattern of education called the trivium, which organizes learning around the maturing capacity of the child's mind and comprises three stages: the elementary school "grammar stage," when the building blocks of information are absorbed through memorization and rules; the middle school "logic stage," in which the student begins to think more analytically; and the high-school "rhetoric

stage," where the student learns to write and speak with force and originality. Using this theory as your model, you'll be able to instruct your child—whether full-time or as a supplement to classroom education—in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. Thousands of parents and teachers have already used the detailed book lists and methods described in *The Well-Trained Mind* to create a truly superior education for the children in their care. This extensively revised fourth edition contains completely updated curricula and book lists, links to an entirely new set of online resources, new material on teaching children with learning challenges, cutting-edge math and sciences recommendations, answers to common questions about home education, and advice on practical matters such as standardized testing, working with your local school board, designing a high-school program, preparing transcripts, and applying to colleges. You do have control over what and how your child learns. The *Well-Trained Mind* will give you the tools you'll need to teach your child with confidence and success.

Guided Reading and Spanish/English Guided Reading Workbooks Answer Key Ancient Red Wheel Weiser

The *Book of the Ancient World* is an account of our common heritage from the dawn of civilization to the coming of the Greeks. It is the story of how human beings began their great adventure of learning how to live; of how they have sought to satisfy the practical needs of their bodies, the questioning of their minds, and the searching of their spirits. To this end it subordinates details of political events to the record of things that lie at the foundation of our modern civilization. Dorothy Mills had an uncanny and unique ability to write history that is interesting and at the same time based on sound scholarship. Her direct, engaging approach is valued increasingly by the

many parents in our day who are looking for reliable materials for home study, as well as by many private school educators. The highly-prized six volumes of her historical works (see below) have become very scarce on the used book market, and so Dawn Chorus has undertaken to reprint them as part of its effort to offer texts ideally suited to the needs of a new generation of teachers and students. In a world where the quality of education has so deteriorated, may the reissue of this wonderful historical series shine as a beacon to a new generation of young (and not so young) scholars. Dawn Chorus publishes these five other books by Dorothy Mills: *The Book of the Ancient Greeks*; *The Book of the Ancient Romans*; *The People of Ancient Israel*; *The Middle Ages*; and *Renaissance and Reformation Times*. Dawn Chorus has also republished another outstanding, and long-out-of-print historical series perfectly suited for home or school use (and highly recommended in home-school curricula), entitled *The Picturesque Tale of Progress*, by Olive Beaupre Miller. It is available in large format (9 volumes), or smaller, double-bound format (5 volumes).
